Notes:

1. Labelled as Atari Games in error
2. Original title "Level 1" or "Level" is unknown and Atari? 1-25, Atari? 26-50, Atari? 51-75, Atari? 76-100
3. Total TRIVIA is the sum calculation of Trivia Blocks and Uncorrected Errors of TRIVIA, TRIVIA and TRIVIA. Trivial values are not added. Red indicates a mismatch between the Total and Trivial totals
4. Total Uncorrected Errors are not included in differences between Uncorrected Errors of Trivia Blocks and Trivia. Trivial values are not added. Red indicates a mismatch between the Total and Trivial totals
5. The Year of Jungle is the ROM Translation Utility Pitfall Machine Translation, using version Beta 1.0 for ROM Translation. Average values are not included in totals. Differences between Jungle Year and the Original Release Year are shown in parentheses

Blank cell indicates information is unknown, or that it does not make sense to include information

Blank and underlined cell indicates data is not accurate, for TRIVIA and Uncorrected Errors it means that no Trivia Blocks/Uncorrected Errors Blocks/Trivial Errors Blocks/Trivial Blocks

- = Not applicable or not applicable
x = Yes, Present, Supported, Enabled
0 = Unknown, Present, Not Known, Not Applicable
c? = Uncertain value
? = Uncertain value
? = 1.0 to 2.0 Mb (1.5 Mb) is a common, but not a standard size, for a 2nd Gen Atari Jungle
? = 2.5 Mb (2.5 Mb) is a common, but not a standard size, for a 3rd Gen Atari Jungle
? = 1.0 Mb (1.0 Mb) is a common size for a 1st Gen Atari Jungle
0 = Indicates that a program is being ported/ported to another platform/machine
c.? = Unknown, but probably a port, based on year of release
(c.) = Unknown, but probably a port
(c.) = Not considered a port, but a remake
c.? = Not considered a port, but a remake

Key:

Year Released = Year Jungle / Pitfall Machine was released

Notes:

1. Jungle Year Released is based on year
2. Original title "Level 1" or "Level" is unknown and Atari? 1-25, Atari? 26-50, Atari? 51-75, Atari? 76-100
3. Total TRIVIA is the sum calculation of Trivial Blocks and Uncorrected Errors of TRIVIA, TRIVIA and TRIVIA. Trivial values are not added. Red indicates a mismatch between the Total and Trivial totals
4. Total Uncorrected Errors are not included in differences between Uncorrected Errors of Trivia Blocks and Trivia. Trivial values are not added. Red indicates a mismatch between the Total and Trivial totals
5. The Year of Jungle is the ROM Translation Utility Pitfall Machine Translation, using version Beta 1.0 for ROM Translation. Average values are not included in totals. Differences between Jungle Year and the Original Release Year are shown in parentheses

Blank cell indicates information is unknown, or that it does not make sense to include information

Blank and underlined cell indicates data is not accurate, for TRIVIA and Uncorrected Errors it means that no Trivia Blocks/Uncorrected Errors Blocks/Trivial Errors Blocks/Trivial Blocks

- = Not applicable or not applicable
x = Yes, Present, Supported, Enabled

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Northwest, LLC Project Manager.

Narrative

CASE NARRATIVE

Client: AECOM
Project: Red Hill NPDES CV22F0106
Report Number: 580-127892-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
Six samples were received on 6/3/2023 9:35 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 1.4º C and 4.4º C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

GASOLINE RANGE ORGANICS (GRO)
Samples RHS-EF-TRAIN-02-060223-(01)-N (580-127892-1), RHS-IF-TRAIN-02-060223-(01)-N (580-127892-2), RHS-TB-TRAIN-02-060223-N (580-127892-4), RHS-EF-TRAIN-02-060223-N (580-127892-5) and RHS-IF-TRAIN-02-060223-N (580-127892-6) were analyzed for gasoline range organics (GRO) in accordance with CA_LUFT_GRO. The samples were analyzed on 06/05/2023 and 06/07/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples RHS-EF-TRAIN-02-060223-(01)-N (580-127892-1), RHS-IF-TRAIN-02-060223-(01)-N (580-127892-2), RHS-TB-TRAIN-02-060223-N (580-127892-4), RHS-EF-TRAIN-02-060223-N (580-127892-5) and RHS-IF-TRAIN-02-060223-N (580-127892-6) were analyzed for volatile organic compounds (GC-MS) in accordance with 8260C. The samples were analyzed on 06/05/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS - SELECTED ION MODE (SIM)
Samples RHS-EF-TRAIN-02-060223-(01)-N (580-127892-1) and RHS-EF-TRAIN-02-060223-N (580-127892-5) were analyzed for semivolatile organic compounds - Selected Ion Mode (SIM) in accordance with 8270E SIM. The samples were prepared on 06/06/2023 and 06/12/2023 and analyzed on 06/08/2023 and 06/12/2023.

2-methylnaphthalene-d10 failed the surrogate recovery criteria low for samples RHS-EF-TRAIN-02-060223-(01)-N (580-127892-1) and RHS-EF-TRAIN-02-060223-N (580-127892-5). The samples were re-extracted outside of preparation holding time. Both sets of data have

Job ID: 580-127892-1 (Continued)

Laboratory: Eurofins Seattle (Continued)

been reported:

The continuing calibration verification (CCV) associated with batch 580-428228 recovered above the upper control limit for 2,4,6-Tribromophenol. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported. The associated samples are impacted: (CCVIS 580-428228/3), (LCS 580-427999/2-A), (LCSD 580-427999/3-A) and (MB 580-427999/1-A).

The following samples were diluted to bring the concentration of target analytes within the calibration range: (LCS 580-427999/2-A) and (LCSD 580-427999/3-A). Elevated reporting limits (RLs) are provided.

The continuing calibration verification (CCV) associated with batch 580-428574 recovered above the upper control limit for 2,4,6-Tribromophenol. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported. The associated samples are impacted: RHS-EF-TRAIN-02-060223-(01)-N (580-127892-1), RHS-EF-TRAIN-02-060223-N (580-127892-5), (CCVC 580-428574/41) and (CCVIS 580-428574/3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL AND EXTENDED RANGE ORGANICS

Samples RHS-EF-TRAIN-02-060223-(01)-N (580-127892-1), RHS-IF-TRAIN-02-060223-(01)-N (580-127892-2), RHS-FB-TRAIN-02-060223-N (580-127892-3), RHS-EF-TRAIN-02-060223-N (580-127892-5) and RHS-IF-TRAIN-02-060223-N (580-127892-6) were analyzed for diesel and extended range organics in accordance with 8015D. The samples were prepared on 06/06/2023 and analyzed on 06/07/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

METALS (ICP)

Samples RHS-EF-TRAIN-02-060223-(01)-N (580-127892-1) and RHS-EF-TRAIN-02-060223-N (580-127892-5) were analyzed for Metals (ICP) in accordance with 6010D. The samples were prepared on 06/06/2023 and analyzed on 06/07/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

ORGANIC LEAD

Samples RHS-EF-TRAIN-02-060223-(01)-N (580-127892-1) and RHS-EF-TRAIN-02-060223-N (580-127892-5) were analyzed for Organic Lead in accordance with 939M. The samples were prepared on 06/11/2023 and analyzed on 06/12/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Definitions/Glossary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-127892-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC/MS Semi VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
S1-	Surrogate recovery exceeds control limits, low biased.
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-127892-1

Laboratory: Eurofins Seattle

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
ANAB	Dept. of Defense ELAP	L2236	01-19-25

Laboratory: Eurofins Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
A2LA	Dept. of Defense ELAP	2907.01	10-31-23

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
939-M	939M	Water	Lead, Total Organic

List Source: Eurofins Seattle

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

List Creation: 06/06/23 01:26 PM

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	N/A	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

ANALYTICAL REPORT

PREPARED FOR

Attn: Kathryn Repine
AECOM
1001 Bishop Street
Honolulu, Hawaii 96813

Generated 6/13/2023 1:28:33 PM

JOB DESCRIPTION

Red Hill NPDES CV22F0106

JOB NUMBER

580-128027-1

Eurofins Seattle
5755 8th Street East
Tacoma WA 98424

See page two for job notes and contact information.

my EOL

Eurofins Seattle

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Northwest, LLC Project Manager.

