

Medical Cannabis Tips for Safe Storage

Hawaii Department of Health
Office of Medical Cannabis Control & Regulation

When it comes to child safety, there is no such thing as being too careful

Out of Sight and Out of Reach

- Make sure your medical cannabis is out of sight and out of reach from all children.

- Medical cannabis should be stored safely away from children of all ages.

- Safe storage around young children may not stop older children or teens. Regularly monitor the amount of medical cannabis in your possession.

- Keep medical cannabis away from pets.

- If children/pets accidentally ingest medical cannabis, it can make them very sick.

- Ingested medical cannabis products are stronger than medical cannabis flower and can be easily consumed by mistake in large amounts.

Store in a Clearly Labeled Child-Resistant Container

- Ensure medical cannabis products are clearly labeled.

- Consider purchasing a locked cabinet or box to store your medical cannabis securely.

- Securely store your medical cannabis after every use.

- Keep medical cannabis in a child-resistant container.

- Consider changing how you store your medical cannabis as children get older.

HELP is a Phone Call Away

- If your child, or someone you know needs immediate medical help call **9-1-1**
- If you *think* your child has ingested cannabis, call Poison Control at **1-800-222-1222**
- Consider storing the Poison Help line near your phone and/or in your mobile device.
- If you think your pet has ingested cannabis, call your veterinarian.
