Department of Health and Human Services (DHHS) > Centers for Disease Control and Prevention (CDC) > Maternal Mortality Review		\$ 38,312

Form Notes for Form 2:

None

Field Level Notes for Form 2:

1.	Field Name:	3. STATE MCH FUNDS
	Fiscal Year:	2026
	Column Name:	Application Budgeted
	Field Note: In Act 230, HSL 2024, FHSD received an additional \$5,063,377 state funds which is reflects a significantly higher budgeted amount versus actual FY24 expenditures.	
2.	Field Name:	7. TOTAL STATE MATCH
	Fiscal Year:	2026
	Column Name:	Application Budgeted
	Field Note: The difference of #4 and #6 is explained above.	
3.	Field Name:	8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP SUBTOTAL
	Fiscal Year:	2026
	Column Name:	Application Budgeted
	Field Note: The main difference between FY24 actual expenditures and the FY26 budget is the legislative appropriation for state funds and program income. Federal funds have been fairly stable.	
4.	Field Name:	Federal Allocation, A. Preventive and Primary Care for Children:
	Fiscal Year:	2024
	Column Name:	Annual Report Expended
	Field Note: Actual FY 2024 expenditures reflect prior year obligations liquidated within the reporting period. The FY 2026 budgeted Federal Award was \$96,750 less than the actual FY 2024 expenditures (\$2,249,007 vs. \$2,152,257).	
5.	Field Name:	Federal Allocation, B. Children with Special Health Care Needs:
	Fiscal Year:	2024
	Column Name:	Annual Report Expended
	Field Note: Actual FY 2024 expenditures reflect prior year obligations liquidated within the reporting period. The FY 2026 budgeted Federal Award was \$96,750 less than the actual FY 2024 expenditures.	

6.	Field Name:	Federal Allocation, C. Title V Administrative Costs:
	Fiscal Year:	2024
	Column Name:	Annual Report Expended
	Field Note:	There was no amin budgeted and no admin expenditures through the Title V grant.
7.	Field Name:	6. PROGRAM INCOME
	Fiscal Year:	2024
	Column Name:	Annual Report Expended
	Field Note:	The FY26 Program Income budget reflects the legislative authorized ceiling to spend whereas the FY24 actual expenditures represents actual expenditures across FHSD's five special fund programs. The variance between the two is regularly reported on the Title V application. The ceiling for the Community Health Centers Special Fund regularly exceeds the expenditures and the Newborn Metabolic Screening Special Fund Program is periodically subsidized with state general funds.

Data Alerts: None

Form 3a
Budget and Expenditure Details by Types of Individuals Served
State: Hawaii

I. TYPES OF INDIVIDUALS SERVED

IA. Federal MCH Block Grant	FY 26 Application Budgeted	FY 24 Annual Report Expended
1. Pregnant Women	\$ 89,992	\$ 99,600
2. Infants < 1 year	\$ 89,992	\$ 99,600
3. Children 1 through 21 Years	\$ 701,718	\$ 786,583
4. CSHCN	\$ 1,185,987	\$ 1,325,816
5. All Others	\$ 84,568	\$ 96,372
Federal Total of Individuals Served	\$ 2,152,257	\$ 2,407,971

IB. Non-Federal MCH Block Grant	FY 26 Application Budgeted	FY 24 Annual Report Expended
1. Pregnant Women	\$ 2,446,108	\$ 1,660,281
2. Infants < 1 year	\$ 2,446,108	\$ 1,660,281
3. Children 1 through 21 Years	\$ 19,073,764	\$ 13,111,918
4. CSHCN	\$ 32,236,942	\$ 22,100,630
5. All Others	\$ 2,298,734	\$ 1,606,457
Non-Federal Total of Individuals Served	\$ 58,501,656	\$ 40,139,567
Federal State MCH Block Grant Partnership Total	\$ 60,653,913	\$ 42,547,538

Form Notes for Form 3a:

None

Field Level Notes for Form 3a:

1.	Field Name:	IA. Federal MCH Block Grant, 1. Pregnant Women
	Fiscal Year:	2026
	Column Name:	Application Budgeted

Field Note:

The difference between FY 2024 expended and FY 2026 budgeted can primarily be attributed to the lower budgeted FY 2026 Title V block grant. This affects each category below.

Data Alerts: None

Form 3b
Budget and Expenditure Details by Types of Services
State: Hawaii

II. TYPES OF SERVICES

IIA. Federal MCH Block Grant	FY 26 Application Budgeted	FY 24 Annual Report Expended
1. Direct Services	\$ 0	\$ 0
A. Preventive and Primary Care Services for all Pregnant Women, Mothers, and Infants up to Age One	\$ 0	\$ 0
B. Preventive and Primary Care Services for Children	\$ 0	\$ 0
C. Services for CSHCN	\$ 0	\$ 0
2. Enabling Services	\$ 78,015	\$ 55,013
3. Public Health Services and Systems	\$ 2,074,242	\$ 2,352,958
4. Select the types of Federally-supported "Direct Services", as reported in II.A.1. Provide the total amount of Federal MCH Block Grant funds expended for each type of reported service		
Pharmacy		\$ 0
Physician/Office Services		\$ 0
Hospital Charges (Includes Inpatient and Outpatient Services)		\$ 0
Dental Care (Does Not Include Orthodontic Services)		\$ 0
Durable Medical Equipment and Supplies		\$ 0
Laboratory Services		\$ 0
Direct Services Line 4 Expended Total		\$ 0
Federal Total	\$ 2,152,257	\$ 2,407,971

IIB. Non-Federal MCH Block Grant	FY 26 Application Budgeted	FY 24 Annual Report Expended
1. Direct Services	\$ 38,550,979	\$ 24,432,517
A. Preventive and Primary Care Services for all Pregnant Women, Mothers, and Infants up to Age One	\$ 7,174,025	\$ 3,076,338
B. Preventive and Primary Care Services for Children	\$ 3,587,013	\$ 1,538,169
C. Services for CSHCN	\$ 27,789,941	\$ 19,818,010
2. Enabling Services	\$ 10,972,873	\$ 8,638,877
3. Public Health Services and Systems	\$ 8,977,805	\$ 7,068,172
4. Select the types of Non-Federally-supported "Direct Services", as reported in II.B.1. Provide the total amount of Non-Federal MCH Block Grant funds expended for each type of reported service		
Pharmacy		\$ 54,450
Physician/Office Services		\$ 738,700
Hospital Charges (Includes Inpatient and Outpatient Services)		\$ 0
Dental Care (Does Not Include Orthodontic Services)		\$ 323,100
Durable Medical Equipment and Supplies		\$ 0
Laboratory Services		\$ 0
Other		
Primary and Urgent Care in Hana		\$ 1,729,750
Waianae Coast Emergency Room Services		\$ 1,712,666
Early Intervention Services (POS)		\$ 18,279,842
Molokai General Hospital		\$ 1,594,009
Direct Services Line 4 Expended Total		\$ 24,432,517
Non-Federal Total	\$ 58,501,657	\$ 40,139,566

Form Notes for Form 3b:

None

Field Level Notes for Form 3b:

1.	Field Name:	IIA. Federal MCH Block Grant, 3. Public Health Services and Systems
	Fiscal Year:	2026
	Column Name:	Application Budgeted
	Field Note:	As previously stated, the FY2026 budget was \$96,750 less than the actual FY 2024 expended.
2.	Field Name:	IIB. Non-Federal MCH Block Grant, 1. Direct Services
	Fiscal Year:	2026
	Column Name:	Application Budgeted
	Field Note:	The FY 2026 budgeted amount for State and Program income is consistently higher than the reporting year's expenditures.
3.	Field Name:	IIA. Federal MCH Block Grant, 2. Enabling Services
	Fiscal Year:	2024
	Column Name:	Annual Report Expended
	Field Note:	The FY 2024 Enabling Services actual expenditures was lower because the Audiologist position was vacant.