Narrative

CASE NARRATIVE

Client: AECOM
Project: Red Hill NPDES CV22F0106
Report Number: 580-128027-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
Four samples were received on 6/7/2023 9:20 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 3.1º C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

GASOLINE RANGE ORGANICS (GRO)
Samples RHS-TB-TRAIN-03-060623-N (580-128027-2), RHS-EF-TRAIN-03-060623-N (580-128027-3) and RHS-IF-TRAIN-03-060623-N (580-128027-4) were analyzed for gasoline range organics (GRO) in accordance with CA_LUFT_GRO. The samples were analyzed on 06/10/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples RHS-TB-TRAIN-03-060623-N (580-128027-2), RHS-EF-TRAIN-03-060623-N (580-128027-3) and RHS-IF-TRAIN-03-060623-N (580-128027-4) were analyzed for volatile organic compounds (GC-MS) in accordance with 8260C. The samples were analyzed on 06/10/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS - SELECTED ION MODE (SIM)
Sample RHS-EF-TRAIN-03-060623-N (580-128027-3) was analyzed for semivolatile organic compounds - Selected Ion Mode (SIM) in accordance with 8270E SIM. The sample was prepared on 06/08/2023 and analyzed on 06/09/2023.

The continuing calibration verification (CCV) associated with batch 580-428487 recovered above the upper control limit for 2,4,6-Tribromophenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: RHS-EF-TRAIN-03-060623-N (580-128027-3) and (CCVIS 580-428487/3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Job ID: 580-128027-1 (Continued)

Laboratory: Eurofins Seattle (Continued)

DIESEL AND EXTENDED RANGE ORGANICS

Samples RHS-FB-TRAIN-03-060623-N (580-128027-1), RHS-EF-TRAIN-03-060623-N (580-128027-3) and RHS-IF-TRAIN-03-060623-N (580-128027-4) were analyzed for diesel and extended range organics in accordance with 8015D. The samples were prepared and analyzed on 06/08/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

METALS (ICP)

Sample RHS-EF-TRAIN-03-060623-N (580-128027-3) was analyzed for Metals (ICP) in accordance with 6010D. The sample was prepared on 06/08/2023 and analyzed on 06/09/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

ORGANIC LEAD

Sample RHS-EF-TRAIN-03-060623-N (580-128027-3) was analyzed for Organic Lead in accordance with 939M. The sample was prepared on 06/11/2023 and analyzed on 06/12/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Definitions/Glossary

Project/Site: Red Hill NPDES CV22F0106

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC/MS Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128027-1

Laboratory: Eurofins Seattle

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
ANAB	Dept. of Defense ELAP	L2236	01-19-25

Laboratory: Eurofins Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
A2LA	Dept. of Defense ELAP	2907.01	10-31-23

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
939-M	939M	Water	Lead, Total Organic

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	False	Narrative to indicate if headspace container used for analysis.
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Northwest, LLC Project Manager.

Narrative

CASE NARRATIVE

Client: AECOM
Project: Red Hill NPDES CV22F0106
Report Number: 580-128168-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
Four samples were received on 6/10/2023 9:40 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 2.0º C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

GASOLINE RANGE ORGANICS (GRO)
Samples RHS-TB-TRAIN-01-060923-N (580-128168-2), RHS-EF-TRAIN-01-060923-N (580-128168-3) and RHS-IF-TRAIN-01-060923-N (580-128168-4) were analyzed for gasoline range organics (GRO) in accordance with CA_LUFT_GRO. The samples were analyzed on 06/11/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples RHS-TB-TRAIN-01-060923-N (580-128168-2), RHS-EF-TRAIN-01-060923-N (580-128168-3) and RHS-IF-TRAIN-01-060923-N (580-128168-4) were analyzed for volatile organic compounds (GC-MS) in accordance with 8260C. The samples were analyzed on 06/11/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS - SELECTED ION MODE (SIM)
Sample RHS-EF-TRAIN-01-060923-N (580-128168-3) was analyzed for semivolatile organic compounds - Selected Ion Mode (SIM) in accordance with 8270E SIM. The sample was prepared on 06/13/2023, 06/16/2023 and 06/22/2023 and analyzed on 06/13/2023, 06/20/2023 and 06/23/2023.

The following sample was re-extracted outside of preparation holding time due to failure of quality control parameters in the initial extraction: RHS-EF-TRAIN-01-060923-N (580-128168-3). All data sets have been reported.

The laboratory control sample (LCS) and the laboratory control sample duplicate (LCSD) for preparation batch 580-428676 and analytical

Job ID: 580-128168-1 (Continued)

Laboratory: Eurofins Seattle (Continued)

batch 580-428727 recovered outside control limits for the following analyte: Naphthalene. (LCS 580-428676/2-B) and (LCSD 580-428676/3-B). In addition, 3 of the 4 surrogates were recovered low. Sample RHS-EF-TRAIN-01-060923-N (580-128168-3) was sent back for re-extraction and all sets of data have been reported.

2,4,6-Tribromophenol Surrogate is outside control limits high in CCVs. This surrogate is not associated to target analytes. RHS-EF-TRAIN-01-060923-N (580-128168-3) and (CCVIS 580-429708/3)

The laboratory control sample (LCS) and the laboratory control sample duplicate (LCSD) for preparation batch 580-429044 and analytical batch 580-429440 recovered outside control limits for the following analytes: Naphthalene and 2-Methylnaphthalene. (LCS 580-429044/2-A) and (LCSD 580-429044/3-A). Sample RHS-EF-TRAIN-01-060923-N (580-128168-3) was sent back for re-extraction a second time and all sets of data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL AND EXTENDED RANGE ORGANICS

Samples RHS-FB-TRAIN-01-060923-N (580-128168-1), RHS-EF-TRAIN-01-060923-N (580-128168-3) and RHS-IF-TRAIN-01-060923-N (580-128168-4) were analyzed for diesel and extended range organics in accordance with 8015D. The sample was prepared and analyzed on 06/13/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

METALS (ICP)

Sample RHS-EF-TRAIN-01-060923-N (580-128168-3) was analyzed for Metals (ICP) in accordance with 6010D. The sample was prepared on 06/12/2023 and analyzed on 06/13/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

ORGANIC LEAD

Sample RHS-EF-TRAIN-01-060923-N (580-128168-3) was analyzed for Organic Lead in accordance with 939M. The sample was prepared and analyzed on 06/15/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Definitions/Glossary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128168-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC/MS Semi VOA

Qualifier	Qualifier Description
*-	LCS and/or LCSD is outside acceptance limits, low biased.
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
S1-	Surrogate recovery exceeds control limits, low biased.
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128168-1

Laboratory: Eurofins Seattle

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
ANAB	Dept. of Defense ELAP	L2236	01-19-25

Laboratory: Eurofins Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
A2LA	Dept. of Defense ELAP	2907.01	10-31-23

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
939-M	939M	Water	Lead, Total Organic

Login Number: 128168
List Number: 1
Creator: Presley, Kim A

List Source: Eurofins Seattle

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	False	Narrative to indicate if headspace container used for analysis.
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Northwest, LLC Project Manager.

Narrative

CASE NARRATIVE

Client: AECOM
Project: Red Hill NPDES CV22F0106
Report Number: 580-128281-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
Four samples were received on 6/14/2023 9:40 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 1.6º C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

GASOLINE RANGE ORGANICS (GRO)
Samples RHS-TB-TRAIN-02-061323-N (580-128281-2), RHS-EF-TRAIN-02-061323-N (580-128281-3) and RHS-IF-TRAIN-02-061323-N (580-128281-4) were analyzed for gasoline range organics (GRO) in accordance with CA_LUFT_GRO. The samples were analyzed on 06/14/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples RHS-TB-TRAIN-02-061323-N (580-128281-2), RHS-EF-TRAIN-02-061323-N (580-128281-3) and RHS-IF-TRAIN-02-061323-N (580-128281-4) were analyzed for volatile organic compounds (GC-MS) in accordance with 8260C. The samples were analyzed on 06/14/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS - SELECTED ION MODE (SIM)
Sample RHS-EF-TRAIN-02-061323-N (580-128281-3) was analyzed for semivolatile organic compounds - Selected Ion Mode (SIM) in accordance with 8270E SIM. The sample was prepared on 06/15/2023 and analyzed on 06/16/2023.

