

Technical Assistance, Education and Training/Grants

Technical Assistance (TA)

We provide TA in the following areas:

- Hospital financial and quality improvement issues
- Strategic planning
- Needs assessment and analysis
- Grant opportunities and review

Annual Conference

We hosted a very successful 11th annual Flex/Critical Access Hospital conference on October 26, 27, and 28, 2011 at the Waikoloa Marriott Hotel. The conference brought together over 80 participants from across the state and country to learn about methods to improve care, performance, and to better deal with changes in national policy. Hospitals and providers from all of Hawaii's islands were represented. Details for the 2012 conference are forthcoming.

Grant Writing Resources

The Office of Primary Care and Rural Health (OPCRH) supports grant writers by providing education and workshops, disseminating information regarding grant opportunities, and providing technical assistance. Please see our section, [External Links](#), which provides a listing of some of the grant resources available online. The following information is a compilation of some of the resources available to assist with the development of a grant proposal.

Logic Models-