Form 4
Number and Percentage of Newborns and Others Screened Cases Confirmed and Treated
State: Hawaii

Total Births by Occurrence: 14,930 Data Source Year: 2024

1. Core RUSP Conditions

Program Name	(A) Aggregate Total Number Receiving at Least One Valid Screen	(B) Aggregate Total Number of Out-of-Range Results	(C) Aggregate Total Number Confirmed Cases	(D) Aggregate Total Number Referred for Treatment
Core RUSP Conditions	14,796 (99.1%)	1,449	43	43 (100.0%)

Program Name(s)				
3-Hydroxy-3-Methylglutaric Aciduria	3-Methylcrotonyl-CoA Carboxylase Deficiency	Argininosuccinic Aciduria	Biotinidase Deficiency	Carnitine Uptake Defect/Carnitine Transport Defect
Citrullinemia, Type I	Classic Galactosemia	Classic Phenylketonuria	Congenital Adrenal Hyperplasia	Critical Congenital Heart Disease
Cystic Fibrosis	Glutaric Acidemia Type I	Glycogen Storage Disease Type II (Pompe)	Guanidinoacetate Methyltransferase (GAMT) Deficiency	Hearing Loss
Holocarboxylase Synthase Deficiency	Homocystinuria	Isovaleric Acidemia	Long-Chain L-3 Hydroxyacyl-CoA Dehydrogenase Deficiency	Maple Syrup Urine Disease
Medium-Chain Acyl-CoA Dehydrogenase Deficiency	Methylmalonic Acidemia (Cobalamin Disorders)	Methylmalonic Acidemia (Methylmalonyl-CoA Mutase)	Mucopolysaccharidosis Type I (MPS I)	Mucopolysaccharidosis Type II (MPS II)
Primary Congenital Hypothyroidism	Propionic Acidemia	S, β -Thalassemia	S,C Disease	S,S Disease (Sickle Cell Anemia)
Severe Combined Immunodeficiencies	Spinal Muscular Atrophy Due To Homozygous Deletion Of Exon 7 In SMN1	β -Ketothiolase Deficiency	Trifunctional Protein Deficiency	Tyrosinemia, Type I
Very Long-Chain Acyl-CoA Dehydrogenase Deficiency	X-Linked Adrenoleukodystrophy			

2. Other Newborn Screening Tests

None

3. Screening Programs for Older Children & Women

None

4. Long-Term Follow-Up

Children are monitored for at least a year or longer (up to 21 years old) if needed. Length of time depends on medical condition, health status of child, and social or other issues. This is done by the NBMS staff; CSHNB nurses, nutritionist, or social workers, or public health nurses.

^Represents a subset of all infants and children.

Form Notes for Form 5:

None

Field Level Notes for Form 5a:

1.	Field Name:	Pregnant Women Total Served
	Fiscal Year:	2024
Field Note: Programs that contributed to this count include pregnant women who received Reproductive Health Care and Support Services (provides seamless continuum of care for uninsured and under-insured adolescents, women, and men who seek clinical reproductive health care, perinatal support, information, education, and counseling in reproductive health care. This program replaced Perinatal Support Services and Family Planning since June 2021; 1,476); Safe Sleep (provides safe sleep education and play yards to promote safe sleep practices consistent with the American Academy of Pediatric guidelines to decrease infant mortality related to sleeping; 256). The percentages of primary source of coverage are based on 2023 National Vital Statistics System for Pregnant Women/Infants. Please note the increase in Reproductive Health from 2023 (372) to 2024 (1,476), which is due to expanded service reach from an organizational merger (West Hawaii community Health Center + Bay Clinic) in FY24. This increased the total pregnant woman served from 923 in 2023 to 2,132 in 2024.		
2.	Field Name:	Infants Less Than One YearTotal Served
	Fiscal Year:	2024
Field Note: Programs that contributed to this count of infants < 1 year of age include 2024 Primary Care Contracts (669). Primary Care Contracts are state funded for safely net providers including Federally Qualified Health Centers to provide services for the uninsured/underinsured. The community health center contracts provide comprehensive medical and health care services (perinatal, pediatric, adult primary care) and support services to uninsured and underinsured individuals that are at or below two hundred fifty percent (250%) of the Federal poverty level. Access to primary health services reduces morbidity and mortality by providing timely, appropriate, and less expensive care, and thereby prevent the development and exacerbation of serious health conditions. Additionally, there was no way to differentiate the primary source of coverage for those that were provided services through the underinsured due to lack of access to the data. Another program that contributed to this count include Safe Sleep (provides safe sleep education and play yards to promote safe sleep practices consistent with the American Academy of Pediatric guidelines to decrease infant mortality related to sleeping; 264). Note. The percentages of primary source of coverage are based on 2023 National Vital Statistics System for Pregnant Women/Infants.		
3.	Field Name:	Children 1 through 21 Years of Age
	Fiscal Year:	2024

Field Note:

Programs that contributed to this count include 2024 Primary Care Contracts (2,269). Other programs that contributed to this count include Reproductive Health Care and Support Services (provides seamless continuum of care for uninsured and under-insured adolescents, women, and men who seek clinical reproductive health care, perinatal support, information, education, and counseling in reproductive health care. This program replaced Perinatal Support Services and Family Planning since June 2021; 948); Kauai District Health Office (flu vaccinations and virtual dental home services; 125); and Children with Special Health Care Needs in 3a (10,158). The percentages of primary source of coverage are based on 2023 American Community Survey for Children 1-21.

Please note the increase increase in Reproductive Health from 2023 (640) to 2024 (948) was due to expanded service reach due to an organizational merger (West Hawaii community Health Center + Bay Clinic) in FY24.

4.	Field Name:	Children with Special Health Care Needs 0 through 21 Years of Age
----	--------------------	--

Fiscal Year:	2024
---------------------	-------------

Field Note:

2024 data included Children with Special Health Needs Section (provides care coordination and other services for children age 0-21 with chronic medical conditions; 540); Newborn Metabolic Screening Program follow-up (detect rare disorders that can cause serious health and development problems; 1,449); Newborn Hearing Screening Program follow-up (identify hearing loss early so children can receive timely early intervention services; 580); Early Intervention Referral Line (Number of calls received; 3,942); Early Intervention Section (provides care coordination, family training, etc for children age 0-3 with developmental delay or at biological risk; 3,310); Hi'iilei Developmental Screening Program (provides developmental screening via mail or online, and activities to help in children's development; 38); Hawaii Childhood Lead Poisoning Prevention Program (HI-CLPPP; aims to reduce children's exposure to lead by strengthening blood lead testing; 299 families). The distribution of source of coverage is based on National Survey of Children's Health – CSHCN, 2022-2023

Note that there is no reporting from the genetics program since the retirement of the genetic staff. Also note that the decline in the number served by CSHCN from 2023 (13,472) to 2024 (10,296) was due to the number of families (299) reported by HI-CLPPP in 2024 instead of the number of individuals (3,372) reported in 2023.

5.	Field Name:	Others
----	--------------------	---------------

Fiscal Year:	2024
---------------------	-------------

Field Note:

Programs that contributed to this count of others include 2024 Primary Care Contracts (11,408). The count also included Reproductive Health Care and Support Services (provides seamless continuum of care for uninsured and under-insured adolescents, women, and men who seek clinical reproductive health care, perinatal support, information, education, and counseling in reproductive health care. This program replaced Perinatal Support Services and Family Planning since June 2021; 7,331); Parent Line (provides comprehensive parenting education, training, and support through a telephone warmline, a website, and printed and electronic educational resources; number of calls received on the State MCH Hotline=673), and Kauai District Health Office (CHW contractor provided referral and one-to-one assessment services; 285). The percentages of primary source of coverage are based on 2023 American Community Survey for adults 22+.

Please note the increase in total served from 2023 (16,127) to 2024 (19,697) was due to the increase in the number served in Reproductive Health from 2023 (2,125) to 2024 (7,331). This increase reflects expanded service reach due to an organizational merger (West Hawaii community Health Center + Bay Clinic) in FY24. Also please note the decline in number served in Primary Care Contracts from 2023 (13,027) to 2024 (11,408).

Field Level Notes for Form 5b:

1.	Field Name:	Pregnant Women Total % Served
	Fiscal Year:	2024
Field Note: Overall estimate: Based on the largest reach from the percentage of pregnant women who received safe sleep education messages at the hospital (99%). The second largest reach was from the Maternal Signs and Symptoms Media Campaign, which reached 90.7% of women 18-44 years old. Individual program report: Other programs that served pregnant women included 5a number (1,732), number of brochures distributed to pregnant women by Reproductive Health Care and Support Services (3,100; may be duplicated as each woman may receive more than one brochure), women who receive mailout resources from PRAMS program (January-October, 2024; 2,000), Reproductive Health (reproductive health conferences and community baby showers; 972), WIC Program (state provided administrative support, 5,738), and Home Visiting Program (a family support program for pregnant women, mothers, and children under the age of 5 providing regular visits to families to encourage maternal and child health; prevention of child abuse and neglect; promotion of child development and school readiness; promotion of positive parenting practices; and information/referrals to healthcare and community resources; 37), Kauai District Health Office (outreach activities and education for pregnant women, 420).		
2.	Field Name:	Pregnant Women Denominator
	Fiscal Year:	2024
Field Note: Based on 2024 number of live births from Vital Statistics.		
3.	Field Name:	Infants Less Than One Year Total % Served
	Fiscal Year:	2024
Field Note: Overall estimation: The largest reach was estimated by the 2024 percentage of newborn metabolic screening (99.1%). The second largest reach was the Safe Sleep Media Campaign, which targeted parents/caregivers of children under 1, and reached 88.9% of households with children. Individual program report: Other programs that served infants included 5a number (933), Kauai District Health Office (outreach activities, 2200), Home Visiting (a family support program for pregnant women, mothers, and children under the age of 5 providing regular visits to families to encourage maternal and child health; prevention of child abuse and neglect; promotion of child development and school readiness; promotion of positive parenting practices; and information/referrals to healthcare and community resources; 112), Reproductive Health (community baby shower, 127), and WIC (state provided administrative support, 11,547). Please note the increase in the number served by Kauai District Health Office from 2023 (400) to 2024 (2,200) was due to increased reach from Safe Sleep and WIC services advertisements developed in May 2024 and played on Kauai radio.		