The 2,4,6-Tribromophenol Surrogate is outside control limits high in CCVs. This surrogate is not associated to target analytes. (CCVC 580-429092/16) and (CCVIS 580-429092/3)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Job ID: 580-128281-1 (Continued)

Laboratory: Eurofins Seattle (Continued)

DIESEL AND EXTENDED RANGE ORGANICS

Samples RHS-FB-TRAIN-02-061323-N (580-128281-1), RHS-EF-TRAIN-02-061323-N (580-128281-3) and RHS-IF-TRAIN-02-061323-N (580-128281-4) were analyzed for diesel and extended range organics in accordance with 8015D. The sample was prepared and analyzed on 06/15/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

METALS (ICP)

Sample RHS-EF-TRAIN-02-061323-N (580-128281-3) was analyzed for Metals (ICP) in accordance with 6010D. The sample was prepared on 06/14/2023 and analyzed on 06/15/2023.

Lead was detected in method blank MB 580-428884/23-A at a level that was above the method detection limit but below the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. This target analyte concentration was less than the reporting limit (RL); therefore, re-extraction and/or re-analysis of samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

ORGANIC LEAD

Sample RHS-EF-TRAIN-02-061323-N (580-128281-3) was analyzed for Organic Lead in accordance with 939M. The sample was prepared and analyzed on 06/15/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Definitions/Glossary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128281-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC/MS Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128281-1

Laboratory: Eurofins Seattle

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
ANAB	Dept. of Defense ELAP	L2236	01-19-25

Laboratory: Eurofins Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
A2LA	Dept. of Defense ELAP	2907.01	10-31-23

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
939-M	939M	Water	Lead, Total Organic

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	False	Headspace larger than 1/4" in one or more vials, one vial with accpt. headspace
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Northwest, LLC Project Manager.

Narrative

CASE NARRATIVE

Client: AECOM
Project: Red Hill NPDES CV22F0106
Report Number: 580-128467-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
Four samples were received on 6/17/2023 9:45 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 2.3º C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

GASOLINE RANGE ORGANICS (GRO)
Samples RHS-TB-TRAIN-03-061623-N (580-128467-2), RHS-EF-TRAIN-03-061623-N (580-128467-3) and RHS-IF-TRAIN-03-061623-N (580-128467-4) were analyzed for gasoline range organics (GRO) in accordance with CA_LUFT_GRO. The samples were analyzed on 06/20/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples RHS-TB-TRAIN-03-061623-N (580-128467-2), RHS-EF-TRAIN-03-061623-N (580-128467-3) and RHS-IF-TRAIN-03-061623-N (580-128467-4) were analyzed for volatile organic compounds (GC-MS) in accordance with 8260C. The samples were analyzed on 06/20/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS - SELECTED ION MODE (SIM)
Sample RHS-EF-TRAIN-03-061623-N (580-128467-3) was analyzed for semivolatile organic compounds - Selected Ion Mode (SIM) in accordance with 8270E SIM. The sample was prepared on 06/20/2023 and analyzed on 06/22/2023.

The 2,4,6-Tribromophenol surrogate is outside control limits high in CCVs. This surrogate is not associated to target analytes. RHS-EF-TRAIN-03-061623-N (580-128467-3) and (CCVIS 580-429612/3).

The laboratory control sample duplicate (LCSD) for preparation batch 580-429348 and analytical batch 580-429612 recovered outside control limits for the following analyte: 2,4,6-Tribromophenol. This analyte was biased high in the LCSD and is not associated to any

Job ID: 580-128467-1 (Continued)

Laboratory: Eurofins Seattle (Continued)

target analytes; therefore, the data have been reported.

The following sample has confirmed J flag hits for Naphthalene and 2-Methylnaphthalene: RHS-EF-TRAIN-03-061623-N (580-128467-3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL AND EXTENDED RANGE ORGANICS

Samples RHS-FB-TRAIN-03-061623-N (580-128467-1), RHS-EF-TRAIN-03-061623-N (580-128467-3) and RHS-IF-TRAIN-03-061623-N (580-128467-4) were analyzed for diesel and extended range organics in accordance with 8015D. The sample was prepared on 06/20/2023 and analyzed on 06/21/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

METALS (ICP)

Sample RHS-EF-TRAIN-03-061623-N (580-128467-3) was analyzed for Metals (ICP) in accordance with 6010D. The sample was prepared on 06/19/2023 and analyzed on 06/20/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

ORGANIC LEAD

Sample RHS-EF-TRAIN-03-061623-N (580-128467-3) was analyzed for Organic Lead in accordance with 939M. The sample was prepared on 06/23/2023 and analyzed on 06/24/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Definitions/Glossary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128467-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC/MS Semi VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1+	Surrogate recovery exceeds control limits, high biased.
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128467-1

Laboratory: Eurofins Seattle

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
ANAB	Dept. of Defense ELAP	L2236	01-19-25

Laboratory: Eurofins Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
A2LA	Dept. of Defense ELAP	2907.01	10-31-23

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
939-M	939M	Water	Lead, Total Organic

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	False	Headspace larger than 1/4" in one or more vials, one vial with accpt. headspace
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Northwest, LLC Project Manager.

Narrative

CASE NARRATIVE

Client: AECOM
Project: Red Hill NPDES CV22F0106
Report Number: 580-128565-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
Four samples were received on 6/21/2023 9:30 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 3.3º C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

GASOLINE RANGE ORGANICS (GRO)
Samples RHS-TB-TRAIN-01-062023-N (580-128565-2), RHS-EF-TRAIN-01-062023-N (580-128565-3) and RHS-IF-TRAIN-01-062023-N (580-128565-4) were analyzed for gasoline range organics (GRO) in accordance with CA_LUFT_GRO. The samples were analyzed on 06/21/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples RHS-TB-TRAIN-01-062023-N (580-128565-2), RHS-EF-TRAIN-01-062023-N (580-128565-3) and RHS-IF-TRAIN-01-062023-N (580-128565-4) were analyzed for volatile organic compounds (GC-MS) in accordance with 8260C. The samples were analyzed on 06/21/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS - SELECTED ION MODE (SIM)
Sample RHS-EF-TRAIN-01-062023-N (580-128565-3) was analyzed for semivolatile organic compounds - Selected Ion Mode (SIM) in accordance with 8270E SIM. The sample was prepared on 06/22/2023 and analyzed on 06/23/2023.

The 2,4,6-Tribromophenol surrogate is outside control limits high in CCV. This surrogate is not associated to target analytes.
RHS-EF-TRAIN-01-062023-N (580-128565-3) and (CCVIS 580-429708/3)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Job ID: 580-128565-1 (Continued)

Laboratory: Eurofins Seattle (Continued)

DIESEL AND EXTENDED RANGE ORGANICS

Samples RHS-FB-TRAIN-01-062023-N (580-128565-1), RHS-EF-TRAIN-01-062023-N (580-128565-3) and RHS-IF-TRAIN-01-062023-N (580-128565-4) were analyzed for diesel and extended range organics in accordance with 8015D. The samples were prepared and analyzed on 06/22/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

METALS (ICP)

Sample RHS-EF-TRAIN-01-062023-N (580-128565-3) was analyzed for Metals (ICP) in accordance with 6010D. The sample was prepared on 06/21/2023 and analyzed on 06/22/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

ORGANIC LEAD

Sample RHS-EF-TRAIN-01-062023-N (580-128565-3) was analyzed for Organic Lead in accordance with 939M. The sample was prepared and analyzed on 06/26/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Project/Site: Red Hill NPDES CV22F0106

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC/MS Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128565-1

Laboratory: Eurofins Seattle

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
ANAB	Dept. of Defense ELAP	L2236	01-19-25

Laboratory: Eurofins Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
A2LA	Dept. of Defense ELAP	2907.01	10-31-23

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
939-M	939M	Water	Lead, Total Organic

Login Sample Receipt Checklist

Client: AECOM

Job Number: 580-128565-1

Login Number: 128565
List Number: 1
Creator: Groves, Elizabeth

List Source: Eurofins Seattle

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Northwest, LLC Project Manager.

