## EXECUTIVE SUMMARY

In accordance with Hawai'i Revised Statutes (HRS) §334-16, the Department of Health (DOH) submits this report to the 2026 Hawai'i State Legislature summarizing annual data on forensic patients served by the Hawai'i State Hospital (HSH).

Unless otherwise noted, all data is for fiscal year (FY) 2025 with comparison to FY 2024. In some sections historical comparisons from FY 2020 are provided for additional context.

Key findings in this report include:

**Gross Admissions and Discharges.** HSH admissions and discharges are compared for FY 2025 to FY 2024:

- Admissions remained the same at 602.
- Discharges increased by 7% from 562 to 608.
- FY 2020 through FY 2025:
  - Admissions increased from 331 to 602 (increase of 271 patients)
  - Discharges increased from 310 to 608 (increase of 298 patients)

**Admission Commitment Categories.** In FY 2025, admissions with the legal status of Unfit to Proceed increased by 1% compared to FY 2024, remaining the most frequent commitment category, accounting for over 60% of all admissions.

<b>TOTAL</b>	<b>331</b>	<b>229</b>	<b>333</b>	<b>498</b>	<b>602</b>	<b>602</b>

**Discharge Legal Status Categories.** In FY 2025, the most common discharge status was no further legal encumbrance (None), representing 49% of discharges. The second most common, the discharge legal status of Fit to Proceed, represented 28% of discharges followed by Conditional Release (CR) at 19% of the total 608 discharges.

<b>TOTAL</b>	<b>310</b>	<b>249</b>	<b>275</b>	<b>462</b>	<b>562</b>	<b>608</b>

**Committing Courts and Counties.** In FY 2025, District and Circuit courts across the State committed the most patient admissions to HSH. Across all three categories of courts, the 1st Circuit (City and County of Honolulu) commitments decreased in FY 2025 compared to FY 2024.

**Admissions by Grade of Offense.** Petty Misdemeanors remain the highest (among the categories of most severe offenses) of the admissions to HSH. Compared to FY 2024, admissions for Petty Misdemeanors increased by four (1.7%).

Misdemeanor and Petty Misdemeanor offenses accounted for 60% (n= 363) of all admissions as compared to FY 2024 (61%; n=368). Of the Misdemeanor charges, non-violent Petty Misdemeanors - those legal statuses categorized into Act 26, SLH 2020, as amended by Act 87, SLH 2024, (collectively referred to as "Act 26/87") accounted for 38% (n=231) of all admissions (n=602).

**Readmissions.** Patient readmissions in FY 2025 rose 3% from FY 2024 (from 63% to 66%), while new (first-time) admissions decreased by 3% (37% down to 34%). Of the readmissions, those readmitted within 30 days of their last HSH admission increased by 4% (FY 2024 6% vs. FY 2025 10%).

**Gross Length of Stay (LOS) in Number of Days.** Total number of patient discharges (including expired patients) was 608 in FY 2025. Gross LOS includes all admission episodes (new and readmissions) and does not exclude days when the patient is off campus (leave or administrative discharge days) if the patient has been discharged. For patients currently in-house on 6/30/25, the gross LOS is measured from the admission date to the given date. For those patients in-house, civil commitments include both legally and not legally encumbered patients.

**Individuals Remaining In-House at end of FY 2025.** As of June 30, 2025, HSH In-House population totaled 379 patients. “In-House” means the patient is physically at HSH on a given date. For patients in-house, civil commitments include both legally and not legally encumbered patients.

## BACKGROUND

The Hawai'i State Hospital (HSH) is the only publicly funded in-patient state psychiatric hospital in Hawai'i. Part of the Department of Health (DOH) and licensed through the Office of Health Care Assurance (OHCA), the HSH is accredited by The Joint Commission (TJC).

In January 2024, the Hawai'i State Hospital completed safety enhancements to units in the lower campus to mitigate ligature risks and support compliance with TJC's accreditation standards. HSH continues to implement improvements and corrective actions to meet regulatory requirements and advance patient care.

Hale Ho'ōla is currently operating beyond its capacity and continues to face building deficiencies and unanticipated repair needs. Despite the multi-million-dollar investment to build a state-of-the-art in-patient hospital facility, HSH has repaired – and in some cases – replaced building materials and other construction-related items. HSH is actively collaborating with the Department of Accounting and General Services (DAGS) to remediate these ongoing issues. Continued support and oversight are essential to ensure the facility can meet the growing demands of patient care while maintaining safety, functionality, and long-term sustainability.

HSH contracts with Columbia Regional Care Center (CRCC) in South Carolina – a private, secure forensic facility operated by Correct Care Recovery Solutions. At the end of FY 2025, five HSH patients were being cared for at CRCC.