4.	Field Name:	Infants Less Than One Year Denominator
	Fiscal Year:	2024
	Field Note:	Based on 2024 number of live births from Vital Statistics.
5.	Field Name:	Children 1 through 21 Years of Age Total % Served
	Fiscal Year:	2024
	Field Note:	<p>Programs that contributed to the numerator included 5a number (13,500), participation in WIC Program (state provided administrative support, 17,897), Adolescent Health (advances adolescent-centered, capacity building through workforce development training for teen-serving staff, and by engaging teen and young adult voices to inform the DOH's efforts to support Hawaii's families and positive youth development programs, 549); Kauai District Health Office (outreach activities; 10,875), Home Visiting (a family support program by providing regular visits to families to promote positive parenting practices; 420), Sexual Violence Prevention Program (provides primary prevention services through statewide partnerships to prevent all forms of sexual violence and promote healthy, respectful relationships; 11,702), and Children with Special Health Care Needs (25,023). The denominator was based on the reference data provided.</p> <p>Note that the decline in number served for Adolescent Health from 2023 (3,952) to 2024 (549) was due to the outreach activity, Drug Free Hawaii Weed and Seed which served 3,688 youth last year. This activity did not occur in 2024. Note the increase in number served for Kauai District Health Office from 2023 (4,500) to 2024 (10,875) due to a video developed from from "Healthy Me Healthy We video and flyer entry competition" which was played in Kauai high school and paid YouTube advertisements which resulted in the increased reach. Also note the decline in number in Sexual Violence from 2023 (45,055) to 2024 (11,702) was due to the inability of University of Hawaii to provide sexual violence prevention presentations and trainings to the students on their campuses in 2024.</p>
6.	Field Name:	Children with Special Health Care Needs 0 through 21 Years of Age Total % Served
	Fiscal Year:	2024

Field Note:**Overall Estimation:**

Based on the largest reach by Children with Special Health Needs Section outreach activities which included social media (25,023). The second largest reach was from the distribution of materials by the Newborn Metabolic Screening Program to an estimated of 14,859 new mothers.

Individual Program Report:

Other programs included outreach activities (outreach, trainings, brochure distribution, etc.) conducted by Early Intervention Section (6,000); other outreach activities conducted by Children with Special Health Needs Section including transition (965), community outreach (4,348), advisory groups (134), policy (171), and materials (11,413). The Hawaii Childhood Lead Poisoning Prevention Program (HI-CLPPP) distributed about 14,340 educational materials, held 3 coalition meetings (60), had outreach contacts with families and health care providers (2,176), and had 4,385 unique website views. The Newborn Hearing Screening Program distributed about 15,560 educational materials; conducted training and workgroups (20), and had 1,006 website hits by providers and the public.

The denominator was based on the reference data provided for CSHCN.

Please note the decline in percentage of CSHCN served from 2023 (77.1%) to 2024 (35.1%) was due to the decline in the largest reach by social media from 2023 (38,909) to 2024 (25,023); and also due to the increase in denominator in total CSHCN population from 2023 (50,459) to 2024 (71,295) from an expanded definition of CSHCN.

7.	Field Name:	Others Total % Served
----	--------------------	------------------------------

Fiscal Year:	2024
---------------------	-------------

Field Note:**Overall Estimation:**

Based on the largest reach by the Safe Sleep Paid Media Campaign, in which broadcast TV reached 97.3% of adults 18-54. The other largest reach was the Early Intervention Services Paid Media Campaign, in which broadcast TV reached 97.2% adults 18-54 years old.

Individual Program Report:

Other programs included 5a number (19,697), Safe Sleep (outreach activities; 1,442), Sexual Violence Prevention Program (meetings and trainings; 3,445), Adolescent Health (training and education programs; 301); WIC services for postpartum women (5,736); Home Visiting (452), Hawaii Public Health Training Hui (education to promote health and well-being; 956), Parent Leadership Training Institute (PLTI) Hawaii (increases the number and skill level of parents and community leaders; 14), Project ECHO Hawaii Pediatric Series (a guided-practice model that reduces health disparities in underserved and rural areas through the use of a hub-and-spoke approach where expert teams lead virtual clinics; 94), Hawaii Medicare Rural Hospital Flexibility Program (Clinical Quality and Financial Improvement Training to critical access hospital staff; 74), Kauai District Health Office (outreach activities; 6,530), Oral Health (meetings, 108), Domestic Violence Prevention Program (workforce trainings and outreach activities, 4,110),

Note the decrease in number for Adolescent Health from 2023 (9,941) to 2024 (301) was due to the outreach activity Drug Free Hawaii Weed and Seed that took place in 2023 but not in 2024. Also note the increase in number served by Kauai District Health Office from 2023 (4500) to 2024 (6,530) might be due to increased materials distributed at the Kauai Ohana Resource Kiosk in Kauai shopping mall.

Data Alerts:

1.	Reported percentage for Others on Form 5b is greater than or equal to 50%. The Others denominator includes both women and men ages 22 and over. Please double check and justify with a field note.
----	--

Form 6
Deliveries and Infants Served by Title V and Entitled to Benefits Under Title XIX

State: Hawaii

Annual Report Year 2024

I. Unduplicated Count by Race/Ethnicity

	(A) Total	(B) Non- Hispanic White	(C) Non- Hispanic Black or African American	(D) Hispanic	(E) Non- Hispanic American Indian or Native Alaskan	(F) Non- Hispanic Asian	(G) Non- Hispanic Native Hawaiian or Other Pacific Islander	(H) Non- Hispanic Multiple Race	(I) Other & Unknown
1. Total Deliveries in State	14,673	3,740	287	2,649	15	3,479	1,404	2,892	207
Title V Served	14,540	3,706	284	2,625	15	3,448	1,391	2,866	205
Eligible for Title XIX	11,702	1,326	174	540	292	4,200	2,524	0	2,646
2. Total Infants in State	16,244	2,408	252	2,753	29	3,497	2,051	5,254	0
Title V Served	16,099	2,386	250	2,728	29	3,466	2,033	5,207	0
Eligible for Title XIX	8,709	88	31	117	25	379	164	0	7,905

Form Notes for Form 6:

None

Field Level Notes for Form 6:

1.	Field Name:	1. Total Deliveries in State
	Fiscal Year:	2024
	Column Name:	Total
	Field Note: Information obtained from maternal race as reported in 2024 vital statistics birth certificate data. The number of more than single birth (twin, triplet) is subtracted from the number of births.	
2.	Field Name:	1. Title V Served
	Fiscal Year:	2024
	Column Name:	Total
	Field Note: Used overall estimate of newborn metabolic screening percentage (99.1%) in 2024 applied to overall total and each race group.	
3.	Field Name:	1. Eligible for Title XIX
	Fiscal Year:	2024
	Column Name:	Total
	Field Note: Data Source: Data from Hawaii Medicaid program in 2024 and reflects unduplicated clients served. Note. Collection of race differs between that reported for Title V served and those reported for Title XIX so are not directly comparable.	
4.	Field Name:	2. Total Infants in State
	Fiscal Year:	2024
	Column Name:	Total
	Field Note: Total number of infants based on 2020 CDC, NCHS, Bridged-Race population estimates from https://wonder.cdc.gov . No further updates beyond 2020 as CDC ceased releasing bridged-race population estimates after 2020. The Bridged-Race population groups reported are different from that requested in Title V. To determine race specific estimates for Title V, the distribution of race based on children under 5 years based on 2020 Census was applied to total infants in state as more current data was not available for requested race groups. Additionally, American Community Survey does not report out single year age estimates. Note: Collection of race varies from that reported from vital statistics so not directly comparable.	
5.	Field Name:	2. Title V Served
	Fiscal Year:	2024

	Column Name:	Total
	Field Note:	Used overall estimate of newborn metabolic screening percentage (99.1%) in 2024 applied to overall total and each race group.
6.	Field Name:	2. Eligible for Title XIX
	Fiscal Year:	2024
	Column Name:	Total
	Field Note:	Data Source: Data from Hawaii Medicaid program in 2024 and reflects unduplicated clients served. Note. Collection of race differs between that reported for Title V served and those reported for Title XIX so are not directly comparable. For example, the number of clients of more than one race was not provided by the Hawaii Medicaid Program. Note that the number of infants exceeds the number of pregnant women. This is because infants are defined as all children <1 year old in 2024, which will include most or all births over a period of two years.