Narrative

CASE NARRATIVE

Client: AECOM
Project: Red Hill NPDES CV22F0106
Report Number: 580-128944-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
Four samples were received on 6/29/2023 9:25 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 2.8º C.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

GASOLINE RANGE ORGANICS (GRO)
Samples RHS-TB-TRAIN-02-062823-N (580-128944-2), RHS-EF-TRAIN-02-062823-N (580-128944-3) and RHS-IF-TRAIN-02-062823-N (580-128944-4) were analyzed for gasoline range organics (GRO) in accordance with CA_LUFT_GRO. The samples were analyzed on 06/30/2023.

Gasoline Range Organics (C6-C12) was detected in method blank MB 580-430445/7 at a level that was above the method detection limit but below the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. This target analyte concentration was less than half the reporting limit (1/2RL); therefore, reanalysis of the samples was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC-MS)
Samples RHS-TB-TRAIN-02-062823-N (580-128944-2), RHS-EF-TRAIN-02-062823-N (580-128944-3) and RHS-IF-TRAIN-02-062823-N (580-128944-4) were analyzed for volatile organic compounds (GC-MS) in accordance with 8260C. The samples were analyzed on 06/30/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

SEMIVOLATILE ORGANIC COMPOUNDS - SELECTED ION MODE (SIM)
Sample RHS-EF-TRAIN-02-062823-N (580-128944-3) was analyzed for semivolatile organic compounds - Selected Ion Mode (SIM) in accordance with 8270E SIM. The sample was prepared on 06/30/2023 and analyzed on 07/01/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Job ID: 580-128944-1 (Continued)

Laboratory: Eurofins Seattle (Continued)

DIESEL AND EXTENDED RANGE ORGANICS

Samples RHS-FB-TRAIN-02-062823-N (580-128944-1), RHS-EF-TRAIN-02-062823-N (580-128944-3) and RHS-IF-TRAIN-02-062823-N (580-128944-4) were analyzed for diesel and extended range organics in accordance with 8015D. The samples were prepared and analyzed on 06/30/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

METALS (ICP)

Sample RHS-EF-TRAIN-02-062823-N (580-128944-3) was analyzed for Metals (ICP) in accordance with 6010D. The sample was prepared on 06/29/2023 and analyzed on 06/30/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

ORGANIC LEAD

Sample RHS-EF-TRAIN-02-062823-N (580-128944-3) was analyzed for Organic Lead in accordance with 939M. The sample was prepared and analyzed on 07/03/2023.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Definitions/Glossary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128944-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U	Indicates the analyte was analyzed for but not detected.

GC/MS Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Accreditation/Certification Summary

Client: AECOM
Project/Site: Red Hill NPDES CV22F0106

Job ID: 580-128944-1

Laboratory: Eurofins Seattle

The accreditations/certifications listed below are applicable to this report.

Authority	Program	Identification Number	Expiration Date
ANAB	Dept. of Defense ELAP	L2236	01-19-25

Laboratory: Eurofins Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
A2LA	Dept. of Defense ELAP	2907.01	10-31-23

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
939-M	939M	Water	Lead, Total Organic

TOXICITY TEST REPORT - Chronic

Client:	AECOM	Sample:	RHS-EF-TRAIN-03-061323-N
Facility:	US Navy	Laboratory Number:	87719
Permit No.		Date:	June 15, 2023

Pimephales promelas **passed** survival and growth testing requirements.

SAMPLE COLLECTION:

Composite effluent samples from AECOM, US Navy, were transported to Bio-Aquatic Testing via Air Cargo. Samples were received on June 15, 2023 and June 19, 2023. Effluent samples were collected from Outfall RHS-EF-TRAIN-03-061323-N by facility personnel.

The effluent samples were analyzed for total residual chlorine using the Hanna Ion Specific Meter #711 and contained <0.10 mg/L and <0.10 mg/L respectively. Effluent and laboratory dilution water pH, temperature, and dissolved oxygen data were collected daily.

TEST PROCEDURES:
Pimephales promelas

EPA METHOD: 1000

The seven-day Chronic *Pimephales promelas* survival and growth test was initiated at 15:47 hours on June 15, 2023. Five effluent concentrations of 12.5%, 25%, 50%, 75% and 100% were prepared utilizing synthetic water as dilution water. The test was set up with 450mL plastic cups containing 250mL of test solution as test chambers. Forty organisms less than 24 hours old were used in each concentration. Each concentration consisted of five replicate chambers containing eight laboratory-cultured larvae. A control of five replicate cups of eight organisms each in synthetic water was conducted concurrently with the test. There was 100% survival in the control. The test was renewed daily with fresh solutions. Organisms in each test chamber were fed less than 24-hour old brine shrimp two times per day. At the end of the test all organisms were sacrificed, dried, and weighed. Data on surviving organisms and water quality were collected daily. The test ended at 09:00 hours on June 22, 2023. Survival and growth (weight) were statistically (p=0.05) analyzed according to EPA procedures to determine the Lowest Observable Effect Concentration (LOEC) and the No Observable Effect Concentration (NOEC).

SURVIVAL:

Pimephales promelas

Pimephales promelas survival data failed Shapiro Wilk's test for normality at the 0.01 (0.900) alpha level after the arc sine (square root (Y)) transformation. Bartlett's test for homogeneity is sensitive to non-normal data and should not be performed if data fails Shapiro Wilk's test. The non-parametric Steel's Many-One Rank test performed on *Pimephales promelas* survival data demonstrated no statistically significant differences between the control and any of the effluent concentrations tested.

LOEC: Not Calculable (Q)
NOEC: 100% Effluent

GROWTH:

Pimephales promelas

Pimephales promelas growth data were normally distributed at the alpha level of 0.01 (0.900) using Shapiro Wilk's test for normality. Growth data were homogeneous using Bartlett's test at the alpha level of 0.01 (15.09) without data transformations. Using ANOVA and Dunnett's test on *Pimephales promelas* growth data demonstrated no statistically significant differences between the control and any of the effluent concentrations tested.

LOEC: Not Calculable (Q)
NOEC: 100% Effluent

APPENDIX A

STATISTICS SUMMARY

Both the lethal and sub-lethal endpoints were statistically calculated according to their respective EPA guidelines. The Chronic Freshwater organisms were calculated according to EPA-821-R-02-013, October 2002 Fourth Edition. The Chronic Marine and Estuarine organisms were calculated according to EPA-821-R-02-014, October 2002 Third Edition. The Acute Freshwater and Marine organisms were calculated according to EPA-821-R-02-012, October 2002 Fifth Edition. The fertilization organisms were calculated according to EPA-600-R-95-136 or EPA-600-R-12-022, dependent upon the species. Listed below are the basic principles of these guidelines. If you would like a copy of the raw statistical calculations for your test then please contact us.

