Comments: \_\_\_\_\_

On or after January 1, 2013, the plan review fee must be provided with the initial submittal of the project plans and specifications. The plan review fee is a one-time fee that covers the project's initial plan review and subsequent resubmittals, unless the project scope of work changes significantly. Payment must be made by check. Make checks payable to: **Disability and Communication Access Board**.

The department/agency or design firm/consultant must determine the estimated construction cost. The estimated construction cost shall be based on the entire project scope of work that is covered under Section 103-50, Hawaii Revised Statutes (HRS §103-50). If the entire project scope of work is covered under HRS §103-50, then the estimated construction cost is based on the entire project. If a portion of the project scope of work is covered under HRS §103-50, then the estimated construction cost is based on the portion of the project covered under HRS §103-50.

The plan review fee shall be four-tenths of one percent (0.004) for the first \$500,000 of the estimated construction cost plus two-tenths of one percent (0.002) of the estimated construction costs greater than \$500,000 up to and including \$2,000,000 plus two one-hundredths of one percent (0.0002) of the estimated construction costs over \$2,000,000 except as follows:

- (1) The minimum review fee for plans and specifications subject to accessibility guidelines is \$200;
- (2) DCAB may limit the maximum review fee for plans and specifications for infrastructure projects or projects managed by private nonprofit entities to \$3,000; and
- (3) There is a \$50 review fee for projects with plans and specifications that do not reflect any elements subject to accessibility guidelines.

Examples of calculating the plan review fee:

Estimated construction cost =	\$250,000
<u>0.004 X \$250,000</u>	= \$1,000
<b>Plan review fee</b>	= <b>\$1,000</b>

Estimated construction cost =	\$1,500,000
0.004 X \$500,000	= \$2,000
<u>0.002 X \$1,000,000</u>	= \$2,000
<b>Plan review fee</b>	= <b>\$4,000</b>

Estimated construction cost =	\$5,000,000
0.004 X \$500,000	= \$2,000
0.002 X \$1,500,000	= \$3,000
<u>0.0002 X \$3,000,000</u>	= \$600
<b>Plan review fee</b>	= <b>\$5,600</b>

Infrastructure projects include water, drainage, sewer, waste disposal and treatment systems, roads, and street lighting projects with minimal work to accessible elements and spaces. Projects with significant work to accessible elements and spaces are not infrastructure projects (e.g., projects to improve sidewalks and curb ramps in the public right-of-way and projects to alter office and common use spaces at a wastewater treatment plant).

Projects managed by nonprofit entities include, but are not limited to, projects that receive state or county funds or federal funds administered by the state or county that are used for the design and/or construction of a building, facility, or site.

Projects with plans and specifications that do not reflect any elements subject to accessibility guidelines are projects where all work is exempt from accessibility guidelines or projects that do not include work that affects accessible spaces or elements (e.g., machinery equipment repair or reroofing).

If a project appears to be exempt from the full plan review fee, the department/agency or design firm/consultant should coordinate with DCAB prior to the initial submittal to confirm the appropriate plan review fee.