Form 7
Title V Program Workforce
State: Hawaii

Form 7 Entry Page

A. Title V Program Workforce FTEs	
Title V Funded Positions	
1. Total Number of FTEs	134.30
1a. Total Number of FTEs (State Level)	134.30
1b. Total Number of FTEs (Local Level)	0
2. Total Number of MCH Epidemiology FTEs (subset of A. 1)	1
3. Total Number of FTEs eliminated in the past 12 months	0.10
4. Total Number of Current Vacant FTEs	33
4a. Total Number of Vacant MCH Epidemiology FTEs	1
5. Total Number of FTEs onboarded in the past 12 months	0
B. Training Needs (Optional)	
1	Budget and financial management
2	Policy engagement
3	Systems and strategic thinking
4	Change Management

Form Notes for Form 7:

None

Field Level Notes for Form 7:

Form 7 Field Level Notes Table

1.	Field Name:	Total Number of FTEs (State Level)
Field Note: Total number of Title V Block grant + special fund + general fund + interdepartmental transfer funded Title V positions as defined by Form 7.		
2.	Field Name:	Total Number of MCH Epidemiology FTEs
Field Note: FHSD only has 1.00 FTE Epi position.		
3.	Field Name:	Total Number of FTEs eliminated in the past 12 months
Field Note: 0.1 FTE is the net change between FY 2025 and FY 2026 Title V budgeted positions.		
4.	Field Name:	Total Number of Current Vacant FTEs
Field Note: As reported to the Hawaii legislature April 2025.		
5.	Field Name:	Total Number of FTEs onboarded in the past 12 months
Field Note: FHSD had 24.5 total Title V funded vacant positions as defined by Form 7 in FY 2025. In FY 2026 FHSD has 33.0 Title V funded vacant position. FHSD onboarded zero positions.		
6.	Field Name:	Training Needs Line 1
Field Note: The four training needs are based on the 2024 Public Health Workforce, Interests & Needs (PHWINS) survey.		

Form 8
State MCH and CSHCN Directors Contact Information
State: Hawaii

1. Title V Maternal and Child Health (MCH) Director	
Name	Matthew J. Shim, PhD, MPH
Title	Chief, Family Health Services Division
Address 1	1250 Punchbowl Street, Room 216
Address 2	
City/State/Zip	Honolulu / HI / 96813
Telephone	(808) 586-4122
Extension	
Email	matthew.shim@doh.hawaii.gov

2. Title V Children with Special Health Care Needs (CSHCN) Director	
Name	Ruben Frescas, MD, MPH
Title	Chief, Children with Special Health Needs Branch
Address 1	741 Sunset Avenue
Address 2	
City/State/Zip	Honolulu / HI / 96816
Telephone	(808) 733-9058
Extension	
Email	ruben.frescas@doh.hawaii.gov

3. State Family Leader (Optional)

Name	Leolinda Iokepa
Title	Project Director, Hilopa'a Family to Family Inc
Address 1	2604 Pauoa Road
Address 2	
City/State/Zip	Honolulu / HI / 96813
Telephone	(808) 282-6348
Extension	
Email	leo@hilopaa.org

Form 9
List of Priority Needs – Needs Assessment Year

State: Hawaii

Application Year 2026

No.	Priority Need	Priority Need Type (New, Revised or Continued Priority Need for this five-year reporting period)
1.	Improve postpartum care by promoting timely, comprehensive follow-ups that address physical, mental, and social needs, with a focus on expanding access to responsive services.	Revised
2.	Increase safe infant sleep practices by partnering with varied communities to provide education, resources, and outreach that reduce the risk of sleep-related infant deaths.	Revised
3.	Increase the percentage of children ages 0–5 who receive timely and continuous developmental screening by enhancing outreach, provider training, and coordination across early childhood systems	Revised
4.	Support food sufficiency for infants and young children by improving access to WIC services, including outreach, enrollment, and nutrition education.	Revised
5.	Increase the number of children with and without special health care needs who have a Medical Home by focusing on improving care coordination	Revised
6.	Reduce adolescent bullying by promoting prevention programs, creating safe and inclusive school environments, and supporting youth, families, and other adults.	New
7.	Increase access to culturally responsive, trauma-informed mental health services and supports for women, children, and families	New

Form 10
State Performance Measure (SPM) Detail Sheets

State: Hawaii

SPM 1 - The number of direct and enabling health providers receiving training and support services on maternal and child mental health care in underserved communities/counties statewide across all five population domains.

Population Domain(s) – Cross-Cutting/Systems Building

Measure Status:	Active								
Goal:	Increase the number of direct and enabling health providers in underserved communities and counties statewide who receive training and support in maternal and child mental health care across all five population domains.								
Definition:	<table border="1"> <tr> <td>Unit Type:</td><td>Count</td></tr> <tr> <td>Unit Number:</td><td>1,000</td></tr> <tr> <td>Numerator:</td><td>Number direct and enabling providers trained through Hawaii Title V programs.</td></tr> <tr> <td>Denominator:</td><td></td></tr> </table>	Unit Type:	Count	Unit Number:	1,000	Numerator:	Number direct and enabling providers trained through Hawaii Title V programs.	Denominator:	
Unit Type:	Count								
Unit Number:	1,000								
Numerator:	Number direct and enabling providers trained through Hawaii Title V programs.								
Denominator:									
Healthy People 2030 Objective:	<p>Increase the proportion of children with mental health problems who get treatment (MHMD-03). (Baseline: 70.7% Target: 79.3%)</p> <p>Increase the proportion of children and adolescents who get appropriate treatment for behavior problems (EMC-D05). (Developmental objective, does not have baseline and target data)</p> <p>Increase the proportion of women who get screened for postpartum depression (MICH-D01) (Developmental objective, does not have baseline and target data)</p>								
Data Sources and Data Issues:	Hawaii Department of Health Family Health Services program including Hawaii Pediatric Mental Health Care Access grant, Early Intervention Services, Project LAUNCH, MCH Branch programs & Early Childhood Comprehensive Systems grant								
Significance:	<p>Mental health is a critical issue for the Maternal and Child Health (MCH) population because it profoundly influences the health, development, and well-being of women, children, and families. Mental health conditions such as perinatal depression, anxiety, and trauma are highly prevalent among women of reproductive age, yet they often go undiagnosed and untreated due to stigma, inadequate screening, and limited access to culturally responsive care. The impact of untreated mental health conditions extends beyond the individual, affecting parent-child bonding, child development, and long-term health outcomes. Children exposed to chronic stress or parental mental health challenges are at greater risk for developmental delays, behavioral problems, and future mental health issues. These challenges are compounded by disparities. Families in rural communities and those with low incomes face greater barriers to care and are more likely to experience unaddressed mental health needs.</p> <p>Moreover, mental health is closely tied to physical health. During pregnancy, poor mental health increases the risk of complications such as preterm birth and low birth weight, while also limiting a mother's ability to engage in preventive care and self-care. For children with poor mental health and increased stress, they are at increased risk of developing chronic health conditions in adolescence and adulthood.</p> <p>Despite this, many MCH-serving systems lack adequate behavioral health integration or workforce capacity to meet these needs. Strengthening mental health support within MCH programs is not only vital to improving outcomes today—it is also a powerful prevention strategy that can interrupt cycles of trauma, promote resilience, and foster healthier families across generations.</p>								

Form 10
State Performance Measure (SPM) Detail Sheets (2021-2025 Needs Assessment Cycle)

2021-2025: SPM 1 - Rate of confirmed child abuse and neglect reports per 1,000 for children ages 0 to 5 years.
Population Domain(s) – Child Health

Measure Status:	Active	
Goal:	Reduce the rate of child abuse and neglect with special attention on ages 0-5 years.	
Definition:	Unit Type:	Rate
	Unit Number:	1,000
	Numerator:	Number of confirmed Child Protective Services reports of abuse and neglect for children aged 0 to 5 years
	Denominator:	Number of children aged 0 to 5 years in the state based on decennial census (2010 data reported 104,333 children)
Healthy People 2030 Objective:	<p>Related to: IPV-37 Reduce child maltreatment deaths to 2.1 deaths per 100,000 children under age 18 years. Baseline: 2.3 child maltreatment deaths per 100,000 children under age 18 years occurred in 2008.</p> <p>IPV-38: Reduce nonfatal child maltreatment to 8.5 maltreatment victims per 1,000 children under age 18 years. Baseline: 9.4 victims of nonfatal child maltreatment per 1,000 children under age 18 years were reported in 2008.</p>	
Data Sources and Data Issues:	Hawaii Department of Human Services, Management Services Office. Child Abuse and Neglect Annual reports	
Significance:	Child abuse and neglect has pervasive effects over a person's lifetime. Abuse has negative effects not only on physical health but also on mental, emotional and social health of individuals.	

