Hawaii Tobacco Facts

Smoke Free Environment

In 2006 the Hawai'i State Legislature passed sweeping laws under **HRS 328J** prohibiting smoking in various enclosed and partially enclosed areas in the following areas. Effective 2016 this prohibition will include electronic smoking devices also known as e-cigarettes:

1. **Work and education**
2. **Restaurants and retail**
3. **Hotels and multi-unit housing**
4. **Care and rehabilitation facilities**
5. **Indoor and outdoor recreation**
6. **Transportation**

Local counties have also passed laws calling for additional smoking restrictions in areas not covered by state laws.

Individual agencies and multi-unit buildings such as condominiums have also enacted their own smoke free policies for their respective properties. A growing number of agencies and private businesses have developed individual policies banning their use in settings such as the work place, restaurants and city operated buses. Current state law restricts sales of electronic smoking devices (ESD) including e-cigarettes by persons under 18.
