

Integrated Report call for data

Data submission form

Data submitted to HIDOH Clean Water Branch for the purpose of assessing state water quality may be used to fulfill certain federal Clean Water Act requirements (§303(c), §303(d); 305(b)). Decisions and conclusions resulting from the data submitted to CWB can have broad and long standing implications to the state water quality program. It is therefore imperative that only data of acceptable quality be used to assess waters for compliance with state water quality standards. Please ensure data being submitted meets the minimum requirements as put forth by the data submittal requirements available at https://health.hawaii.gov/cwb/files/2020/09/Data-Acceptance-Criteria-revised-200904_2.pdf before completing this form.
