

ON-THE-GO WOUND WISDOM

CLEAN THE WOUND

A thorough cleansing of the wound with soap and safe water reduces the potential for infection

CONSULT A PROVIDER IF:

The wound becomes, red, warm to the touch, or there is pus or debris in the wound, consult a healthcare provider.

Do **NOT** swim if you have diarrhea.

Any amount of infected fecal matter (poop) can contaminate an entire pool or hot tub and make others sick if they swallow the water.

AVOID CONTAMINATED WATER

AVOID WATER:

- Near storm drains
- In lakes or rivers after heavy rainfall.
- In freshwater streams, canals and lakes
- In warm seawater

APPLY A BANDAGE

Keeping the wound dry and protected will reduce the chance of infection and prevent transmission of infection to others