2021-2025: SPM 2 - Reduce the rate of food insecurity for pregnant women and infants through the Special Supplemental Nutrition Program for Women, Infants and Children (WIC) services
Population Domain(s) – Perinatal/Infant Health

Measure Status:	Active									
Goal:	Reduce the rate food insecurity for pregnant women and infants through the Special Supplemental Nutrition Program for Women, Infants and Children (WIC) services									
Definition:	<table><tr><td>Unit Type:</td><td>Count</td></tr><tr><td>Unit Number:</td><td>50,000</td></tr><tr><td>Numerator:</td><td>Number of WIC enrollments</td></tr><tr><td>Denominator:</td><td></td></tr></table>		Unit Type:	Count	Unit Number:	50,000	Numerator:	Number of WIC enrollments	Denominator:	
Unit Type:	Count									
Unit Number:	50,000									
Numerator:	Number of WIC enrollments									
Denominator:										
Data Sources and Data Issues:	Hawaii WIC Services									
Significance:	<p>It has long been recognized that children living in poverty lag behind other children on a wide range of indicators of physical, mental, academic, and economic well-being. They are more likely to have health, behavioral, learning, and emotional problems. This is especially true of children whose families experience deep poverty, those who are poor during early childhood, and those who are poor for a long time. Children living in poverty are also more likely to be food insecure, and food insecurity in households with children is associated with inadequate intake of several important nutrients, deficits in cognitive development, behavioral problems, and poor health.</p> <p>Over more than four decades, researchers have investigated WIC’s effects on key measures of child health such as birth weight, infant mortality, diet quality and nutrient intake, initiation and duration of breastfeeding, cognitive development and learning, immunization, use of health services, and childhood anemia. Taken as a whole, the evidence demonstrates WIC’s effectiveness.</p>									

2021-2025: SPM 3 - The number of pediatric and/or behavioral health providers receiving training and support services on pediatric mental health care in underserved communities/counties statewide.

Population Domain(s) – Cross-Cutting/Systems Building

Measure Status:	Active	
Goal:	Address health equity and disparities by addressing children's mental health and services in rural and under-served communities.	
Definition:	Unit Type:	Count
	Unit Number:	300
	Numerator:	Number pediatric/mental health providers trained on Pediatric Mental Health Care.
	Denominator:	
Data Sources and Data Issues:	Hawaii Pediatric Mental Health Care Access grant.	
Significance:	The COVID pandemic highlighted the mental health needs of children and primary care and mental health provider shortages. The MCH Evidence Center has ample evidence to show telehealth services can improve access to healthcare to underserved MCH populations.	

Form 10
State Outcome Measure (SOM) Detail Sheets
State: Hawaii

No State Outcome Measures were created by the State.

Form 10
Evidence-Based or –Informed Strategy Measures (ESM) Detail Sheets
State: Hawaii

ESM PPV.1 - Completion of environmental scan of organizations and partners to facilitate determination of Title V's role in improving postpartum care across the state.

NPM – A) Percent of women who attended a postpartum checkup within 12 weeks after giving birth B) Percent of women who attended a postpartum checkup and received recommended care components - PPV

Measure Status:	Active								
Goal:	To strengthen and clarify Title V's role in improving postpartum care by identifying existing services, unmet needs, and opportunities for coordination across programs and partners.								
Definition:	<table border="1"> <tr> <td>Unit Type:</td><td>Text</td></tr> <tr> <td>Unit Number:</td><td>Yes/No</td></tr> <tr> <td>Numerator:</td><td>Yes/No</td></tr> <tr> <td>Denominator:</td><td></td></tr> </table>	Unit Type:	Text	Unit Number:	Yes/No	Numerator:	Yes/No	Denominator:	
Unit Type:	Text								
Unit Number:	Yes/No								
Numerator:	Yes/No								
Denominator:									
Data Sources and Data Issues:	The Women's Reproductive Health Section of the Maternal and Child Health Branch, Hawaii Department of Health								
Evidence-based/informed strategy:	<p>This strategy involves conducting an environmental scan to identify key partners, referral pathways, and current initiatives that support postpartum and well-woman care in Hawaii. The scan will help Title V assess how existing systems engage in outreach, referral, and delivery of postpartum visits, and where there are opportunities to strengthen coordination or fill gaps. This aligns with the MCHbest strategy "Engagement of Other MCH Programs to Disseminate Information and Make Referrals for Well-Women Visit." Environmental scanning is a recognized evidence-informed approach for understanding the organizational and policy landscape, particularly in complex systems of care. This strategy is essential for identifying the roles of various MCH stakeholders, improving service integration, and fostering cross-sector collaboration to improve access to preventive visits in the postpartum period. Evidence from the MCH Evidence Center and health systems literature demonstrates that effective engagement with MCH partners and care coordination efforts can significantly improve access to postpartum and preventive services, especially when programs align referral systems and information dissemination strategies (Kalavani et al., 2024; MCHbest database).</p> <p>Kalavani K, Mehrolhassani MH, Pedram A, Vosoogh-Moghaddam A, Dehnavieh R. Environmental Scanning Model in Health System and Implementation Steps: A Scoping Review. Iran J Public Health. 2024 Jun;53(6):1261-1271. PMID: 39430162; PMCID: PMC11488556.</p>								
Significance:	This measure tracks whether the environmental scan has been completed (yes/no). A well-executed scan will systematically identify existing postpartum and well-woman care efforts across Hawaii, including referral networks, community-based organizations, and clinical providers. By assessing who is doing what and where, the scan helps Title V determine how it can uniquely contribute to expanding access to postpartum visits. Completion of the scan is a meaningful indicator of progress because it lays the groundwork for coordinated outreach, improved referral pathways, and ultimately greater utilization of preventive visits among postpartum women. Without this initial mapping, efforts to expand access may be fragmented or duplicative.								

ESM SS.1 - The number of translated Safe Sleep Guides for Parents that were provided to the agencies, organizations and individuals, on request.

NPM – A) Percent of infants placed to sleep on their backs B) Percent of infants placed to sleep on a separate approved sleep surface C) Percent of infants placed to sleep without soft objects or loose bedding D) Percent of infants room-sharing with an adult during sleep - SS

Measure Status:	Active									
Goal:	Expand outreach to limited English proficiency families and care givers through distribution of translated safe sleep educational materials.									
Definition:	<table><tr><td>Unit Type:</td><td>Count</td></tr><tr><td>Unit Number:</td><td>20,000</td></tr><tr><td>Numerator:</td><td>Number of translated Safe Sleep Guides</td></tr><tr><td>Denominator:</td><td></td></tr></table>		Unit Type:	Count	Unit Number:	20,000	Numerator:	Number of translated Safe Sleep Guides	Denominator:	
Unit Type:	Count									
Unit Number:	20,000									
Numerator:	Number of translated Safe Sleep Guides									
Denominator:										
Data Sources and Data Issues:	Data will be collected by Hawaii Title V Safe Sleep program as reported by the Parent Line program									
Evidence-based/informed strategy:	A review of the AMCHP and MCH Evidence Center research indicates that targeting caregivers with safe sleep education is supported by moderate evidence of effectiveness. National campaigns have focused on vulnerable subgroups as having the most significant impact on advancing health equity. In 2020, a Hawaii strategy was added specifically to address disparities in safe sleep behaviors, by targeting key ethnic groups and developing multilingual educational outreach for limited English-speaking families. The strategy was also supported by input from local service providers who workwith underserved, multicultural families.									
Significance:	The American Academy of Pediatrics (AAP) recommends a safe sleep environment to reduce the risk of all sleep-related infant deaths. AAP recommendations for a safe sleep environment include supine positioning, the use of a firm sleep surface, room-sharing without bed-sharing, and the avoidance of soft bedding and overheating. Additional recommendations for SUID reduction include the avoidance of exposure to smoke, alcohol, and illicit drugs; breastfeeding; routine immunization; and use of a pacifier. The AAP recommends education should include all who care for infants, including parents, child care providers, grandparents, foster parents, and babysitters, and should include strategies for overcoming barriers to behavior change. Research on health education and SUID outreach has found that response to safe sleep messages differed among different communities and racial/ethnic groups, which may help explain some of the lingering differences in SUID rates. Therefore, campaigns should have a special focus on getting safe sleep messages to parents and caregivers in diverse communities because of the higher incidence of SUID and other sleep-related infant deaths in these groups.									

ESM DS.1 - The number of children screened through the Hi'iilei Developmental Screening Program using a standardized screening tool.

