**Re-emphasized to all Caregivers the importance of the presence of thermometer at all times inside the refrigerator in maintaining the right temperature of the refrigerator in the operation of the Care Home. "Refrigerator Daily Temperature" log has been prepared and implemented for Caregiver on duty to enter the daily reading from the thermometer inside the refrigerator. Caregivers were trained to actually read the temperature at the thermometer inside the refrigerator before entering the value/number in the log located on the door of the refrigerator before preparing breakfast for the residents.**
