Project ECHO (Extension for Community Health Outcomes)

Sanjeev Arora MD

Distinguished Professor of Medicine (Gastroenterology/Hepatology)
Director of Project ECHO®
Department of Medicine
University of New Mexico Health Sciences Center

Tel: 505-272-2808
Fax: 505-272-6906
sarora@salud.unm.edu
The mission of Project ECHO® is to expand the capacity to provide best practice care for common and complex diseases in rural and underserved areas and to monitor outcomes.

Supported by New Mexico Department of Health, Agency for Health Research and Quality, New Mexico Legislature, the Robert Wood Johnson Foundation and the GE Foundation.
A Global Health Problem
Over 170 Million Carriers Worldwide, 3-4 Million new cases/year

Source: WHO 1999
Hepatitis C

New Mexico

• Estimated number is greater than 28,000

• In 2004 less than 5% had been treated
  ▪ 2,300 prisoners were HCV positive (~40% of those entering the corrections system), none were treated
Hepatitis C

Treatment

**Good** news ...

- Curable in 70% of cases

**Bad** news ...

- Severe side effects:
  - anemia (100%)
  - neutropenia >35%
  - depression >25%

- No Primary Care Physicians treating HCV
Rural New Mexico
Underserved Area for Healthcare Services

• 121,356 square miles
• 2.08 million people
• 47% Hispanic
• 10.2% Native American
• 19% poverty rate compared to 14.3% nationally
• 21% lack health insurance compared to 16% nationally

• 32 of 33 New Mexico counties are listed as Medically Underserved Areas (MUAs)
• 14 counties designated as Health Professional Shortage Areas (HPSA’s)
Goals of Project ECHO®

Develop capacity to safely and effectively treat HCV in all areas of New Mexico and to monitor outcomes.

Develop a model to treat complex diseases in rural locations and developing countries.
Partners

• University of New Mexico School of Medicine Department of Medicine, Telemedicine and CME
• NM Department of Corrections
• NM Department of Health
• Indian Health Service
• FQHCs and Community Clinics
• Primary Care Association
Methods

• Use Technology
• sharing “best practices”
• Case based learning
• web-based database to monitor outcomes

What is Best Practice in Medicine

✓ Algorithm
✓ Check Lists
✓ Process
✓ Wisdom Based on Experience
Hepatitis C

Steps

• Train physicians, mid-level providers, nurses, pharmacists, educators in HCV
• Train to use web based software — “iHealth”
• Conduct telemedicine clinics — “Knowledge Network”
• Initiate co-management — “Learning Loops”
• Collect data and monitor outcomes centrally
• Assess cost and effectiveness of programs
Benefits to Rural Clinicians

• No cost CMEs and Nursing CEUs
• Professional interaction with colleagues with similar interest
  ‒ Less isolation with improved recruitment and retention
• A mix of work and learning
• Access to specialty consultation with GI, hepatology, psychiatry, infectious diseases, addiction specialist, pharmacist, patient educator
Technology

• Videoconferencing Hardware
• Videoconferencing Software
• Video Recording System
• You Tube-like Website/Archive
• *Health – Electronic Clinical Management Tool
• iECHO – Electronic TeleECHO Clinic Management Solution
How well has model worked?

• 500 HCV TeleECHO™ Clinics have been conducted
• >5,000 patients entered HCV disease management program

_CME’s/CE’s issued:_

− Total CME hours 57000 hours at no cost for HCV and 12 other disease areas
# Project ECHO® Clinicians

## HCV Knowledge Skills and Abilities (Self-Efficacy)

scale: 1 = none or no skill at all 7= expert-can teach others

Outcomes of Treatment for Hepatitis C Virus Infection by Primary Care Providers

Results of the HCV Outcomes Study

Objectives

• To train primary care clinicians in rural areas and prisons to deliver Hepatitis C treatment to rural populations of New Mexico

• To show that such care is as safe and effective as that give in a university clinic

• To show that Project ECHO® improves access to Hepatitis C care for minorities
Participants

• Study sites
  ▪ Intervention (ECHO)
    ➢ Community-based clinics: 16
    ➢ New Mexico Department of Corrections: 5
  ▪ Control: University of New Mexico (UNM) Liver Clinic
Hepatitis C

Principle Endpoint

Sustained Viral Response (SVR): no detectable virus 6 months after completion of treatment
# Treatment Outcomes

</tr>
</tbody>
</table>

*SVR=sustained viral response

Conclusions

• Rural primary care Clinicians deliver Hepatitis C care under the ages of Project ECHO® that is as safe and effective as that given in a University clinic.