The chronic and acute *Pimephales promelas* and *Menidia beryllina* survival data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts (parametric). If the data fails Shapiro Wilks Test or Bartlett's Test then Steels Many One Test (non-parametric) is used. The chronic *Pimephales promelas* and *Menidia beryllina* growth data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes one of these tests then the data is run through ANOVA and Dunnetts. If the data fails Shipiro Wilks Test and Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The chronic *Mysidopsis bahia* survival data is analyzed using Chi-square test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts. If the data fails Chi-square test or Bartlett's Test then Steels Many One Test is used. *Mysidopsis bahia* growth data is analyzed using Chi-square test and Bartlett's Test. If the data passes one of these tests then the data is run through ANOVA and Dunnetts. If the data fails Chi-square test and Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The acute *Mysidopsis bahia* survival data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts. If the data fails Shipiro Wilks Test or Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The chronic *Ceriodaphnia dubia* survival data are analyzed using the Fisher's Exact Test. The chronic *Ceriodaphnia dubia* reproduction and are analyzed using the Chi-square test and Bartlett Test. If the data passes one of these tests then the data is run through ANOVA and Dunnetts. If the data fails Chi-square test and Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The acute *Daphnia pulex* and *Ceriodaphnia dubia* survival data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts. If the data fails Shapiro Wilks Test or Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The fertilization data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts. If the data fails Shapiro Wilks Test or Bartlett's Test then Steels Many One Test is used. Point estimation or TST methodology may also be used.

```
fathead survival
File: 87719.pps       Transform: NO TRANSFORMATION

Shapiro - Wilk's test for normality
-------------------------------------------------------------------------------

D =    1.200

W =    0.559

Critical W (P = 0.05) (n = 30) = 0.927
Critical W (P = 0.01) (n = 30) = 0.900
-------------------------------------------------------------------------------

Data FAIL normality test. Try another transformation.

Warning -  The first three homogeneity tests are sensitive to non-normal
           data and should not be performed.

fathead survival
File: 87719.pps       Transform: NO TRANSFORMATION

Hartley's test for homogeneity of variance
Bartlett's test for homogeneity of variance
-------------------------------------------------------------------------------

These two tests can not be performed because at least one group has
zero variance.

Data FAIL to meet homogeneity of variance assumption.
Additional transformations are useless.

BIO-AQUATIC TESTING, INC.

Carrollton, TX

REFERENCE TOXICANTS

Bio-Aquatic Testing conducts reference toxicant testing monthly for organisms cultured in-house. For studies requiring purchased organisms, reference toxicant testing is performed simultaneously. Reference toxicant testing validates data and measures organism consistency. Only reagent grade chemicals are used of the following choices: sodium laurel sulfate (SLS), copper sulfate, copper chloride, potassium chloride, and sodium chloride. Organism responses are tracked with control charts for each reference toxicant/organism combination. The data are examined for sensitivity trends and to determine if results are within EPA described limits.

BIOMONITORING REPORT

Pimephales promelas SURVIVAL AND GROWTH TEST

Permittee: AECOM - US Navy

Permit No.:

Outfall No.: RHS-EF-TRAIN-03-061323-N

1. DUNNETT'S PROCEDURE OR STEEL'S MANY-ONE RANK TEST OR WILCOXON RANK SUM TEST (with Bonferroni adjustment as appropriate for Sub-Lethality)

Is the mean dry weight at 7 days significantly less (p=0.05) than the control's mean dry weight for the % effluent corresponding to significant non-lethal effects?

CRITICAL DILUTION (100 %) : _____ YES ____X____ NO

If no is checked enter a '0' for Parameter TLP6C, otherwise enter a '1'.

2. DUNNETT'S PROCEDURE OR STEEL'S MANY-ONE RANK TEST OR WILCOXON RANK SUM TEST (as appropriate for Lethality)

Is the survival at 7 days significantly less (p=0.05) than the control's survival for % effluent corresponding to lethality?

CRITICAL DILUTION (100 %) : _____ YES ____X____ NO

If no is checked enter a '0' for Parameter TWP6C, otherwise enter a '1'.

3. Enter the percent effluent corresponding to each NOEC/LOEC below:

a. NOEC Survival = 100 % Effluent (Parameter TOP6C)

b. LOEC Survival = Q* % Effluent (Parameter TXP6C)

c. NOEC Growth = 100 % Effluent (Parameter TPP6C)

d. LOEC Growth = Q* % Effluent (Parameter TYP6C)

Q* refers to a value that is not calculable

TOXICITY TEST REPORT - Chronic

Client:	AECOM	Sample:	RHS-EF-TRAIN-03-061323-(01)-N
Facility:	US Navy	Laboratory Number:	87720
Permit No.		Date:	June 15, 2023

Pimephales promelas **passed** survival and growth testing requirements.

SAMPLE COLLECTION:

Composite effluent samples from AECOM, US Navy, were transported to Bio-Aquatic Testing via Air Cargo. Samples were received on June 15, 2023 and June 19, 2023. Effluent samples were collected from Outfall RHS-EF-TRAIN-03-061323-(01)-N by facility personnel.

The effluent samples were analyzed for total residual chlorine using the Hanna Ion Specific Meter #711 and contained <0.10 mg/L and <0.10 mg/L respectively. Effluent and laboratory dilution water pH, temperature, and dissolved oxygen data were collected daily.

TEST PROCEDURES:
Pimephales promelas

EPA METHOD: 1000

The seven-day Chronic *Pimephales promelas* survival and growth test was initiated at 16:29 hours on June 15, 2023. Five effluent concentrations of 12.5%, 25%, 50%, 75% and 100% were prepared utilizing synthetic water as dilution water. The test was set up with 450mL plastic cups containing 250mL of test solution as test chambers. Forty organisms less than 24 hours old were used in each concentration. Each concentration consisted of five replicate chambers containing eight laboratory-cultured larvae. A control of five replicate cups of eight organisms each in synthetic water was conducted concurrently with the test. There was 100% survival in the control. The test was renewed daily with fresh solutions. Organisms in each test chamber were fed less than 24-hour old brine shrimp two times per day. At the end of the test all organisms were sacrificed, dried, and weighed. Data on surviving organisms and water quality were collected daily. The test ended at 09:28 hours on June 22, 2023. Survival and growth (weight) were statistically (p=0.05) analyzed according to EPA procedures to determine the Lowest Observable Effect Concentration (LOEC) and the No Observable Effect Concentration (NOEC).

SURVIVAL:

Pimephales promelas

Pimephales promelas survival data failed Shapiro Wilk's test for normality at the 0.01 (0.900) alpha level after the arc sine (square root (Y)) transformation. Bartlett's test for homogeneity is sensitive to non-normal data and should not be performed if data fail Shapiro Wilk's test. The non-parametric Steel's Many-One Rank test performed on *Pimephales promelas* survival data demonstrated no statistically significant differences between the control and any of the effluent concentrations tested.

LOEC: Not Calculable (Q)
NOEC: 100% Effluent

GROWTH:

Pimephales promelas

Pimephales promelas growth data were normally distributed at the alpha level of 0.01 (0.900) using Shapiro Wilk's test for normality. Growth data were homogeneous using Bartlett's test at the alpha level of 0.01 (15.09) without data transformations. Using ANOVA and Dunnett's test on *Pimephales promelas* growth data demonstrated no statistically significant differences between the control and any of the effluent concentrations tested.

LOEC: Not Calculable (Q)
NOEC: 100% Effluent

APPENDIX A

STATISTICS SUMMARY

Both the lethal and sub-lethal endpoints were statistically calculated according to their respective EPA guidelines. The Chronic Freshwater organisms were calculated according to EPA-821-R-02-013, October 2002 Fourth Edition. The Chronic Marine and Estuarine organisms were calculated according to EPA-821-R-02-014, October 2002 Third Edition. The Acute Freshwater and Marine organisms were calculated according to EPA-821-R-02-012, October 2002 Fifth Edition. The fertilization organisms were calculated according to EPA-600-R-95-136 or EPA-600-R-12-022, dependent upon the species. Listed below are the basic principles of these guidelines. If you would like a copy of the raw statistical calculations for your test then please contact us.

The chronic and acute *Pimephales promelas* and *Menidia beryllina* survival data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts (parametric). If the data fails Shapiro Wilks Test or Bartlett's Test then Steels Many One Test (non-parametric) is used. The chronic *Pimephales promelas* and *Menidia beryllina* growth data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes one of these tests then the data is run through ANOVA and Dunnetts. If the data fails Shipiro Wilks Test and Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The chronic *Mysidopsis bahia* survival data is analyzed using Chi-square test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts. If the data fails Chi-square test or Bartlett's Test then Steels Many One Test is used. *Mysidopsis bahia* growth data is analyzed using Chi-square test and Bartlett's Test. If the data passes one of these tests then the data is run through ANOVA and Dunnetts. If the data fails Chi-square test and Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The acute *Mysidopsis bahia* survival data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts. If the data fails Shipiro Wilks Test or Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The chronic *Ceriodaphnia dubia* survival data are analyzed using the Fisher's Exact Test. The chronic *Ceriodaphnia dubia* reproduction and are analyzed using the Chi-square test and Bartlett Test. If the data passes one of these tests then the data is run through ANOVA and Dunnetts. If the data fails Chi-square test and Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The acute *Daphnia pulex* and *Ceriodaphnia dubia* survival data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts. If the data fails Shapiro Wilks Test or Bartlett's Test then Steels Many One Test is used. Point estimation may also be used.

The fertilization data is analyzed using Shapiro Wilks Test and Bartlett's Test. If the data passes both tests then the data is run through ANOVA and Dunnetts. If the data fails Shapiro Wilks Test or Bartlett's Test then Steels Many One Test is used. Point estimation or TST methodology may also be used.

