

T&C RN – AUTHORIZATION

As of 9/13/2021

Q: If the participant already has T&C RN authorized, when does the provider RN have to do the new assessment?

The DDD Provider Nurse Delegation Packet is available for use beginning September 1, 2021. However, please work with the DDD CM as situations vary and will depend on each participant's needs and circumstances.

Q: If 2 hours are authorized at the beginning then will more hours be authorized to cover the delegation plan creation, training, maintaining the MARs, and other duties for ongoing T&C oversight?

Two (2) hours will be authorized for the Provider RN to complete the nursing assessment (i.e., DDD Provider Nurse Delegation Packet). Within the nursing assessment, the Provider RN should include their recommendation for the number of hours needed annually to complete the nurse delegation requirements, which include development of Nurse Delegation Plan(s), training, skills verification, and ongoing supervision/monitoring. Please note that the recommended number of hours must be supported by information provided in the nursing assessment and will be reviewed and considered for authorization by the DDD.

Q: Will CMs notify the agencies the names of participants who will need to have the RN assessment form completed?

Yes, the DDD CM will work with each participant and their circle of support at their annual ISP meeting. However, if a participant has needs that arise prior to their next ISP meeting, please contact the DDD CM as soon as possible.

Q: If someone had their 2-hour assessment and is receiving T&C RN and, down the road, there is a change in condition, can the CM authorize another 2-hours for a new assessment? Or is that new assessment considered to be part of the RNs responsibilities under the T&C RN?

An additional 2 hours may be authorized if a new assessment is required due to a change in condition. Please work with the DDD CM.
