Listeria monocytogenes can cause listeriosis, a serious and sometimes fatal infection as a result of eating *Listeria*-contaminated food. The disease primarily affects pregnant individuals, newborns, the elderly and others with weakened immune systems. Listeriosis can cause miscarriages and stillbirths.

Healthy individuals may suffer symptoms such as fever, severe headache, muscle aches, stiffness, nausea, abdominal pain and/or diarrhea. Although people can develop listeriosis up to two months after eating contaminated food, symptoms will usually start within several days from consumption, often with diarrhea. Listeriosis may be treated with antibiotics.

Please contact your healthcare provider immediately if you are exhibiting symptoms after having consumed any of the recalled products. To date, there have been no confirmed reports of illness or adverse events attributed to the recalled products.

The FDB advises consumers to verify the recalled product by checking the corresponding production information and the images of packaging or PLU stickers provided below. Safely seal the product in a zip-top plastic bag and dispose of it. Please wash your hands thoroughly and sanitize any areas that may have come in contact with the product. Consumers with questions about refunds should contact Moonlight Companies at 855-215-5017 Monday through Friday from 2 a.m. to 11 a.m. HST.
