

LEAD AND PREGNANCY

KEEP BABY SAFE

Lead can cause your baby to be born too early or born too small.

Lead can harm your baby's brain and nervous system.

Lead can harm your baby's kidneys and other organs.

If you have lead in your body, it can harm your unborn baby.

Talk to your doctor to learn about a simple blood test.

Stay away from lead while pregnant.

Take steps to minimize the risk of lead in your home and other places your baby will spend time after being born.

Look out for possible lead sources

Paint / Dust

Bare Soil

Work / Hobbies

Old Toys

Jewelry

Dishware

Old Furniture

Foreign Products

Plumbing

Antiques

Ammunition

Fishing Sinkers