```

Shapiro - Wilk's test for normality
-------------------------------------------------------------------------------

D =    6.800

W =    0.874

Critical W (P = 0.05) (n = 30) = 0.927
Critical W (P = 0.01) (n = 30) = 0.900
-------------------------------------------------------------------------------

Data FAIL normality test. Try another transformation.

Warning -  The first three homogeneity tests are sensitive to non-normal
           data and should not be performed.

fathead survival
File: 87720.pps       Transform: NO TRANSFORMATION

Hartley's test for homogeneity of variance
Bartlett's test for homogeneity of variance
-------------------------------------------------------------------------------

These two tests can not be performed because at least one group has
zero variance.

Data FAIL to meet homogeneity of variance assumption.
Additional transformations are useless.

BIO-AQUATIC TESTING, INC.

Carrollton, TX

REFERENCE TOXICANTS

Bio-Aquatic Testing conducts reference toxicant testing monthly for organisms cultured in-house. For studies requiring purchased organisms, reference toxicant testing is performed simultaneously. Reference toxicant testing validates data and measures organism consistency. Only reagent grade chemicals are used of the following choices: sodium laurel sulfate (SLS), copper sulfate, copper chloride, potassium chloride, and sodium chloride. Organism responses are tracked with control charts for each reference toxicant/organism combination. The data are examined for sensitivity trends and to determine if results are within EPA described limits.

BIOMONITORING REPORT

Pimephales promelas SURVIVAL AND GROWTH TEST

Permittee: AECOM - US Navy

Permit No.:

Outfall No.: RHS-EF-TRAIN-03-061323-(01)-N

1. DUNNETT'S PROCEDURE OR STEEL'S MANY-ONE RANK TEST OR WILCOXON RANK SUM TEST (with Bonferroni adjustment as appropriate for Sub-Lethality)

Is the mean dry weight at 7 days significantly less (p=0.05) than the control's mean dry weight for the % effluent corresponding to significant non-lethal effects?

CRITICAL DILUTION (100 %) : _____ YES ____X____ NO

If no is checked enter a '0' for Parameter TLP6C, otherwise enter a '1'.

2. DUNNETT'S PROCEDURE OR STEEL'S MANY-ONE RANK TEST OR WILCOXON RANK SUM TEST (as appropriate for Lethality)

Is the survival at 7 days significantly less (p=0.05) than the control's survival for % effluent corresponding to lethality?

CRITICAL DILUTION (100 %) : _____ YES ____X____ NO

If no is checked enter a '0' for Parameter TWP6C, otherwise enter a '1'.

3. Enter the percent effluent corresponding to each NOEC/LOEC below:

a. NOEC Survival = 100 % Effluent (Parameter TOP6C)

b. LOEC Survival = Q* % Effluent (Parameter TXP6C)

c. NOEC Growth = 100 % Effluent (Parameter TPP6C)

d. LOEC Growth = Q* % Effluent (Parameter TYP6C)

Q* refers to a value that is not calculable

FORM 10.6 Revision 1 *Effective: 08/07/2018*

Red Hill Well Weekly Operations Report

0000, 04 JUNE 2023 – 2359, 10 JUNE 2023

Execution Summary: Over the period of this report, daily pumping operations averaged 1.89 million gallons per day. Eighteen samples taken per week due to intermittent pump shutdown/restart for RH Optimization Study; all influent/effluent results are non-detects. No turbulence noted inside boom and no sheen observed in Halawa stream. Pumps restarted on 06/06/23 at 0904, shutoff on 06/08/23 at 0900, startup on 06/09/23 at 0900 and shutoff on 06/10/23 at 0900. All other readings were within normal range. Ten of 10 inline analyzers are operational for the monitoring of influent/effluent along with benchtop analyzers IAW RHSRMP.

1. Production Data

Weekly Volume (MG)
13.22
Daily Average (MGD)
1.89
Total Pumped to Date (MGD)
238.79

2. GAC Operations

	In Operation During Period of Report	Date Since Last Operation	Date Since Media Change	Estimate Date of Media Change
Train 1	X	Restart on 03MAR2023	03 MAR 2023	TBD
Train 2	X	Restart on 22MAR2023	22 MAR 2023	TBD
Train 3	X	Restart on 10APR2023	10 APR 2023	TBD
Train 4		Off line but back in service on 02MAY2023	26 APR 2023	TBD

3. Process Control Sampling

Influent Parameter[2]	Number of Samples	Number of Detectable Samples	Highest Level Detected[3]	Units[4]
Total Petroleum Hydrocarbons as Gasoline	18	0	ND	ppm
Total Petroleum Hydrocarbons as Diesel	18	0	ND	ppm

Lead Tank Effluent Parameter[5]	Number of Samples	Number of Detectable Samples	Highest Level Detected[3]	Units[4]
Total Petroleum Hydrocarbons as Gasoline	18	0	ND	ppm
Total Petroleum Hydrocarbons as Diesel	18	0	ND	ppm

Lag Tank Effluent Parameter[5]	Number of Samples	HI DOH Effluent Limitations	Highest Level Detected[3]	Units[4]
Total Petroleum Hydrocarbons as Gasoline	18	0.30	ND	ppm
Total Petroleum Hydrocarbons as Diesel	18	0.40	ND	ppm

Notes:

1. Train 4 cycled for two hours to prevent stagnation of water inside GAC system.
2. Sampling taken every four hours starting at 0300; total of six samples per day
3. Minimum detection limit for Portable Analyzers: TPH-d at 0.1 ppm, and TPH-g at 0.2 ppm
4. One part per million (ppm) is equivalent to 1 milligram per liter (mg/L)
5. Sampling taken from one active train every four hours, in rotation, starting at 0300, after both the lead and the lag tanks; total of twelve samples per day

Red Hill Well Weekly Operations Report

0000, 11 JUNE 2023 – 2359, 17 JUNE 2023

Execution Summary: Over the period of this report, daily pumping operations averaged 1.88 million gallons per day. Eighteen samples taken per week due to intermittent pump shutdown/restart for RH Optimization Study; all influent/effluent results are non-detects. No turbulence noted inside boom and no sheen observed in Halawa stream. Pumps restarted on 06/13/23 at 0904, shutoff on 06/15/23 at 0900, startup on 06/16/23 at 0900 and shutoff on 06/17/23 at 0900. All other readings were within normal range. Ten of 10 inline analyzers are operational for the monitoring of influent/effluent along with benchtop analyzers IAW RHSRMP.

1. Production Data

5. Sampling taken from one active train every four hours, in rotation, starting at 0300, after both the lead and the lag tanks; total of twelve samples per day

Red Hill Well Weekly Operations Report
0000, 18 JUNE 2023 – 2359, 24 JUNE 2023

Execution Summary: Over the period of this report, daily pumping operations averaged 2.91 million gallons per day. Twenty-four samples were taken this week due to intermittent pump shutdown/restart for RH Optimization Study; all influent/effluent results are non-detects. No turbulence noted inside boom and no sheen observed in Halawa stream. Pumps restarted on 06/20/23 at 0904 and normal operations resumed. End of Optimization Study. All other readings were within normal range. Ten of 10 inline analyzers are operational for the monitoring of influent/effluent along with benchtop analyzers IAW RHSRMP.

1. Production Data

Halawa Stream Monitoring Data Sheet

Observer/s: ___[redacted]_____

Date: 6/5/2023 Site Name: Upstream Site Time: 0611

WEATHER CONDITIONS

NOW	Past 24 Hours	Has there been a heavy rain in the past 7 days?
☐ storm (heavy rain)	☐ storm (heavy rain)	☐ yes ☒ no
☐ rain (steady rain)	☐ rain (steady rain)	Air Temperature: 70 °F
☐ showers (intermittent)	☐ showers (intermittent)	
0 % cloud cover	50 % cloud cover or less	
☒ clear/sunny	☐ clear/sunny	

WATER QUALITY

Water level ☐ dry ☒ wet ☐ standing water ☒ flowing water ☐ sheen visible
Observed Turbidity/Sedimentation: Sediment on bottom of streambed.
Water Color: Clear.
Estimated Depth: Less than 1 inch.
Visibility: Clear to bottom.
Tide (if applicable): N/A

Notes: Vegetation growth and leaf litter accumulation on sides of stream flow. Rocks, vegetation debris, and sediment piles present in stream. Matted yellow algae growth on bottom of stream bed. Large dead tree branches suspended over stream by fences. Side drainage is contributing to stream flow. Small amount of water flow in main channel as well as from side drainage.

