Health Care Utilization Report

Hawaii 2008

Table of Contents

Aloha:

The State Health Planning and Development Agency (SHPDA) is pleased to present the 2008 Health Care Utilization Report.

The Agency is very grateful to the Data Center of the Center on the Family at the University of Hawaii for their assistance in processing, analyzing, and developing this report.

Best regards,

Romala Sue Radcliffe
Administrator

April 2012

Note:

(1) Totals for Table 7 only include facilities that reported admission and inpatient days data of their licensed beds. The licensed bed totals of Table 7 are lower than those reported in Tables 1, 2 and 3, where all of the facilities who reported some data were included.

(2) The bed utilization data for Wahiawa General Hospital (Honolulu County) and SNF bed utilization data for Kaiser Permanente Moanalua Medical Center (Honolulu County) was not available at time of publication. Kahuku Medical Center (Honolulu County), Maluhia Hospital (Honolulu County), Pearl City Nursing Home (Honolulu County), Kula Hospital (Maui County), and several substance-abuse treatment facilities did not report in time for this publication.

Hale Makua – Wailuku	\$285	\$264	\$253	\$265	\$244	\$233

Table 8. Long-Term Care Daily Room Rates, 2008

County Facility	SNF			ICF		
	Private	Semi-Private	Ward, 3-4 Beds	Private	Semi-Private	Ward, 3-4 Beds
Lanai Community Hospital	\$508			\$475		
Maui County Average	\$361	\$267	\$253	\$340	\$252	\$233
State Average	\$358	\$334	\$296	\$322	\$304	\$282

Note:

(1) Daily room rates as of December 31, 2008 were reported. When a range was reported for a room category, the median of the range was calculated.

(2) Room rates for Kahala Nui Hi'olani Care Center (Honolulu County), Kaiser Permanente Moanalua Medical Center (Honolulu County), and Molokai General Hospital (Maui County) were not available at time of publication. Kahuku Medical Center (Honolulu County), Maluhia Hospital (Honolulu County), Pearl City Nursing Home (Honolulu County), and Kula Hospital (Maui County) did not report in time for this publication.

Table 9. Computerized Tomography (CT) Utilization, 2008

County Facility	Number of CT	Number of Procedures	Average Technical Charge per Procedure
Hawaii County			
Hawaii Radiologic Associates – Kona	1	2,540	\$475

Maui Memorial Medical Center	1	270	0
Maui County Total	1	270	0
State Total	14	11,539	63

Glossary

Acute Bed is the bed type designated to service inpatients whose average length of stay is usually less than thirty days and require access to the full range of services provided by an acute care inpatient facility.

Acute Psychiatric Bed is the bed type designated to provide 24 hour inpatient acute care services for mentally disordered patients whose length of stay is usually less than thirty days.

Acute/SNF is a “swing” bed designated to service either acute level or skilled nursing level patients.

Admissions refer to the number of inpatients admitted by the respective facility and bed type. It includes multiple admissions by an individual admitted more than once during the reporting period.

Average Daily Census (ADC) is the average number of inpatients during the year. The ADC multiplied by 365 gives the total number of patient days per year. The ADC divided by the bed capacity and multiplied by 100 gives the occupancy rate.

Average Length of Stay (ALOS) is the average number of days a patient stays in the facility. ALOS is computed by dividing the total patient days by the number of admissions.

The ALOS may indicate whether a facility is able to appropriately discharge patients from the facility or to another type of bed based on the patient’s condition. It may also indicate the proportion of very seriously ill patients the facility cares for. Usually, the larger the number of very sick patients, the longer the ALOS.

The data includes patient days that result from being unable to discharge patients due to a lack of available services in the community or beds needed at other facilities. If these “waitlisted days” were excluded from the ALOS data, it would provide better accurate data on how many days are needed to care for patients and result in a lower ALOS.

County means one of four major counties: (1) Hawaii County is composed of the island of Hawaii; (2) Honolulu County is composed of the island of Oahu and the City of Honolulu (Census County Division, or CCD) on Oahu and is the most populous city in the state; (3) Kauai County is composed of the island of Kauai; and (4) Maui County comprises the islands of Maui, Molokai and Lanai.

Critical Care Unit (CCU) is a specialized care bed designed to provide intensive, focused care for patients who are seriously or critically ill within an acute bed facility setting.

Inpatient Days is the total number of days a patient stays in a facility. The totals currently include “waitlisted days”, i.e. patient days as a result of not being able to discharge a patient due to lack of community services or other types of beds appropriate for the care of the patient.

Intermediate Care Facility (ICF) is a facility which provides appropriate care to persons referred by a physician needing: (1) 24-hour a day assistance with the normal activities of daily living; (2) need care provided by licensed nursing personnel and paramedical personnel on a regular, long term basis, and; (3) don’t need skilled nursing or paramedical care 24-hours a day.

Intermediate Care Facility – Mental Retardation (ICF – MR) is a facility providing intermediate care services for persons who are mentally retarded.

Licensed Beds means the approved bed capacity as determined by the Office of Health Care Assurance (OHCA) for the State of Hawaii.

Occupancy Rates (Occup %) is the percentage of licensed bed capacity occupied on average. Occupancy rates are computed by dividing the ADC by the number of licensed beds and multiplying by 100.

Health care facilities require some excess capacity to efficiently manage admissions, discharges and transfers of patients. If, however, the occupancy rate is low for long periods of time, the facility may not be able to generate sufficient revenue to justify staffing and other expenses for this additional capacity.

In acute care, particularly where patients are admitted on a non-scheduled basis, e.g. OB, CCU, etc., optimal occupancy must accommodate unforeseen increases in admissions. Consequently, occupancy rates may occasionally exceed 100% because of an unexpected surge in number of admissions. This might also occur if there is a decrease in routine patient discharges. Chronic high occupancy rates will decrease the number of beds available to the community.

Lack of qualified staffing and temporary closure of patient areas because of facility renovations, labor shortages and strikes may also prevent making more beds available.

Psychiatric Beds are inpatient beds designated for the diagnosis and long-term treatment of chronic mental illness or mental disorder.

Rehabilitation Beds are inpatient beds designated to restore the ill or disabled person to achieve the fullest physical, mental, social, vocational, and economic usefulness possible.

Skilled Nursing Facility (SNF) is a facility that accepts patients for rehabilitative services or medical care that is less intense than that received in a hospital. The cost per bed day in a SNF is typically less than a like cost in an acute care hospital.

Specialty Care Beds means a facility which provides a therapeutic residential program for care, diagnoses, treatment or rehabilitation services for socially or emotionally distressed persons, mentally ill persons, persons suffering from substance abuse, and developmentally disabled persons.

Substance-Abuse Treatment Facility (STF) is a facility that provides residential substance-abuse treatment services.