NPM – Percent of children, ages 9 through 35 months, who received a developmental screening using a parent-completed screening tool in the past year - DS

Measure Status:	Active									
Goal:	Build the internal capacity of the Children with Special Health Needs Branch to increase screening and referral efforts of young children through the Hi'ilei Developmental Screening Program.									
Definition:	<table><tr><td>Unit Type:</td><td>Count</td></tr><tr><td>Unit Number:</td><td>300</td></tr><tr><td>Numerator:</td><td>Number of children receiving developmental screens from the CSHN Branch H'ilei program</td></tr><tr><td>Denominator:</td><td></td></tr></table>		Unit Type:	Count	Unit Number:	300	Numerator:	Number of children receiving developmental screens from the CSHN Branch H'ilei program	Denominator:	
Unit Type:	Count									
Unit Number:	300									
Numerator:	Number of children receiving developmental screens from the CSHN Branch H'ilei program									
Denominator:										
Data Sources and Data Issues:	Program Data. A count of children receiving development screening from the Title V CSHN Branch H'ilei program.									
Evidence-based/informed strategy:	Promoting DOH Hi'ilei Developmental Screening Program to parents to complete online ASQ screenings will help raise community awareness of available resources to support parents. Studies have shown that ASQ is a reliable tool for developmental screening and have demonstrated high sensitivity and specificity in identifying children with delays when compared to professional assessments.									
Significance:	The early identification of developmental delays and disabilities is critical to provider referrals to services that can promote health and educational success. When children are not screened during medical visits, other accessible options are needed. In partnership with pediatric medical and early childhood service providers, Hawaii's Title V CSHN Branch is working to expand developmental screening options for families with young children. The measures helps track the expansion of Hawaii's Title V CSHN Branch efforts to assure developmental screening services are readily and easily accessible to families and improve the service delivery and systems development for developmental screening.									

ESM FS.1 - The number of infants and children birth to 5 years of age enrolled in the WIC program.

NPM – Percent of children, ages 0 through 11, whose households were food sufficient in the past year - FS

Measure Status:	Active								
Goal:	Reduce the rate food insecurity for pregnant women and infants through the Special Supplemental Nutrition Program for Women, Infants and Children (WIC) services.								
Definition:	<table border="1"> <tr> <td>Unit Type:</td><td>Count</td></tr> <tr> <td>Unit Number:</td><td>60,000</td></tr> <tr> <td>Numerator:</td><td>Number of infants/children birth to 5 years of age enrolled in the WIC program</td></tr> <tr> <td>Denominator:</td><td></td></tr> </table>	Unit Type:	Count	Unit Number:	60,000	Numerator:	Number of infants/children birth to 5 years of age enrolled in the WIC program	Denominator:	
Unit Type:	Count								
Unit Number:	60,000								
Numerator:	Number of infants/children birth to 5 years of age enrolled in the WIC program								
Denominator:									
Data Sources and Data Issues:	Hawaii WIC Services Program								
Evidence-based/informed strategy:	<p>This strategy measure tracks the number of children enrolled in the Hawaii Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) program to improve the rate of food sufficiency among low-income children. Enrollment in WIC is a well-documented, evidence-based strategy to improve food sufficiency and early childhood health. This strategy focuses on increasing the number of infants and children birth to age 5 who are enrolled in WIC, which provides access to nutritious food, nutrition education, and referrals to health and social services. Decades of research have demonstrated WIC's effectiveness in improving a wide range of health and developmental outcomes. Participation in WIC has been linked to higher birth weights, reduced infant mortality, initiation and sustained duration of breastfeeding, improved immunization rates, better diet quality and nutrient intake, reductions in childhood anemia, and enhanced cognitive development and learning. This strategy aligns with national best practices, as outlined in research synthesized by the Center on Budget & Policy Priorities. Increasing enrollment in WIC addresses food insufficiency directly while also functioning as a gateway to broader social and health supports. In doing so, this strategy advances progress on the NPM by supporting optimal growth and development in early childhood and reducing disparities linked to food insecurity and poverty.</p> <p>https://www.cbpp.org/research/food-assistance/wic-works-addressing-the-nutrition-and-health-needs-of-low-income-families</p> <p>WIC will work through expansion of partnerships with community programs to improve WIC enrollment and utilization. WIC will also collect qualitative data and analysis to further identify key barriers to WIC benefit utilization.</p>								
Significance:	<p>This measure tracks the number of infants and children from birth to age 5 enrolled in WIC. A well-executed implementation of this strategy would result in increased or sustained enrollment over time, especially among underserved populations. This measure is significant because it reflects the direct impact of efforts to improve food sufficiency through WIC enrollment. By capturing the number of children receiving WIC services, the measure indicates access to not only nutritious food, but also preventive health care, nutrition education, and community-based support services. As WIC is a proven strategy for improving child nutrition and mitigating the negative effects of poverty and food insecurity,</p>								

increases in enrollment signal progress toward more stable and supportive environments for early childhood development. This measure also helps Title V monitor its role in connecting families to essential services, particularly in communities facing structural barriers to access. Tracking WIC enrollment thus provides a tangible way to evaluate progress on improving food sufficiency and reducing disparities in early childhood health outcomes.

ESM MH.1 - Completion of formative research on the status of care coordination efforts in Hawaii to inform the design of the Family Health Services Division/Children with Special Health Needs Branch Care Coordination strategy.
NPM – Percent of children with and without special health care needs, ages 0 through 17, who have a medical home - MH

Measure Status:	Active									
Goal:	Increase the Percent of children with and without special health care needs, ages 12 through 17, who have a medical home.									
Definition:	<table><tr><td>Unit Type:</td><td>Text</td></tr><tr><td>Unit Number:</td><td>Yes/No</td></tr><tr><td>Numerator:</td><td>Yes/No</td></tr><tr><td>Denominator:</td><td></td></tr></table>		Unit Type:	Text	Unit Number:	Yes/No	Numerator:	Yes/No	Denominator:	
Unit Type:	Text									
Unit Number:	Yes/No									
Numerator:	Yes/No									
Denominator:										
Data Sources and Data Issues:	Title V Children with Special Health Needs Branch									
Evidence-based/informed strategy:	<p>This ESM focuses on readiness for CSHNB to develop Care Coordination Standards and Guidelines which is listed as Moderate Evidence from the MCH Evidence Center and the WWFH database calls this “somewhat evidence.” Conducting an assessment to identify service gaps and barriers aligns with the evidence-informed activity of assessing service systems to identify gaps in care coordination, workforce needs, and barriers to family-centered care. Facilitating focus groups with families incorporates family engagement in planning and quality improvement which has been identified as a key best practice supported by MCH Evidence Center. The readiness assessment component ensures that the system has the infrastructure, policies, and workforce to support care coordination effectively. This measure aligns with the American Academy of Pediatrics’ National Center for Medical Home Implementation by supporting key components of a high-functioning medical home through care coordination systems development where environmental scans help identify community-bases supports and linkages to pediatric primary care which enhances integration across systems. The AAP encourages Title V to use data-driven assessment tools to understand readiness and inform quality improvement in care coordination and conducting focus groups with families reinforces the medical home principle of shared decision-making and co-creation of care systems.</p>									
Significance:	<p>This preliminary work to determine Title V/CSHNB role and readiness in care coordination aligns services with family-centered, coordinated care principles of the medical home. By clarifying its role, CSHNB can ensure its services are not duplicative but complementary to other systems, improving the care experience for families of children with special health needs. By helping to standardize care coordination practices ensures families will have equitable access to appropriate services. This will also help build organizational readiness and capacity and guide workforce development and identify needed training or operational improvements. Having a clear role in care coordination allows Title V to show measurable impact in both qualitative and quantitative ways. Engaging families in this assessment ensures that services reflect their lived experiences, priorities, and cultural context. More importantly, it helps enhance trust, engagement and satisfaction which are foundational to effective care coordination. Assessing readiness ensures that CSHNB staff, infrastructure, and policies are prepared to deliver or support care coordination effectively and assist with system redesign as needed.</p>									

ESM BLY.1 - Completion of formative research on status of bullying prevention efforts in Hawaii to inform design of Title V's bullying prevention role and strategy.