SPECIES OBSERVATIONS
Fish Kill? ☐ Yes ☒ No # Dead Fish 0
Fish Breathing Stress/Gulping ☒ None ☐Yes
Fish Abnormal Behavior ☒ None ☐Yes

Notes: No waterbirds or shorebirds observed.

WEATHER CONDITIONS

NOW	Past 24 Hours	Has there been a heavy rain in the past 7 days?
☐ storm (heavy rain)	☐ storm (heavy rain)	☐ yes ☒ no
☐ rain (steady rain)	☐ rain (steady rain)	Air Temperature: 72 °F
☐ showers (intermittent)	☐ showers (intermittent)	
0 % cloud cover	50 % cloud cover or less	
☒ clear/sunny	☐ clear/sunny	

WATER QUALITY

Water level ☐ dry ☒ wet ☐ standing water ☒ flowing water ☐ sheen visible
Observed Turbidity/Sedimentation: Sediment on bottom of streambed.
Water Color: Clear.
Estimated Depth: Less 1 inch below and above discharge pipes.
Visibility: Clear to bottom.
Tide (if applicable): N/A

Notes: Floating vegetation debris (sludge-like) build up between two waddles. Small amount of water flow on sides of channel above discharge pipes. No flow from discharged pipes. Vegetation upstream of discharge pipes next to stream channel recently cleared (near observation point). Vegetation debris, rocks, branches, and growing vegetation observed in stream.

SPECIES OBSERVATIONS

Fish Kill? ☐ Yes ☒ No # Dead Fish 0
Fish Breathing Stress/Gulping ☒ None ☐Yes
Fish Abnormal Behavior ☒ None ☐Yes

Notes: No waterbirds or shorebirds observed.

WATER QUALITY

Water level ☐ dry ☒ wet ☐ standing water ☒ flowing water ☒ sheen visible
Observed Turbidity/Sedimentation: Sediment on bottom of streambed.
Water Color: Clear.
Estimated Depth: 1-3 inches in shallow section of channel, 4+ feet in deep portion of channel.
Visibility: Clear to bottom in shallow section of channel, ~ 3 feet in deep portion of channel.
Tide (if applicable): N/A

Notes: Trash, vegetation debris, growing vegetation, and sediment piles with growing vegetation. A wheelbarrow, ground cloth, and cement bucket observed in channel. Small amounts of white foam and light brown foam observed where shallow section of stream meets estuary. Small sheen patch observed where shallow section meets estuary portion of stream, less than 1 foot by 1 foot in size. A school of roughly 100 small fish were observed gulping at the surface of the water near the same area.

SPECIES OBSERVATIONS

Fish Kill? ☐ Yes ☒ No # Dead Fish __0___
Fish Breathing Stress/Gulping ☐ None ☒ Yes
Fish Abnormal Behavior ☒ None ☐ Yes

Notes:

Species Observed	# of individuals	Behavior	Notes/Observations
black-crowned night heron	3	Foraging, Transitioning	Two juveniles foraging in the stream where shallow section meets estuary portion. One adult transitioning in stream.
unknown small fish species	100+	Gulping	Fish gulping where shallow section meets estuary portion of stream.

PHOTOGRAPHS

Photograph # 1:

Downstream Site # 2 looking downstream. A while bucket filled with cement and a black ground cloth, both circled in yellow, observed in channel.

Photograph # 2:

Small sheen patch, circled in yellow, observed where shallow section of stream meets estuary portion at Downstream Site # 2.

WATERBIRD SURVEY DATASHEET

WETLAND CONDTION CODES	
Water Level (WL)	**Human Impact (HI)**
0 = dry	0 = indirect (little garbage, few people)
1 = lower than normal	1 = moderate
2= normal	2 = heavy (many people present; e.g., wading, boating, fishing, etc)
3 = higher than normal	
Vegetation Cover (VC)	**Shoreline Condition of Tidal Wetlands (SC)**
0 = open water (<25% veg)	0 = water at high tide mark N/A=not applicable
1 = 26-50% veg cover	1 = water 25 ft from high tide mark
2 = 51-75% veg cover	2 = water 50 ft from high tide mark
3 = >75% cover	3 = water >50 ft from high tide mark

WEATHER CODES	
Rainfall (RF)	**Wind**
0 = no rain	0 = no wind, < 1 mph
1 = mist or fog	1 = smoke drifts, 1-3 mph
2 = drizzle	2 = wind felt on face, 4-7 mph
3 = light rain	3 = leaves and twigs rustle, 8-12 mph
4 = heavy rain	4 = dust raises, branches stir, 13-18 mph
5 = snow or hail	5 = small trees sway, >19 mph
Cloud Cover (CC) = Estimate to the n**earest 10%**	

Date 6-5-23

Halawa Stream Monitoring Data Sheet

Observer/s: [redacted]

Date: 6/13/2023 Site Name: Upstream Site Time: 1048

WEATHER CONDITIONS

NOW	Past 24 Hours	Has there been a heavy rain in the past 7 days?
☐ storm (heavy rain)	☐ storm (heavy rain)	☐ yes ☒ no
☐ rain (steady rain)	☐ rain (steady rain)	Air Temperature: 79 °F
☒ showers (intermittent)	☐ showers (intermittent)	
100 % cloud cover	60 % cloud cover or less	
☐ clear/sunny	☐ clear/sunny	

WATER QUALITY

Water level ☐ dry ☒ wet ☐ standing water ☒ flowing water ☐ sheen visible
Observed Turbidity/Sedimentation: Sediment on bottom of streambed.
Water Color: Clear
Estimated Depth: ~ 1/2 inch.
Visibility: To bottom.
Tide (if applicable): N/A

Notes: Leaf litter throughout stream bed.

SPECIES OBSERVATIONS
Fish Kill? ☐ Yes ☒ No # Dead Fish 0
Fish Breathing Stress/Gulping ☒ None ☐Yes
Fish Abnormal Behavior ☒ None ☐Yes

Notes: No waterbirds or shorebirds.

Halawa Stream Monitoring Data Sheet

Observer/s: [redacted]

Date: 6/26/2023 Site Name: Upstream Site Time: 0655

WEATHER CONDITIONS

NOW	Past 24 Hours	Has there been a heavy rain in the past 7 days?
☐ storm (heavy rain)	☐ storm (heavy rain)	☐ yes ☒ no
☐ rain (steady rain)	☐ rain (steady rain)	Air Temperature: 74 °F
☐ showers (intermittent)	☐ showers (intermittent)	
60 % cloud cover	60 % cloud cover or less	
☐ clear/sunny	☐ clear/sunny	

WATER QUALITY

Water level ☐ dry ☒ wet ☐ standing water ☒ flowing water ☐ sheen visible
Observed Turbidity/Sedimentation: Sediment on bottom of streambed.
Water Color: Clear.
Estimated Depth: Less than 1 inch.
Visibility: Clear to bottom.
Tide (if applicable): N/A

Notes: Leaf litter, rocks, rubbish, and growing vegetation on sediment piles, present in channel. Large dead tree hanging over channel downstream. Slight water flow from side drainage.

SPECIES OBSERVATIONS
Fish Kill? ☐ Yes ☒ No # Dead Fish 0
Fish Breathing Stress/Gulping ☒ None ☐Yes
Fish Abnormal Behavior ☒ None ☐Yes

Notes: No waterbirds or shorebirds.

Species Observed	# of individuals	Behavior	Notes/Observations
red-vented bulbul	5	Transitioning	Transitioning in tree canopy above stream.

PHOTOGRAPHS

Photograph # 2:

Upstream Site looking downstream.

