

INSTRUCTIONS FOR ACCESSING EVIDENCE-BASED ASSESSMENT WIKIVERSITY: FREE ASSESSMENT TOOLS

Introduction

A group of individuals from University of North Carolina Chapel Hill has developed a Wikiversity page on evidence-based assessment. The site is full of helpful resources on assessment that are available within the public domain and are easily searchable. It should be noted that the site offers assessment measures for individuals across the lifespan (not just children and adolescents) and some subpages do not have fully operational links.

Instructions

If you are interested in identifying the best performing, free measures, with evidence of reliability and validity across a range of samples, click on the following page:

https://en.wikiversity.org/wiki/Evidence_based_assessment/What_Questionnaire_Should_I_Use%3F

The page sorts measures by:

1. Narrow
2. Disorder-specific
3. Broadband
4. General
