Fall Reduction – Essential to Overall Senior Wellness and the Community’s Health

Sandi Brekke, COTA; Healthy Living & Senior Summit Coordinator
Walt Schroeder, Pharm.D., Director; Transition and Senior Care Strategy
Learning Objectives

List resources available to Kaiser Permanente members to reduce fall risk

Summarize examples of how Kaiser Permanente applied the foundational elements of fall prevention into practice

Assess opportunities for improving fall prevention awareness/interventions within your organization
Facts around falls

- 1 in 3 elders fall each year; less than half tell their doctor
- Falling once doubles your chance to fall again
- More than 95% of hip fractures are caused by falling
- Half of all falls happen at home
- Many elders hospitalized after a fall never achieve independence again

A vision for elder care…

Kaiser Permanente is committed to aging well; understanding, planning and supporting all stages of life
Partnership with the Fall Prevention Consortium

- Coordinated and aligned with Fall Prevention Awareness 2015 campaign
- State’s Fall Prevention awareness videos
  - Kaiser Permanente Moanalua Medical Center closed circuit television system
  - Fall Prevention Classes within Kaiser Permanente Clinics
- Joint KHON, Fall Prevention Consortium and Kaiser Permanente media campaign on fall prevention awareness (to air late 2015)
Internal Alignment within Kaiser Permanente

State’s Fall Prevention Campaign

- Medication Review
- Exercise
- Vision Checks
- Home Safety
Exercise
Benefits of staying active

• You are less likely to fall by staying active and participating in activities such as tai chi, hula, gardening, and walking around the mall or neighborhood. ([http://health.hawaii.gov/injuryprevention/home/preventing-falls/information](http://health.hawaii.gov/injuryprevention/home/preventing-falls/information))

• World’s largest fall prevention study in Sydney in 2007 – After 16 weeks of learning and practicing Tai Chi the results showed that Tai Chi significantly reduced the number of falls.

• Tai Chi for Fall Prevention (Dr. Paul Lam) – Waipio, Honolulu

• Chairobics - Honolulu
Incorporating STEADI into your program

STEADI – Stopping Elderly Accidents, Deaths and Injuries

- Balance and Fitness Testing – Honolulu, Kailua, Mapunapuna and Waipio
  - Timed Up and Go (agility/dynamic balance)
  - 30-Second Chair Stand (lower body strength)
  - 4-Stage Balance Test
    - Fall Prevention class
    - Tai Chi for Fall Prevention
    - Chairobics
    - Silver&Fit (YMCA, Tai Chi home program)
    - Exercise handout
    - NIA exercise video & guide
    - Health Coach
Home Safety
Improving home safety

- **Bathrooms**
  - Grab bars
  - Non-slip mats
  - Shower bench

- **Clutter**
  - Clear pathways
  - Remove rugs & extension cords

- **Lighting**
  - Increase brightness
  - Night lights
  - Stair edging
Available Resources

- Home Health
- Project Dana
- Fall Prevention Home Safety
Medication Review
High Risk Medications for Falls

- Muscle relaxants (e.g. cyclobenzaprine)
- Sleep aids (e.g. zolpidem)
- Glyburide

- Over the Counter Products
  - Diphenhydramine (Benadryl)
  - Chlorpheniramine (AllerChlor, Chlor-Trimenton)
  - Combination products
    - Tylenol PM
    - NyQuil
Where medication reviews occur

- Clinical settings
  - Hospital
  - Nursing homes
  - Clinic
  - Kaiser Permanente Home Health

- Senior Summit/Brown-bag events

- Medicare Part D

- Member request
Eye Conditions Affecting Seniors

- **Cataracts**
  - Clouding of the lens of the eye
  - Symptoms:
    - Blur
    - Glare
    - Halos
  - Risk factors:
    - Aging
    - Excessive sunlight exposure
    - Smoking
    - Certain medications and diseases
  - Treatment
    - Surgery
Eye Conditions Affecting Seniors

- **Glaucoma**
  - high pressure in the eye causing nerve damage (often)
  - **Symptoms**
    - Slow loss of peripheral vision
  - **Risk Factors**
    - Older age
    - Family history
    - African ancestry
    - Latino/Hispanic ethnicity
    - History of significant eye injury
  - **Treatment**
    - Eye drops
    - Laser treatments
    - Surgery
Eye Conditions Affecting Seniors

- Macular Degeneration
  - Damage to the center of the retina
  - Symptoms
    - Center of everything a person tries to look at is distorted or missing
  - Risk Factors
    - Family history
    - Old age
    - Smoking
    - Excessive sunlight exposure
  - Treatment
    - No effective treatments to restore vision
Screening and Prevention

- **Screening**
  - Yearly eye appointments

- **Prevention**
  - Green leafy and colorful vegetables
  - Control blood sugar, cholesterol, blood pressure, weight
  - Sunglasses
  - Avoid smoking
Transforming Practice
Transforming Elder Care

who am I caring for?

what do they want?

how would I know?

I’m old, sick and on a lot of medicine

She has dementia, metastatic colon cancer, so I enrolled her in hospice in May

During my visit today, I told her things look good! Continue your meds and follow-up in 6 months for lipids and chemistries