NPM – Percent of adolescents, with and without special health care needs, ages 12 through 17, who are bullied or who bully others - BLY

Measure Status:	Active								
Goal:	Reduce the percentage of adolescents with and without special health care needs, ages 12 through 17, who are bullied or who are bullied by others.								
Definition:	<table border="1"> <tr> <td>Unit Type:</td><td>Text</td></tr> <tr> <td>Unit Number:</td><td>Yes/No</td></tr> <tr> <td>Numerator:</td><td>Yes/No</td></tr> <tr> <td>Denominator:</td><td></td></tr> </table>	Unit Type:	Text	Unit Number:	Yes/No	Numerator:	Yes/No	Denominator:	
Unit Type:	Text								
Unit Number:	Yes/No								
Numerator:	Yes/No								
Denominator:									
Data Sources and Data Issues:	The Adolescent Health program of the Maternal and Child Health Branch, Department of Health								
Evidence-based/informed strategy:	<p>Conducting an environmental scan is an evidence-informed strategy used in public health to identify existing programs, policies, and gaps in service delivery. Environmental scans allow organizations to assess the internal and external landscape, providing critical insight into the availability and scope of current prevention efforts. This strategy supports the selected NPM —percent of adolescents who bully or are bullied—by laying the groundwork for identifying best practices, duplication of services, and areas of unmet need. Ultimately, the information gathered from the scan informs targeted program development, strategic resource allocation, and cross-sector collaboration to address bullying more effectively. Evidence from health systems research identifies environmental scanning as a vital tool for organizational learning and responsiveness. It is associated with improved decision-making, the adoption of evidence-based practices, and enhanced public health performance ([1], [2], [3]). The environmental scan measured by this ESM will provide a foundation for a more coordinated, informed approach to reducing bullying among adolescents in Hawaii.</p> <p>[1] Kalavani K, Mohebbifar R, Rafiei S. (2019). Evidence based practice among healthcare providers: a cross-sectional study. <i>Int J Health Care Qual Assur</i>, 32 (5):867–78.</p> <p>[2] Kalavani K, Mehroolhassani MH, Pedram A, Vosoogh-Moghaddam A, Dehnavieh R. Environmental Scanning Model in Health System and Implementation Steps: A Scoping Review. <i>Iran J Public Health</i>. 2024 Jun;53(6):1261-1271. PMID: 39430162; PMCID: PMC11488556.</p> <p>[3] Charlton P, Doucet S, Azar R, et al. (2019). The use of the environmental scan in health services delivery research: a scoping review protocol. <i>BMJ Open</i>, 9 (9): e029805.</p>								
Significance:	<p>This measure tracks whether the environmental scan was completed (yes/no) and quantifies the number of existing programs addressing bullying. This is a significant first step toward understanding the current bullying prevention landscape in Hawaii. A high-quality scan would involve systematically reviewing programs across schools, community organizations, and healthcare systems, ensuring broad geographic and demographic representation. Completion of a comprehensive scan is a critical indicator that the strategy is being implemented effectively. Measuring completion ensures accountability for initiating the strategy and provides a baseline of programs that can inform future systems-level responses. By identifying what programs exist, where they operate, and what gaps remain, this measure directly supports the strategy's intent to enable more effective, coordinated, and evidence-informed action toward reducing bullying among adolescents.</p>								

Form 10
Evidence-Based or -Informed Strategy Measure (ESM) (2021-2025 Needs Assessment Cycle)

2021-2025: ESM AWV.1 - Develop and disseminate a teen-centered Adolescent Informational Resource (AIR) in collaboration with community health and youth service providers to promote adolescent health and annual wellness visits
2021-2025: NPM – Percent of adolescents, ages 12 through 17, with a preventive medical visit in the past year - AWV

Measure Status:	Active								
Goal:	Increase resources, training and practice improvement support for adolescent health and service providers to promote wellness and healthcare visits aligned to Bright Futures.								
Definition:	<table border="1"> <tr> <td>Unit Type:</td><td>Scale</td></tr> <tr> <td>Unit Number:</td><td>30</td></tr> <tr> <td>Numerator:</td><td>Total Actual Score from Adolescent Health Data Collection Form</td></tr> <tr> <td>Denominator:</td><td>Total Possible Score from Adolescent Health Data Collection Form (30 total)</td></tr> </table>	Unit Type:	Scale	Unit Number:	30	Numerator:	Total Actual Score from Adolescent Health Data Collection Form	Denominator:	Total Possible Score from Adolescent Health Data Collection Form (30 total)
Unit Type:	Scale								
Unit Number:	30								
Numerator:	Total Actual Score from Adolescent Health Data Collection Form								
Denominator:	Total Possible Score from Adolescent Health Data Collection Form (30 total)								
Data Sources and Data Issues:	<p>This is a summary of the Data Collection Form that lists 10 strategy components organized by the following domains:</p> <ul style="list-style-type: none"> • Collaboration • Engagement to Develop the Adolescent Resource Toolkit • Workforce Development Training for Community Stakeholders <p>Each item is scored from 0-3 (0=not met; 1=partially met; 2=mostly met; 3=completely met), with a maximum total of 30. Scoring is completed by Adolescent Health staff, with input from key partners.</p>								
Significance:	<p>Adolescence is a period of major physical, psychological and social development and the initiation of risky behaviors as teens move from childhood toward adulthood. Teens assume individual responsibility for health habits. An annual preventive well visit may help teens adopt or maintain health habits and behaviors and avoid health damaging behaviors. The Bright Futures guidelines recommend that teens have an annual checkup from age 11-21 years, however many do not. Barriers include:</p> <ul style="list-style-type: none"> • Lack of awareness of guidelines • Perception that the AWC lacks value • Unaware or variability of insurance coverage and follow up services • High utilization of sports physicals instead of AWC • Inconsistent practices addressing confidentiality • Lack of medical home • Lack of knowledge of community resources. <p>The ART and collaboration with community/youth service providers will help to address many of these barriers and build the knowledge base of professionals working with youth.</p>								

2021-2025: ESM TAHC.1 - Degree to which the Title V Children and Youth with Special Health Needs Section promotes and/or facilitates transition to adult health care for Youth with Special Health Care Needs (YSHCN), related to Six Core Elements of Health Care Transition 2.0.

2021-2025: NPM – Percent of adolescents with and without special health care needs, ages 12 through 17, who received services to prepare for the transition to adult health care - TAHC

Measure Status:	Active									
Goal:	To increase the degree to which the Title V CYSHNS promotes and/or facilitates transition to adult health care for YSHCN.									
Definition:	<table><tr><td>Unit Type:</td><td>Scale</td></tr><tr><td>Unit Number:</td><td>33</td></tr><tr><td>Numerator:</td><td>Total Actual Score from Transition to Adult Health Care Data Collection Form</td></tr><tr><td>Denominator:</td><td>Total Possible Score from Transition to Adult Health Care Data Collection Form (33)</td></tr></table>		Unit Type:	Scale	Unit Number:	33	Numerator:	Total Actual Score from Transition to Adult Health Care Data Collection Form	Denominator:	Total Possible Score from Transition to Adult Health Care Data Collection Form (33)
Unit Type:	Scale									
Unit Number:	33									
Numerator:	Total Actual Score from Transition to Adult Health Care Data Collection Form									
Denominator:	Total Possible Score from Transition to Adult Health Care Data Collection Form (33)									
Data Sources and Data Issues:	<p>This is a summary of the Data Collection Form that lists 11 strategy components organized by the Six Core Elements of Health Care Transition:</p> <ul style="list-style-type: none">• Transition policy• Transition tracking and monitoring• Transition readiness• Transition planning• Transfer of care• Transition completion. <p>Each item is scored from 0-3 (0=not met; 1=partially met; 2=mostly met; 3=completely met), with a maximum total of 33. Scoring is completed by CYSHNS staff, with input from Hilopaa Family to Family Health Information Center. The data collection form is attached as a supporting document.</p>									
Significance:	<p>CYSHNS is addressing Got Transition’s Six Core Elements of Health Care Transition 2.0. Strategy components were adapted for integration as part of CYSHNS services to support youth/families in preparing for transition to adult health care.</p> <p>Health and health care are important to making successful transitions. The majority of YSHCN do not receive needed support to transition from pediatric to adult health care. In addition, YSHCN, compared to those without special health care needs, are less likely to complete high school, attend college, or be employed. The Title V CYSHNS has been addressing these barriers through providing general transition information to families receiving CYSHNS /clinic services or attending transition-related community events, and leading/participating in planning Transition Fairs. The next phase is CYSHNS working to improve its direct services with youth/families related to transition to adult health care, using an evidence-informed quality improvement approach.</p> <p>The Six Core Elements of Health Care Transition is an evidence-informed model for transitioning youth to adult health care providers that has been developed and tested in various clinical and health plan settings. They were developed by the Got Transition/Center for Health Care Transition Improvement, based on the joint clinical recommendations from the American Academy of Pediatrics (AAP), American Academy of Family Physicians (AAFP), and American College of Physicians (ACP). References: Got Transition, “Side-By-Side Version, Six Core Elements of Health Care Transition 2.0”; AAP, AAFP, ACP, “Clinical Report – Supporting the Health Care Transition From Adolescence to Adulthood in the Medical Home”, Pediatrics 2011;128:182-200; McPheeters M et al., “Transition Care for Children With Special Health Needs”, Technical Brief No. 15. Agency for Healthcare Research and Quality (AHRQ) Publication No. 14-EHC027-EF, June 2014.</p>									

2021-2025: ESM WWV.2 - The number of women aged 18-44 years served through the state MCH reproductive health and wellness program.