Halawa Stream Monitoring Data Sheet

Observer/s: ___[redacted]___

Date: 6/26/2023 Site Name: Discharge Site Time: 0636

WEATHER CONDITIONS

NOW	Past 24 Hours	Has there been a heavy rain in the past 7 days?
☐ storm (heavy rain)	☐ storm (heavy rain)	☐ yes ☒no
☐ rain (steady rain)	☐ rain (steady rain)	Air Temperature: 71 °F
☐ showers (intermittent)	☐ showers (intermittent)	
80 % cloud cover	60 % cloud cover or less	
☐ clear/sunny	☐ clear/sunny	

WATER QUALITY

Water level ☐ dry ☒ wet ☐ standing water ☒ flowing water ☐ sheen visible
Observed Turbidity/Sedimentation: Sediment on bottom of streambed.
Water Color: Clear.
Estimated Depth: Above discharge less than 1 inch, below discharge 1-4 inches.
Visibility: Clear to bottom.
Tide (if applicable): N/A

Notes: Waddle present with vegetation debris and some rubbish. Leaf litter mostly occurring in middle of channel due to previous fast moving waters along the sides of the channel. Discharge pipes on. Living and dead branches hanging over stream and growing vegetation in the stream.

SPECIES OBSERVATIONS

Fish Kill? ☐ Yes ☒ No # Dead Fish 0
Fish Breathing Stress/Gulping ☒ None ☐Yes
Fish Abnormal Behavior ☒ None ☐Yes

Notes: No waterbirds or shorebirds.

Species Observed	# of individuals	Behavior	Notes/Observations
red-crested cardinal	2	Transitioning	Flying in trees next to stream.
unknown moth	1	Transitioning	Fluttering in channel.
zebra dove	2	Transitioning	Flying above channel in trees.

Date: 6/26/2023 Site Name: Downstream Site # 1 Time: 0733

WEATHER CONDITIONS

NOW	Past 24 Hours	Has there been a heavy rain in the past 7 days?
☐ storm (heavy rain)	☐ storm (heavy rain)	☐ yes ☒ no
☐ rain (steady rain)	☐ rain (steady rain)	Air Temperature 78° F
☐ showers (intermittent)	☐ showers (intermittent)	
60 % cloud cover	60 % cloud cover or less	
☐ clear/sunny	☐ clear/sunny	

WATER QUALITY

Water level ☐ dry ☒ wet ☐ standing water ☒ flowing water ☐ sheen visible
Observed Turbidity/Sedimentation: Little sediment on bottom of streambed.
Water Color: Clear.
Estimated Depth: 1-3 inches.
Visibility: Clear to bottom.
Tide (if applicable): N/A.

Notes: Sediment piles with growing vegetation present on sides of channel. Algae clumps with leaf litter present in stream. Water flow across whole channel.

SPECIES OBSERVATIONS

Fish Kill? ☐ Yes ☒ No # Dead Fish 0
Fish Breathing Stress/Gulping ☒ None ☐Yes
Fish Abnormal Behavior ☒ None ☐Yes

Notes:

Species Observed	# of individuals	Behavior	Notes/Observations
red-vented bulbul	1	Transitioning	Flying around bridge.

PHOTOGRAPHS

	Photograph # 1: Downstream Site #1 looking upstream.

Halawa Stream Monitoring Data Sheet

Observer/s:___[redacted]_____

Date:___6/26/2023___Site Name:_____Downstream Site #2_____ Time: __0721_____

WEATHER CONDITIONS

NOW	Past 24 Hours	Has there been a heavy rain in the past 7 days?
☐ storm (heavy rain)	☐ storm (heavy rain)	☐ yes ☒ no
☐ rain (steady rain)	☐ rain (steady rain)	Air Temperature: 75 °F
☐ showers (intermittent)	☐ showers (intermittent)	
60% cloud cover	60 % cloud cover or less	
☐ clear/sunny	☐ clear/sunny	

WATER QUALITY

Water level ☐ dry ☒ wet ☐ standing water ☒ flowing water ☐ sheen visible
Observed Turbidity/Sedimentation: Sediment on bottom of streambed.
Water Color: Clear.
Estimated Depth: 1-4 inches in shallow section of channel, 4+ feet in deep portion of channel.
Visibility: Clear to bottom in shallow section of channel, ~ 2 feet in deep portion of channel.
Tide (if applicable): N/A.

Notes: Small amounts of white foam/bubbles where shallow sections meets estuary. Sediment piles with growing vegetation, leaf litter, and some rubbish present in stream.

SPECIES OBSERVATIONS

Fish Kill? ☐ Yes ☒ No # Dead Fish __0___
Fish Breathing Stress/Gulping ☒ None ☐ Yes
Fish Abnormal Behavior ☒ None ☐ Yes

Notes: Two Hawaiian stilts were heard- and observed flying high over the area.

Species Observed	# of individuals	Behavior	Notes/Observations
black-crowned night heron	3	Foraging, Territorial, Transitioning	Adult foraging where shallow section meets estuary. Juveniles flying and chasing each other in mangrove tress along sides of the stream.
red-crested cardinal	1	Transitioning	Transitioning on island make of sediment in the back of stream

PHOTOGRAPHS

	Photograph # 1: Downstream Site # 2 looking downstream.

Halawa Stream Monitoring Data Sheet

Observer/s: ___[redacted]_____

Date: 6/26/2023 Site Name: Estuary Site #1 Time: 0811

WEATHER CONDITIONS

NOW	Past 24 Hours	Has there been a heavy rain in the past 7 days?
☐ storm (heavy rain)	☐ storm (heavy rain)	☐ yes ☒ no
☐ rain (steady rain)	☐ rain (steady rain)	Air Temperature: 81°F
☐ showers (intermittent)	☐ showers (intermittent)	
80 % cloud cover	60 % cloud cover or less	
☐ clear/sunny	☐ clear/sunny	

WATER QUALITY

Water level ☐dry ☒wet ☐ standing water ☒ flowing water ☐ sheen visible
Observed Turbidity/Sedimentation: Sediment throughout water column.
Water Color: Green/Brown.
Estimated Depth: 5+ feet.
Visibility: ~ 1 foot.
Tide (if applicable): Rising, 0.67 feet.

Notes: Vegetation pile exposed in back of stream. One fisherman actively fishing from bridge with one fishing pole. Did not survey on other side of fisherman.

SPECIES OBSERVATIONS

Fish Kill? ☐ Yes ☒ No # Dead Fish 0
Fish Breathing Stress/Gulping ☒ None ☐ Yes
Fish Abnormal Behavior ☒ None ☐ Yes

Notes:

Species Observed	# of individuals	Behavior	Notes/Observations
unknown large fish species	2	Potentially mating	Chasing each other in middle of stream. Fish length at least 3 feet.
white tern	1	Transitioning	Flying/hovering over back of stream.
black-crowned night heron	1	Foraging	Foraging in back of stream along mangrove shoreline.

PHOTOGRAPHS

	Photograph # 1: Estuary Site #1 looking upstream.

	Photograph # 1: Two large fish at Estuary Site #1.

Halawa Stream Monitoring Data Sheet

Observer/s: ___[redacted]_____

Date: 6/26/2023 Site Name: Estuary Site #2 Time: 0752

WEATHER CONDITIONS

NOW	Past 24 Hours	Has there been a heavy rain in the past 7 days?
☐ storm (heavy rain)	☐ storm (heavy rain)	☐ yes ☒ no
☐ rain (steady rain)	☐ rain (steady rain)	Air Temperature: 80 °F
☐ showers (intermittent)	☐ showers (intermittent)	
50 % cloud cover	60 % cloud cover or less	
☐ clear/sunny	☐ clear/sunny	

WATER QUALITY

Water level ☐dry ☒wet ☐ standing water ☒ flowing water ☐ sheen visible
Observed Turbidity/Sedimentation: Turbidity increases with depth.
Water Color: Clear near shoreline, opaque in deeper portions.
Estimated Depth: 5+ feet.
Visibility: ~ 2 feet.
Tide (if applicable): Rising, 0.61 feet.

Notes: Two booms present.

SPECIES OBSERVATIONS

Fish Kill? ☐ Yes ☒ No # Dead Fish 0
Fish Breathing Stress/Gulping ☒ None ☐Yes
Fish Abnormal Behavior ☒ None ☐Yes

Notes: No waterbirds or shorebirds.

Species Observed	# of individuals	Behavior	Notes/Observations
unknown small fish species	10	Schooling	Swimming near shoreline.
common myna	2	Transitioning	Flying from shoreline across stream.
