**DOH ALERTS PUBLIC ABOUT SCOTT & JON'S SHRIMP SCAMPI
WITH LINGUINI DUE TO POTENTIAL LISTERIA MONOCYTOGENES
CONTAMINATION**

25-119

FOR IMMEDIATE RELEASE

October 7, 2025

HONOLULU — The Hawai'i Department of Health (DOH) Food and Drug Branch (FDB) is alerting residents to a recall issued by Demers Food Group for select lots of Scott & Jon's Shrimp Scampi with Linguini product, due to potential contamination of *Listeria monocytogenes*. The shrimp scampi product contains a recalled linguini pasta ingredient supplied by Nate's Fine Foods, which was recalled for *Listeria monocytogenes* contamination.

The recalled product was distributed nationwide, including supermarkets like Safeway in Hawai'i. FDB is working with these stores to ensure that the recalled product is no

longer available for sale. This recall applies only to select Scott & Jon's Shrimp Scampi with Linguini lot numbers identified as follows:

Size	Lot Number	Best If Used By Date	UPC	GTIN
9.6 oz	S254522	3/12/2027	8581750039 19	108581750039 16
	S255522	3/13/2027		
	S259522	3/17/2027		
	S263521	3/21/2027		
	S263522			

Listeria monocytogenes can cause listeriosis, a serious and sometimes fatal infection as a result from eating *Listeria*-contaminated food. The disease primarily affects pregnant individuals, newborns, the elderly and others with weakened immune systems.

Listeriosis can cause miscarriages and stillbirths. Healthy individuals may suffer symptoms such as fever, severe headache, muscle aches, stiffness, nausea, abdominal pain and/or diarrhea. Although people can develop listeriosis up to two months after eating contaminated food, symptoms will usually start within several days from consumption, often with diarrhea. Listeriosis may be treated with antibiotics.

Please contact your healthcare provider immediately if you are exhibiting symptoms after having consumed the recalled product. To date, there have been no reports of illness or adverse events attributed to the product.

The FDB advises consumers to verify the recalled product by checking the lot number and best-if-used-by date. The Food and Drug Administration (FDA) recommends returning affected items to your local store for a refund. If the product has been opened, safely seal it in a zip-top plastic bag and dispose of it. Please wash your hands thoroughly and sanitize any areas that may have come in contact with the product. Consumers with questions should contact Demers Food Group's Customer Service at 1-800-239-9731 Monday through Friday from 2 a.m. to 10 a.m. HST.

Representative photographs of the specific recalled products are listed below:
