Corrective Action Report responses

41 (b)(7) Have a current tuberculosis clearance that meets department of health guidelines

There were current TB clearances for all of staff at Nagomi Foster Homes. However, they were filed separately and could not locate them at the time of inspection. All records were later located and placed in a right section as instructed. Currently, all records are in right place and it needed to be replaced with new records. E-calendar was marked for expiration of each form with alert.

41 (b)(8) Have documentation of current training in blood borne pathogen and infection control, cardiopulmonary resuscitation and basic first aid.

Again, the caregivers were all had required training but the certificates are filed in a wrong place. All records are currently placed in a right section as instructed and e-calendar is marked for expiration of each training with alert.