As a forensic psychiatric hospital, HSH is one of several healthcare institutions addressing individuals with mental illness, particularly those involved in the criminal justice system. Act 26, SLH 2020, as amended by Act 87, SLH 2024 (referred to collectively as "Act 26/87"), which allows courts to order non-violent petty misdemeanants living with mental illness to HSH for fitness evaluation within days of their arrest rather than months, was intended to ensure appropriate diversion to community treatment and encourage rehabilitation in the least restrictive environment. In part, Act 26/87 aimed to safeguard that individuals were not unduly held at hospitals while awaiting mental health examinations for longer than the maximum sentence for their crimes. While well intentioned, due to the increase in admissions involving arrested individuals for petty misdemeanor offenses, HSH is utilizing, repurposing, and reinvesting in older, outdated buildings to expand its capacity and enhance patient care.

FIGURE 2: HOSPITALIZATION STATUS OF ADMISSIONS, FY 2020 – FY 2025

## PART II. ADMISSIONS, DISCHARGES AND LENGTHS OF STAY BY COMMITMENT CATEGORIES

The commitment status of an individual usually changes over the course of hospitalization. For instance, a patient committed pursuant to §704-406 (Unfit to Proceed; Committed), HRS, may later be found unrestorable and in need of hospitalization with charges dismissed (§704-406(7)(a), HRS), then discharged from the HSH with no legal encumbrance. The commitment status at the time of admission is reported; for discharges, the commitment status at the time of discharge is reported.

### A. Admissions by Legal Status Category

Table 3 provides details for admissions by legal status category from FY 2020 to FY 2025.

TABLE 3: ADMISSIONS BY LEGAL STATUS FROM FY 2020 THROUGH FY 2025

ADMISSIONS LEGAL STATUS	FY20	FY21	FY22	FY23	FY24	FY25

<b>TOTAL</b>	<b>331</b>	<b>229</b>	<b>333</b>	<b>498</b>	<b>602</b>	<b>602</b>

Increase in admissions continues to be attributed to individuals admitted as Unfit to Proceed. While there was a large increase from FY 2023 to FY 2024 (+80, 29%), the same legal status, while still the highest, increased modestly from FY 2024 to FY 2025 (+5, 1.4%).

## B. Discharges by Legal Status Category

**Table 4** illustrates discharges by legal status category for FY 2020 - 2025. In FY 2025, all patient deaths (expired) were related to medical reasons.

### Top Legal Statuses at Discharge

**None / No Legal Encumbrance** was the most common discharge status in FY 2025 (n=296). This occurs when patients leave HSH with no further legal requirements for various reasons. For example, despite hospitalization, some patients admitted as Unfit to Proceed remain unable to comprehend the legal proceedings and assist in their defense. If the patient is found to be unrestorable or if too much time has passed, the courts may dismiss the charges and discharge the patient. However, if the patient poses an imminent danger to themselves or others and needs hospital level of care, the court may civilly commit the individual to HSH (statutorily limited to 90 days), renewable upon petition from hospital staff if the patient still meets commitment criteria, after which the patient is discharged with no further HSH legal encumbrance.

In FY 2025, the second most common discharge was the legal status of **Fit to Proceed** (**§704-405, HRS**) (n=167). Previously, the courts found these individuals to either require an evaluation of their fitness to proceed or be unfit to proceed. If, after receiving evaluation reports from mental health experts, the court finds the individual competent (i.e., capable of understanding court proceedings and assisting in their own defense), the criminal case proceeds to trial. If the court determines that the individual is incompetent and a danger to persons or property, the patient is ordered to HSH for treatment to restore the individual's fitness for trial.

**Conditional Release (§704-415, HRS)** was the third most common discharge legal status during the 2025 fiscal year (n=114). These individuals were acquitted and committed to HSH, temporarily hospitalized for CR violations or had their CR revoked. And, after a statutory period of waiting 60 days, these individuals applied for and were granted, by the courts, CR to continue care, supervision, and treatment within the community.

**C. HRS §704-411(1)(a): Acquitted on the Grounds of Physical or Mental Disease, Disorder, or Defect and Committed to the Custody of the Director of Health (Acquitted and Committed)—Commonly referred to as “Not Guilty by Reason of Insanity” or “NGRI.”**

**Table 5** identifies the number of admissions and discharges for individuals with a legal status of “acquitted and committed.” These individuals were deemed fit for trial, stood trial, and were subsequently found not penal (or criminally) responsible because they are affected by a physical or mental disease, disorder, or defect that prevented them from conforming to the law at the time of the offense. As a result, they were acquitted (cleared of the criminal charge). Individuals in this category were also found to present a risk of danger to themselves or others, not appropriate for CR, and were committed to HSH.

NGRI admissions decreased (-37%) from FY 2024 to FY 2025. While committed to HSH for treatment, such patients may seek CR from the court to continue supervision and treatment in the community.

**D. HRS §704-411(1)(b): Acquitted and Conditionally Released**

**Table 6** provides the number of admissions and discharges with a legal status of Acquitted and Conditionally Released. In these instances, the courts found that these individuals could be adequately controlled and provided proper care, supervision, and treatment within the community if discharged from HSH and conditionally released. In FY 2025, ten patients were discharged with this legal status as compared to seven patients in FY 2024, representing an increase of three from the previous year.

