

**PFAS-Specific Sampling and Analysis Plan,  
Red Hill Bulk Fuel Storage Facility, Adit 6  
JOINT BASE PEARL HARBOR-HICKAM, O'AHU, HAWAII**

**Enclosure 1: Decision Units**

**Date:** 07 DEC 2022

**Prepared for:** Red Hill OIC

## Decision Units

As stated in the PFAS-Specific Sampling and Analysis Plan, Red Hill Bulk Fuel Storage Facility, Adit 6, Decision Units (DU) are defined as sample collection areas, and will be identified based on visually impacted areas.

DUs currently identified are:

- DU1 – Storm culvert running downhill adjacent to the Adit 6 entrance (est. 1,152 sq.ft.)
- DU2 - Soil areas situated in-between the road, storm culvert and apron (est. 616 sq.ft.)
- DU3 – 15.6' x 80' apron area outside the Adit 6 entrance (est. 1,252 sq.ft.)
- DU4 - A 5'x10' area around the Stormwater headwall/outfall (est. 50 sq.ft.)
- DU5, DU6, DU7, DU8 and DU9 – Stormwater underground culvert sampling area including base and four sidewalls (1,246 sq.ft.)

Figure 1 shows currently designated DU locations.
