from previous day
(2/1/2021)

*Reflects preliminary reports of doses administered as of Monday, February 1, 2021. The Department of Health is currently verifying this number and awaiting additional reports from all of the vaccine sites.

64 New COVID-19 Cases Reported

DOH reports 64 new cases of coronavirus today. There were no additional deaths.

This report includes cases up until Sunday at 11:59 p.m. Full data is posted on the State COVID-19 dashboard and on the DOH Disease Outbreak & Control Division website at noon each day at [HawaiiCOVID19.com/dashboard](https://hawaiiCOVID19.com/dashboard).

Hawai'i COVID-19 Counts as of 11:59 p.m. Jan. 31, 2021

| Island of Diagnosis | New Cases | Reported since 2/28/2020 (including new cases) |
|--------------------------------------|-----------|--|
| O'ahu | 41 | 21,021 |
| Hawai'i | 4 | 2,173 |
| Maui | 17 | 1,770 |
| Kaua'i | 0 | 179 |
| Moloka'i | 0 | 25 |
| Lāna'i | 0 | 107 |
| HI residents diagnosed outside of HI | 2 | 732 |
| Total Cases | 64 | 26,007 |
| Deaths | 0 | 410 |

Hospitalizations as of 8:30 a.m. on 2/1/21 – Hawai'i-2, Maui-15, O'ahu-57, Kaua'i-0

State Lab Detects Additional COVID-19 Variants

DOH's State Laboratories Division (SLD) continues to work in partnership with private sector laboratories to collect and examine specimens of the SARS-CoV-2 virus, which causes COVID-19. To date, they've found nine samples of the L452R variant and four specimens that exhibit a molecular clue associated with the UK B1.1.7, which indicates that the B1.1.7 variant may be present in Hawai'i. Extra testing is being done to determine whether it's the B1.1.7 variant. Testing should be completed later this week. The B1.1.7 variant is highly transmissible and has not previously been detected in Hawai'i.

Of the nine L452R variants, one was from Maui, one from Kaua'i, and seven from O'ahu. Four individuals carrying the L452R variant had a history of travel to the mainland (three California, one Utah). The L452R mutation is considered to be "under investigation" by the CDC, and so far, hasn't proven to be associated with increased transmissibility of COVID-19, and is not associated with vaccine failure or decreased effectiveness of COVID-19 vaccines.

DOH is encouraging everyone to continue wearing masks, to physical distance, and to avoid large crowds to help slow the spread of all variants. They also encourage everyone to get a vaccine when they become eligible.