• Project ECHO® improves access to hepatitis C care for New Mexico minorities.
Hepatitis C

ECHO Model is Cost Effective

• In 60 Percent of Patients treated for HCV the model was cost savings

• Overall Cost per Discounted Quality of Life Year Gained was less than 3500 dollars

AASLD Presentation Washington DC November 2013
Disease Selection

• Common diseases
• Management is complex
• Evolving treatments and medicines
• High societal impact (health and economic)
• Serious outcomes of untreated disease
• Improved outcomes with disease management

Currently there are 632 Zip Codes in the US with the following characteristics:
1) Rural (less than 1,000 people per sq mile.)
2) 40% or more people identify themselves as Hispanic.
3) The average household income is less than $44,100.

5,373,209 people reside in these zip codes, with 756,578 of those living in NM. There are 145 licensed providers residing within these zip codes, 72 within New Mexico. This graph shows when each provider became licensed.
Transforming Primary Care with Knowledge Networks

“Expanding the Definition of Underserved Population”
Chronic Disease Management is a Team Sport

Force Multiplier

Diabetes and Cardiac Risk Reduction

Asthma and COPD

Substance Use and Mental Health Disorders

Primary Care  
Nurse  
Medical Assistant  
Community Health Worker
Community Based Care for Cardiac Risk Factor Reduction was more Effective than Enhanced Primary Care

Why is a CHW Intervention Effective?

- Live in Community
- Understand culture
- Appreciate economic limitations of patient and know community resources available to patient
- Often know family and can engage other social resources for patient
- Spend more time with patient
ECHO CHW Training
Multiple Tracks

• CHW Specialist Training
  ▪ **CREW**: Diabetes, Obesity, Hypertension, Cholesterol, Smoking Cessation, Exercise Physiology
  ▪ **CARS**: Substance Use Disorders
  ▪ **ECHO Care™**: Complex Multiple Diagnoses

• Prison Peer Educator Training
Specialty CHW Program

- Narrow Focus — Deep Knowledge
- Standardized Curriculum
  - 3 Day Onsite
  - Webcam/Weekly Video Based Clinics
    - Diet
    - Exercise
    - Smoking Cessation
    - Motivational Interviewing
    - Gentle Nudges
    - Finger Stick
    - Foot Exam
  - Ongoing support via knowledge networks
- Part of Disease Management Team

Potential Benefits of ECHO Model™ to Health System

• Quality and Safety
• Rapid Learning and best-practice dissemination
• Reduce variations in care
• Access for Rural and Underserved Patients, reduced disparities
• Workforce Training and Force Multiplier

• **Demonopolize Knowledge**

• Improving Professional Satisfaction/Retention
• Supporting the Medical Home Model
• Cost Effective Care- Avoid Excessive Testing and Travel
• Prevent Cost of Untreated Disease (e.g.: liver transplant or dialysis)
• Integration of Public Health into treatment paradigm
ECHO Replication in US:

- **University of Washington** (HCV, Chronic Pain, HIV, Addiction)
- **University of Chicago** (Hypertension, Breast Cancer, ADHD, Childhood Obesity)
- **Department of Defense** – Worldwide Initiative (Chronic Pain)
- **Veteran’s Administration Health System** - 11 Regions (Chronic Pain, Diabetes, Heart Failure, HCV, Women’s Health, Nephrology)
- **University of Nevada** (Diabetes/Cardiovascular Risk Reduction, Sports Medicine, Thyroid & Diabetes, Antibiotic Stewardship, Mental Health, Rheumatology)
- **University of Utah** (HCV, Advanced Liver Care)
- **University of South Florida, ETAC and Florida/Caribbean, AETC** (General HIV, Adolescents/Pediatrics HIV, HCV/HIV Co-Infection, Psychiatry & HIV, Spanish Language HIV)
- **Harvard, Beth Israel Deaconess Medical Center** (HCV, Gerontology – ECHO AGE)
- **St Joseph Hospital and Medical Center** – Arizona (HCV)
- **Community Health Center, Inc.** – Connecticut (HIV, HCV, Chronic Pain, Opioid Addiction – Buprenorphine)
- **LA Net, Project ECHO LA** (AAPA Preventive Care, Nephrology, Adult Psychiatry)
- **CHI St. Luke’s Health Baylor St. Luke’s Medical Center** – Texas (HCV)
- **UNM: Envision NM** (Childhood Overweight Medical Management, Pediatric Nutrition, Psychiatry, Asthma/Pulmonary)
SCAN-ECHO Spread in VHA-600 CBOCs
ECHO Replication Sites Worldwide:

- Maulana Azad Medical College – New Delhi, India (HIV)
- Institute of Liver and Biliary Sciences – New Delhi, India (HCV)
- ECHO India – Mumbai, Chandigargh, & Lucknow (Autism)
- Canada - Chronic Pain
- Uruguay (Liver Disease)
- Northern Ireland (Hospice)
- Irish Republic (Rheumatology, Endocrinology)
The ECHO Team
Use of multipoint videoconferencing, best practice protocols, co-management of patients with case based learning (the ECHO model) is a robust method to safely and effectively treat common and complex diseases in rural and underserved areas and to monitor outcomes.
