### Notifiable Diseases

#### STAPHYLOCOCCUS AUREUS (VISA)

#### TYPHUS, MURINE *

#### TYPHOID FEVER

#### TULAREMIA

#### PSITTACOSIS

#### HEPATITIS C (ACUTE)

#### HAEMOPHILUS INFLUENZA (INVASIVE DISEASE)

#### E. COLI 0157:H7

#### CAMPYLOBACTERIOSIS

#### BOTULISM, FOODBORNE

#### HISTORICAL SUMMARY OF REPORTED CASES OF NOTIFIABLE DISEASES, HAWAI‘I, 2008 - 2017

*Not nationally notifiable but state reportable diseases; **Non-pharyngitis / Group A invasive beta-hemolytic streptococcal (GABHS) cases for report year (not previously reported); N/R stands for "not reportable" and N/A stands for "not available."

- AMEBIASIS *
- "Total Resident Population" is the most recent estimate of the resident population as of July 1, based on historical projections. The estimate is subject to change as future population estimates are developed.

2. As of 2012, because of increased confirmatory testing, confirmed cases will no longer be reported separately from probable cases. Probable cases are included in parentheses as reported consistently with previous years counts.
3. For BURKHOLDERIA PSEUDOMALLEI and FILOVIRUSES (EBOLA, MARBURG), please refer to the latest public health guidelines at the Centers for Disease Control and Prevention website. For the latest data available for years prior to 2012, please refer to the Hawaii Department of Health website.
