

Title V Update

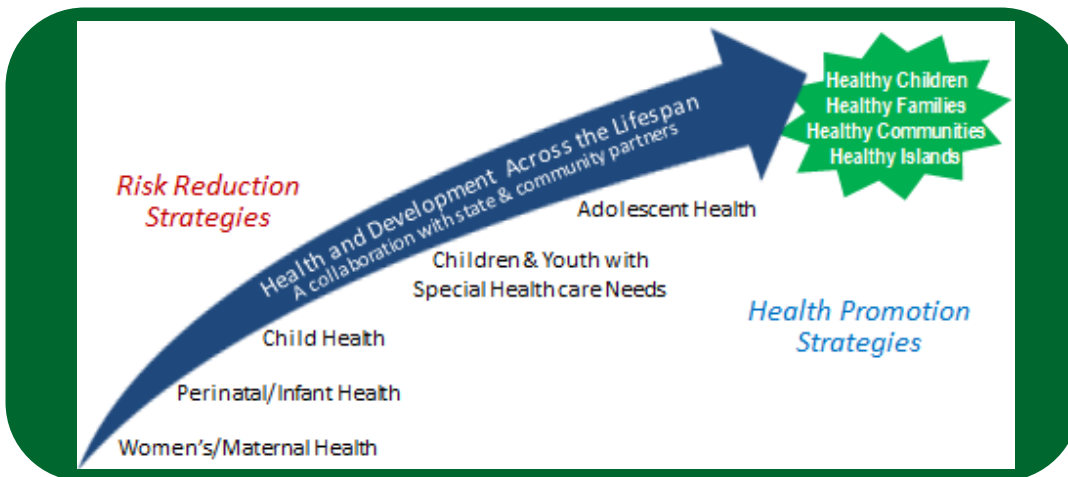

Priorities for Maternal and Child Health

Family Health Services Division
Hawaii State Department of Health
June 24, 2017

The Maternal and Child Health Services Block Grant, Title V of the Social Security Act, is the only federal program devoted to improving the health of all women, children, and families. Title V provides the framework for the Family Health Services Division (FHSD) in the Department of Health.

A Life Course Approach for FHSD Priorities

Early life events have an important role in shaping an individual's lifelong health and well-being.

National and State Priorities for 2015-2020: Measures and Activities

Women's Health

Promote reproductive life planning

Promoting One Key Question ("Would you like to become pregnant in the next year?") to support women's preventive reproductive health needs or preparing for a healthy pregnancy.

Breastfeeding

Reduce infant mortality by promoting breastfeeding

Working with partners to finalize a Statewide Breastfeeding Strategic Plan and implement pilot strategies.

Safe Sleep

Reduce infant mortality by promoting safe sleep practices

Working on hospital policies around infant safe sleep. Worked with partners for successful passage of legislation providing funding for child death reviews to inform safe sleep priorities.

Child Abuse and Neglect

Reduce rate of child abuse & neglect with special attention on age birth-5 years

Created a training approach based on Adverse Childhood Experiences to prevent child abuse/neglect. Hosted trainings on how violence impacts children's brain development and health.

Developmental Screening

Improve % of children 0-5 years screened early & continuously for developmental delay

Developing family-friendly messaging around importance of developmental screening. Coordinating a workgroup to establish a universal screening-referral-utilization system.

Transition to Adult Health Care

Improve % of youth with special health care needs ages 12-21 years who receive services necessary to transition to adult health care

Incorporating transition planning into Children with Special Health Needs Program services. Planning Transition Fairs with partners.

Adolescent Health

Improve healthy development, health, safety, and well-being of adolescents

Developing a teen-centered Adolescent Resource Toolkit and continuing education series for primary care providers. Conducted adolescent focus groups and provider surveys.

Oral Health

Improve oral health of children and pregnant women

Building data surveillance and promoting evidence-based practices. Piloting a school dental sealant project and teledentistry project at two early childhood programs.

Access to Telehealth

Improve access to services through telehealth

Implementing or increasing telehealth activities for genetics, newborn screening, early intervention, WIC, and home visiting.

Family & Consumer Engagement

Improve family and consumer engagement in Title V programs

Completing Family/Consumer Inventory Survey with FHSD staff. Developing strategies to build staff capacity and increase practices for family/consumer engagement.

Partner Engagement

Improve partner engagement in Family Health Services Division

Developing strategies to increase practices for partner engagement (networking → coordination → cooperation → collaboration → integration).

National Outcome Measures: Hawaii Data

Used to assess progress toward desired health outcomes (total 22 outcomes)

77.2%

of pregnant women receive prenatal care in the first trimester

4.5

infant mortality rate per 1,000 live births

86.0%

of children in excellent or very good health

22.7%

of children with special health care needs receiving care in a well-functioning system

19.6%

of children age 1-17 who have decayed teeth or cavities in the past 12 months
