NOTES:
2. As of April 13, 2018, because of a recent confidentiality variance, confirmed cases will be reported separately from probable cases. Probable cases are included in the numerator to maintain consistency with previous years counts.
3. The following diseases are not nationally notifiable but are state reportable: Meningococcal Disease, Gonorrhea, Early Syphilis, Tonsillitis, Naphritis, Pneumonia, Kawasaki Disease, Poliomyelitis, and West Nile Virus. The following diseases are not nationally notifiable: severe adult respiratory distress syndrome (SARS), MRSA, and Staphylococcal Enteritis. The following diseases are nationally notifiable but are not included in this report: Influenza and Measles.
4. "Resistant" includes resistance to antibiotics of "last resort" but excludes resistance to quinolones. "Last resort," however, is not defined in this report.
5. *Resistant* includes resistance to antibiotics of "last resort" but excludes resistance to quinolones. "Last resort," however, is not defined in this report.
6. **Non-pharyngitis / Group A invasive beta-hemolytic streptococcus (GBS) C** cases for report year (not previously reported).

N/R stands for "not reportable" and N/A stands for "not available."
