2026 Trauma Data Collection Trauma Registry Follow Up Session

January 12, 2026

11:00 AM to 11:30 AM

Microsoft Teams Virtual Meeting by Invite Only

This meeting will be recorded.

A Prepared and Safe Hawaii Starts with Trauma and Emergency Medical Services Modernization

Agenda: 2026 Trauma Data Collection Plan

- 1100 Announce readiness for 2026 data collection
- 1105 Outline configuration steps for registries
- 1120 Share key compliance updates and resources
- 1125 Discussion

Right Patient, Right Place, Right Time, Right Now

A Prepared and Safe Hawaii Starts with Trauma and Emergency Medical Services Modernization

Key Update

- Hospital survey and Registry testing completed
 - 9 responses
- Determination: Hawaii will continue data collection using Hawaii 2025 inclusion criteria for 2026
- Next Step: Hospitals configure their 2026 Registry Specialty Template

Unplanned Return to the Operating Room vs. Unplanned Visit to the Operating Room

UNPLANNED RETURN TO THE OPERATING ROOM

ELEMENT INTENT
A potentially preventable event that highlights possible opportunities for improvements in care.

DESCRIPTION
The patient underwent a subsequent operative procedure at the same operative site as the initial operative procedure. Both procedures must have been performed in the operating room at your center.

EXCLUDE:

- Planned return to the operating room after damage control surgery or staged surgical interventions.
- Procedures performed in an interventional radiology suite.
- Procedures performed in a hybrid operating room where the intervention is limited to a percutaneous approach.
- Pre-planned multiple stage approach procedures.

ELEMENT VALUES

1. Yes 2. No

ADDITIONAL INFORMATION

- The same operative site usually (but not exclusively) implies there was a need to re-open the previous incision.
- Element Value "1: Yes" is reported whether the initial intervention was related to the injuries (e.g., anatomic leak after laparotomy, hardware failure/infection after ORIF of fractures) OR if there is a return to the operating room for an unplanned intervention related to a secondary procedure (e.g., return to the OR for bleeding after tracheostomy).
- Element Value "2: No" is reported if there is intent to return to the operating room for a two-stage approach.

DATA SOURCE HIERARCHY GUIDE

- Operative Report
- Physician Notes/Flow Sheet
- Progress Notes
- Nursing Notes/Flow Sheet
- Discharge Summary

UNPLANNED VISIT TO THE OPERATING ROOM

DESCRIPTION
Patients with an unplanned operative procedure or patients returned to the operating room after initial operative management of a related previous procedure.

EXCLUDE:

- Non-urgent tracheostomy and percutaneous endoscopic gastrostomy.
- Pre-planned, staged and/or procedures for incidental findings.
- Operative management related to a procedure that was initially performed prior to arrival at your hospital.

ELEMENT VALUES

1. Yes 2. No

ADDITIONAL INFORMATION

- Must have occurred after initial operative management.

A Prepared and Safe Hawaii Starts with Trauma and Emergency Medical Services (EMS) Modernization

Venous Thromboembolism Prophylaxis Type

VENOUS THROMBOEMBOLISM PROPHYLAXIS TYPE

REPORTING CRITERION: Report on all patients.

ELEMENT INTENT
VTE prophylaxis is used to prevent the development of deep venous thrombosis.

DESCRIPTION
Type of first dose of venous thromboembolism prophylaxis administered to patient at your hospital.

EXCLUDE:

- Therapeutic anticoagulants initiated to treat DVT or PE that developed after admission
- Sequential compression devices

ELEMENT VALUES

5. None	10. Other
6. LMWH (Dalteparin, Enoxaparin, etc.)	11. Unfractionated Heparin (UH)
7. Direct Thrombin Inhibitor (Dabigatran, etc.)	12. Aspirin
8. Xa Inhibitor (Rivaroxaban, etc.)	13. Warfarin (Coumadin)

ADDITIONAL INFORMATION

- Element Value "5. None" is reported if the first dose of venous thromboembolism prophylaxis is administered post discharge order date/time.
- Element Value "5. None" is reported if the patient refuses venous thromboembolism prophylaxis.
- For patients who were fully anticoagulated prior to this injury event, report the **Venous Thromboembolism Prophylaxis Type** that was administered after arrival, regardless of if the dosage was therapeutic or prophylactic.
- For therapeutic anticoagulants administered for other reasons, report the **Element Value** aligned with the anticoagulant administered.
- Venous Thromboembolism Prophylaxis Types which were retired greater than 2 years before the current NTDS version are no longer listed under **Element Values** above, which is why there are numbering gaps. Refer to the NTDS Change Log for a full list of retired Venous Thromboembolism Prophylaxis Types.

TQIP MEASURES FOR PROCESSES OF CARE PAGE 236

2026 ADDED to Additional Information and Element Values

2026 REMOVED from Additional Information:

Element Value "10. Other" is reported if "Coumadin" and/or "aspirin" are given as venous thromboembolism prophylaxis.

Very important call out for Hawaii Trauma Centers Configuration
