

COVID-19 Testing FAQs

When should I get tested for COVID?¹

- If you have COVID-19 symptoms.
- At least 5 days after known or suspected exposure to COVID-19.
- Before & after travel.

What to do while waiting for my test results?¹

- Stay away from others & quarantine for at least 5 days.
- Wear a well-fitted mask when around others.
- Watch for symptoms until 10 days after exposure. Isolate immediately if you develop symptoms.

What do I do after I get my test results?¹

- **If Positive result**
 - Check with a health professional immediately about appropriate early treatment.²
 - Isolate/stay home for at least 5 days.
 - Wear a well-fitted mask when around others.
 - If symptoms worsen, seek emergency medical attention.²
 - Notify your close contacts.²
- **If Negative result**
 - AND you DO NOT have symptoms, resume normal activity.
 - BUT you DO have symptoms, isolate/stay home for at least 5 days.

Where do I find the most reliable information about COVID-19?

- Centers for Disease Control and Prevention
- Hawaii Department of Health
- For more information, call your Primary Care Provider
