4. Results in substantial functional limitations in three or more of the following areas of major life activity: self-care, receptive and expressive language, learning, mobility, self-direction, capacity for independent living, and economic sufficiency; and

5. Reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated.

"Foster adult" means any individual over eighteen years of age who is not related to the foster parent by blood, marriage, or adoption and who is in need of caretaking.

"Foster parent" means any adult person who gives parenting care and maintenance to a foster adult.

"Roaming house" means a commercial residential facility which provides living quarters for individuals apart from those occupied by the roaming house operator. The individuals may share facilities such as a kitchen and bathroom, but there shall be no mutual relationships and responsibilities which characterize family living.
