

"To carry and tend to a beloved child"

Hi'ilei Developmental Screening Program INFORMATION SHEET

What is Hi'ilei Hawai'i?

The Hi'ilei Developmental Screening Program (Hi'ilei program) is a FREE resource that provides developmental screens and information for parents/families of children from birth to 5 years of age.

What is development?

Children grow and develop skills throughout their life. Early skills include smiling for the first time, waving "bye bye", and taking a first step. Children continue to develop more skills as they grow, play, learn, speak, socialize, and move.

What is a developmental screen?

A developmental screen is a simple set of questions about different activities children, within the specified age range, may do. It can help families identify their child's strengths as well as if there are any areas where their child may need some support or practice.

How is your child developing?

- **Health Care Providers:** Talk with your child's doctor if you are worried about your child's development. Doctors may also do a developmental screen as part of their well-child exam.
- **Hi'ilei Developmental Screening Program:** Enroll your child in the Hi'ilei program to see how your child is developing and receive assistance with tracking your child's development from birth to 5 years of age.

How can your family enroll in the Hi'ilei program?

Enrolling is FREE! Families can complete a developmental screen online or request to receive one in the mail.

Online option: To enroll and complete a developmental screen online go to:
<https://www.asqonline.com/family/628176>

Mail option: Complete the Enrollment Form (on the backside of this page) and send to the Hi'ilei program. A developmental screen and pre-paid stamped envelope will then be mailed to you for you to complete and return.

What happens after the developmental screen is completed?

- Your family will be sent a summary of the screening results by mail and/or phone call from our staff.
- Your family will also be sent a list of activities and ideas for fun ways to help your child continue to develop; as well as any community resources that may be helpful.
- If there are any concerns about your child's development, your family will be contacted about possible next steps.
- You may also request to have the screening results sent to your child's doctor or other program.