## **E. HRS §704-411(2), §704-411(3): Post-Acquittal Hearing / Evaluation on Dangerousness**

**Table 7** provides the number of admissions and discharges with a legal status of Post-Acquittal Hearing or Evaluation on Dangerousness. In the event an individual is found not penally responsible due to physical or mental disease, disorder, or defect and cleared of criminal charges, the court may order a separate hearing to assess current risk of danger to self or others if the evidence at trial was insufficient to determine present dangerousness. In FY 2025 zero patients were admitted as compared to two patients in FY 2024.

## **F. HRS §704-413(1): Temporary Hospitalization for Violating Terms of Conditional Release**

**Table 8** provides the number of admissions and discharges with a legal status of Temporary Hospitalization for Violating the Terms of CR. After acquittal and obtaining CR, these individuals were later found to have difficulty complying with the terms of their CR or in need of hospitalization and ordered to return to HSH temporarily (up to 72 hours) with the goal of stabilization, improvement, and return to community-based supervision and treatment. Within 72 hours of admission, courts determine whether further hospitalization is necessary to prevent revocation of CR and may approve 90-day extensions, up to one year, before CR is revoked. These temporary hospitalizations decreased in FY 2025 as compared to FY 2024 (-3, -3%).

## G. HRS §704-413(4): Revocation of Conditional Release

**Table 9** identifies the number of admissions and discharges with a legal status of Revocation of Conditional Release in FY 2024 and FY 2025. Similar to individuals temporarily hospitalized for violating CR terms, these previously acquitted individuals also had difficulty complying with the terms of their CR. However, in these instances, the courts found these individuals non-compliant and ordered the immediate revocation of their CR, returning them to HSH for hospitalization. After at least 60 days following CR revocation, the individual or HSH may apply for a return to CR and community-based treatment or a discharge from CR.

In FY 2025, two patients were admitted with this legal status as compared to one in FY 2024. None of these patients had their CR reinstated.

## H. HRS §704-404: Evaluation of Fitness to Proceed

**Table 10** identifies the number of admissions and discharges related to individuals undergoing fitness evaluations to proceed in FY 2024 and FY 2025. Before a person can be tried, convicted, or sentenced, they must comprehend the court proceedings and be able to assist in their defense. If there is concern regarding an individual's fitness to proceed, the court may pause the proceedings and order qualified experts to examine and report on the individual's fitness.

In FY 2025, there was a slight increase (4%) in the number of individuals admitted for an Evaluation of Fitness to Proceed as compared to FY 2024.

**Table 11** identifies the number of admissions and discharges with a legal status of Unfit to Proceed and where the patient was subsequently committed. The courts found these patients unable to understand the court proceedings and assist in their own defense. They were also found to be a danger to themselves or others or a substantial danger to the property of others and were committed to HSH for detention, care, and treatment.

**Table 13** identifies the number of admissions and discharges with a legal status of Involuntary Hospitalization (or Civil Commitment). During FY 2025 there were two admissions with a legal status of Civil Commitment as compared to one in FY 2024. One patient was discharged with no legal encumbrance, and one remained hospitalized under an MH-6 order.

## L. Legal Status of Patients In-House at the End of Fiscal Year

**Figure 3** provides the primary legal status of patients in-house (inpatient) at the end of FY 2025 (June 30, 2025). This is a “snapshot” of the commitment status of those patients. The commitment status typically changes throughout hospitalization. Also, individuals are sometimes admitted to HSH with multiple court cases and orders, resulting in more than one legal status, all of which will likely evolve during a hospitalization episode. For patients in-house, civil commitments include both legally and not legally encumbered patients.

## PART III. NUMBER OF PERSONS COMMITTED TO HSH BY EACH COURT AND COUNTY

### M. County

**Figure 4** details admissions by originating county ordering an individual to be committed to HSH. During FY 2025, City and County of Honolulu admissions decreased by 5% compared to FY 2024 while all other counties increased in commitments. Of the four counties, Maui County continued to commit the fewest individuals to HSH.

## N. Court

**Figure 5** depicts admissions by committing court. Generally, Circuit Courts preside over felony charges, District Courts oversee misdemeanor and lower charges, and Family Courts handle, among other things, domestic violence and civil commitment cases. For FY 2024 and FY 2025, 2<sup>nd</sup> Circuit-Family Court (Maui) made no admissions to HSH.

## PART IV. LENGTHS OF STAY IN THE HAWAII STATE HOSPITAL

### Gross Length of Stay (LOS)

**Table 14** details the length of stay (in days) for individuals discharged during FY 2025 and those patients that remain in-house as of the end of FY 2025. Gross LOS includes all patient episodes within the fiscal year. Gross LOS is calculated upon discharge for individuals leaving a hospital to capture the length of a hospitalization episode and does not account for the days the patient may be off campus (leave). For patients currently in a hospital and yet to be discharged, the gross length of stay is measured from the admission date to a given date. For patients in-house, civil commitments include both legally and not legally encumbered patients.
