UNITED STATES NAVY

For Emergency Change-In-Service and
Defueling of 20 Underground Storage Tanks,
Red Hill Bulk Fuel Storage Facility

DOCKET NO. 21-UST-EA-02

INTERVENOR HONOLULU BOARD OF
WATER SUPPLY'S WITNESS
DESIGNATIONS

INTERVENOR HONOLULU BOARD OF
WATER SUPPLY'S WITNESS DESIGNATIONS

In accordance with the December 14, 2021 Scheduling Order, as amended, Intervenor Honolulu Board of Water Supply ("BWS") hereby designates the following witnesses who may testify in this contested case proceeding:

1. *BWS Witness*

The BWS is a semi-autonomous agency responsible for managing Oahu's municipal water resources and distribution system. The BWS maintains the island's water supply systems, providing residents with safe and dependable water service at a reasonable cost. Monies collected from water sales finance its operations and projects.

A BWS witness will provide testimony concerning the BWS' interest in the outcome of this contested case proceeding. Specifically, the BWS witness will testify regarding actual injuries incurred by and threatened injuries to the BWS and its customers as a result of past and future leaks from the Red Hill Bulk Fuel Storage Facility ("Red Hill") underground storage tanks ("USTs") and associated systems. As the State's largest municipal water purveyor, the BWS witness will also be able to speak to the importance of Oahu's irreplaceable sole-source aquifer and its role in satisfying the considerable needs of our island community for clean water. Finally, the BWS witness will testify concerning the unacceptable risks that the Red Hill USTs and associated systems pose to the future availability of clean water for the island of Oahu and its inhabitants.

The following BWS witness may be called in connection with this proceeding:

Erwin Kawata
Program Administrator
Water Quality Division
Honolulu Board of Water Supply

630 South Beretania St.
Honolulu, HI 96843
Tel: (808) 748-5000
Email: ekawata@hbws.org

Mr. Kawata's resume follows:

Erwin Kawata is the Water Quality Division Program Administrator at the Honolulu Board of Water Supply.

Mr. Kawata has 39 years of experience with BWS and is responsible for drinking water testing, water treatment, and regulatory compliance of the Board's water sources, treatment and distribution systems. He is also responsible for the department's compliance with all environmental rules and regulations that apply to BWS and conduct studies to identify potential environmental hazards that could impact the department's water resources and systems and other special research programs.

Mr. Kawata has a Bachelor of Science degree in Chemistry and a certificate in Public Administration from the University of Hawaii at Manoa. He is a member of the American Water Works Association, American Chemical Society, and the Water Environment Federation.

2. *DNV Witness*

DNV GL USA, Inc. ("DNV"), operating in over 100 countries, is the leading technical advisor to the global oil and gas industry, providing consistent, integrated services within technical and marine assurance and advisory, risk management and offshore classification, to enable safe, reliable, and enhanced performance in projects and operations. In this proceeding, DNV will provide expert testimony concerning, among other things, oil and gas industry standards for UST systems, safe storage practices for UST system operators, UST system inspection and repair technologies and processes, failure mechanisms for UST systems, including corrosion, metal fatigue and defective welds, corrosion protection for UST systems, UST system leak detection technologies and processes, and risk identification and risk assessments for UST systems.

The following DNV witness may be called in connection with this proceeding:

Dr. David Norfleet, P.E.
DNV GL USA, Inc.
Head of Department, Labs and Testing
Energy Systems
5777 Frantz Road
Dublin, OH 43017
Tel: (614) 761-1214
Fax: (614) 761-1633

Dr. Norfleet's resume is attached in Appendix A to his expert report.

DATED: Honolulu, Hawaii, December 18, 2020.