2021-2025: NPM – Percent of women, ages 18 through 44, with a preventive medical visit in the past year - WWV

Measure Status:	Active									
Goal:	By 2025, 4200 women aged 18-44 years will be served through the state MCH reproductive health and wellness program									
Definition:	<table><tr><td>Unit Type:</td><td>Count</td></tr><tr><td>Unit Number:</td><td>20,000</td></tr><tr><td>Numerator:</td><td>Total number of women aged 18-44 years served through the state MCH reproductive health and wellness program.</td></tr><tr><td>Denominator:</td><td></td></tr></table>		Unit Type:	Count	Unit Number:	20,000	Numerator:	Total number of women aged 18-44 years served through the state MCH reproductive health and wellness program.	Denominator:	
Unit Type:	Count									
Unit Number:	20,000									
Numerator:	Total number of women aged 18-44 years served through the state MCH reproductive health and wellness program.									
Denominator:										
Data Sources and Data Issues:	Family Planning and Reproductive Health program									
Evidence-based/informed strategy:	Reproductive health visits not only help women to avoid unintended pregnancies, but also help a women prepare for healthy pregnancies by addressing important preventive care issues among women of reproductive age. The ESM reflects the reach of new state funded contracts to provide services to the most vulnerable population: women who are uninsured and cannot access care. Research provided by the MCH Evidence Center indicates extending services to those without insurance maybe be effective given expanding insurance coverage appears to be effective. Contracted service providers also employ a few clinical practices supported by evidence including extended clinic hours.									
Significance:	Based on the newly issued service contracts, a new Evidence based/Informed Strategy Measure (ESM) was selected for women’s preventive medical visits: the number of women age 18-44 years served by the state’s reproductive health and wellness program. This replaces the former population-based measure on birth spacing, which did not directly relate to the Title V strategies. The ESM relates to the evidence-based strategy Engagement of Other MCH Programs to Disseminate Information and Make Referrals for Well-Women Visits. Providers across the state were sought to offer critical wellness and reproductive health services to those most in need. The FFY 2022 data collected indicates that 3,681 women were served. Contractors are expected to work on increasing the reach of the program; thus, objectives now reflect an incremental increase for each year.

5) Newborn Bloodspot Screening	Yes	Yes	Monthly	3	Yes	
6) Newborn Hearing Screening	Yes	Yes	Monthly	3	Yes	
7) Hospital Discharge	No	No	Less Often than Annually	3	No	
8) PRAMS or PRAMS-like	Yes	Yes	Monthly	03	Yes	

Form Notes for Form 12:

None

Field Level Notes for Form 12:

Data Source Name:	1) Vital Records Birth
	<p>Field Note:</p> <p>In 2017, enforcement of a Hawaii Revised Statute related to data-sharing policies severely limited and terminated access to the Hawaii Vital Records office data. In 2018, FHSD successfully helped to advocate for legislation to amend the statute. In March 2019, FHSD regained access to the electronic vital statistics dataset upon approval by a newly established DOH Institutional Review Committee, which was required by the new statute.</p> <p>Access to Vital Records Birth data is through the VSS system developed by Office of Health Status Monitoring (OHSM) at the OHSM Office. Starting in April 2025, after a system update was conducted, the VSS system could be accessed online at https://vss-client.ehawaii.gov.</p>
Data Source Name:	2) Vital Records Death
	<p>Field Note:</p> <p>In 2017, enforcement of a Hawaii Revised Statute related to data-sharing policies severely limited and terminated access to the Hawaii Vital Records office data. Starting in April 2025, after a system update was conducted, the VSS system could be accessed online at https://vss-client.ehawaii.gov.</p>
Data Source Name:	3) Medicaid

Field Note:

In 2025, FHSD executed a new Memorandum of Agreement (MOA) with the state Medicaid program to comply with Title V requirements for an interagency agreement. This agreement formalizes existing agency collaborative efforts to work together to improve the health of mothers, children, and families. It includes specific provisions for FHSD to request and receive selected Medicaid data. The MOA states that the Medicaid program will respond to data requests within 90 days of submission. Currently, Medicaid provides data that is needed to complete the Title V annual report, including:

- Information for Form 6 (Deliveries and Infants Served by Title V and Entitled to Benefits Under Title XIX)
- SSDI Core Measures (child immunizations)
- Medicaid enrollment data (including numbers of children and pregnant women)
- Data for several federal Medicaid quality measures used for Title V performance measures on developmental screening and child wellness visits.
- Data that will enable WIC program to identify potential new Maui families affected by the August 8, 2023 Maui wildfires. Medicaid has provided enrollment numbers for children birth to 5 years for this request.

The Medicaid MOA expires in 2030 and is anticipated to be renewed next year.

Data Source Name:**4) WIC**

Field Note:

In 2020, WIC completed installation of its new data system. A private third-party vendor now houses, analyzes, and reports data for the WIC program. While the FHSD WIC Branch no longer has direct access to the electronic dataset, it does have regular access to standard and special data reports. WIC can also request a copy of specific elements of the program dataset for analysis.

Data Source Name:**5) Newborn Bloodspot Screening**

Field Note:

FHSD successfully linked data to vital statistics birth records with the amendment to the data sharing law that now permits access to vital records for public health research. Hawaii Title V has access to the linked electronic dataset of birth and newborn metabolic screening records.

Access to Vital Records Birth data is through the VSS system developed by Office of Health Status Monitoring (OHSM) at the OHSM Office. Starting in April 2025, after a system update was conducted, the VSS system could be accessed online at <https://vss-client.ehawaii.gov>. Data linkage for newborn metabolic screening is conducted in the CSHN Branch office.

Data Source Name:**6) Newborn Hearing Screening**

Field Note:

FHSD successfully linked data to vital statistics birth records with the amendment to the data sharing law that now permits access to vital records for public health research. Hawaii Title V has access to the linked electronic dataset of birth and newborn hearing screening records.

Access to Vital Records Birth data is through the VSS system developed by Office of Health Status Monitoring (OHSM) at the OHSM Office. Starting in April 2025, after a system update was conducted, the VSS system could be accessed online at <https://vss-client.ehawaii.gov>. Data linkage for newborn hearing screening is conducted in the CSHN Branch office.

Data Source Name:**7) Hospital Discharge**

Field Note:

The Healthcare Association of Hawaii (HAH) is the new manager for all hospital data in the state. HAH is the nonprofit trade organization serving Hawaii's hospitals, skilled nursing facilities, assisted living facilities, home care companies, and hospices. The data is managed by a new subsidiary created in 2018, the Laulima Data Alliance. The Laulima Data Alliance has provided a portal for DOH users if summary results are needed. Record-level data is available for purchase. DOH established a new data governance committee which includes a representative from HAH. This committee approves and oversees/coordinates all hospital data requests.

Data Source Name:**8) PRAMS or PRAMS-like**

Field Note:

Hawaii first began collecting statewide PRAMS data in 2000. While changes were made to the data sharing statute, the Hawaii PRAMS survey operations were halted for 18 months from 2017 to 2018, lacking access to birth records to draw the survey sample. Survey operations resumed in December 2018, but there is no Hawaii PRAMS data for 2017 and 2018. Additionally, issues with the 2019 sample resulted in only six months of usable data. Data for 2020 is the first full year of PRAMS data since 2016. Recently, PRAMS data collection was halted at the end of January 2025.

On January 31, 2025 CDC paused all PRAMS data collection. CDC directed states to redact the PRAMS Phase 9 survey questions to comply with the Trump Administration DEI Executive Order. On April 1, 2025, DOH received information from the CDC that the Division of Reproductive Health was eliminated (with the exception of the Maternal/Infant Health Branch). The Initial impacts were:

- all affected CDC staff receive reduction-in-force (RIF) notifications and placement on administrative leave effective April 2, 2025 through June 2, 2025.
- PRAMS grant program staff was unavailable.
- The Hawaii CDC MCH Epidemiology Assignee also received a RIF notification

There are a minimal CDC staff administering the programs and responding to emails. The CDC PRAMS data system (PIDS) was not available for any data entry. On June 9, 2025, CDC notified Hawaii that our Hawaii PRAMS Questionnaire V9.2 was available in PIDS for User Acceptance Testing (UAT).

Hawaii currently contracts with Rutgers University to administer the PRAMS survey protocol/data collection. The contract is state-funded. Rutgers University completed the PIDS UAT for Hawaii in mid-June and began PRAMS data collection on June 23, 2025. June data collection is for births during the month of January and February 2025. Hawaii plans to continue PRAMS data collection through the end of the grant period (04/30/2026).

Form 12
Part 2 – Products and Publications (Optional)

State: Hawaii
Annual Report Year 2024

Products and Publications information has not been provided by the State.
