The Honorable Ronald D. Kouchi,
President and Members of the Senate
Thirty-Third State Legislature
State Capitol, Room 409
Honolulu, Hawaii 96813

The Honorable Nadine K. Nakamura,
Speaker
and Members of the House of
Representatives
Thirty-Third State Legislature
State Capitol, Room 431
Honolulu, Hawaii 96813

Dear President Kouchi, Speaker Nakamura, and Members of the Legislature:

For your information and consideration, I am transmitting a copy of the Annual Report on the Establishment and Regulation of Medical Cannabis Production Centers and Dispensaries to the Legislature, pursuant to Chapter 329D, Section 23, Hawaii Revised Statutes.

In accordance with Section 93-16, Hawaii Revised Statutes, I am also informing you that the report may be viewed electronically at:

<https://health.hawaii.gov/oppd/department-of-health-reports-to-2026-legislature/>

Sincerely,

A handwritten signature in black ink, appearing to read "Ken Fink".

**REPORT TO THE THIRTY-THIRD LEGISLATURE
STATE OF HAWAII
2026**

**ANNUAL REPORT
MEDICAL CANNABIS DISPENSARY LICENSING SYSTEM**

Pursuant to Act 241, Session Laws of Hawaii, 2015,
Requesting the Department of Health to Submit an Annual Report on the Establishment
and Regulation of Medical Cannabis Production Centers and Dispensaries

**Prepared by:
DEPARTMENT OF HEALTH
STATE OF HAWAII**

January 2026

EXECUTIVE SUMMARY

Pursuant to Act 241, Session Laws of Hawaii, 2015, the Department of Health submits a report to the 2023 Legislature on the establishment and regulation of medical cannabis production centers and dispensaries that includes:

- (1) The number and location of production centers and dispensaries licensed;
- (2) The total licensing fees collected;
- (3) The total amount of taxes collected from production centers and dispensaries; and
- (4) Any licensing violations determined by the department.

BACKGROUND

Act 241, Session Laws of Hawaii, 2015, codified as Chapter 329D, Hawaii Revised Statutes (HRS), established a regulated statewide dispensary system for medical cannabis to ensure safe and legal access to medical cannabis for qualifying patients. Section 329D-2, HRS, directed the Department of Health (DOH) to issue eight dispensary licenses statewide – three for the City and County of Honolulu, two each for the County of Hawaii and County of Maui, and one for the County of Kauai. Regulatory oversight of the licensees is the responsibility of the DOH Medical Cannabis Dispensary Licensing Section (MCDLS), Office of Medical Cannabis Control and Regulation.

Online applications for Medical Cannabis Dispensary Licenses were accepted from January 12, 2016 through January 29, 2016. A total of 66 applications were received. DOH announced selection of the eight dispensary licensees on April 29, 2016.

There have been no new licenses issued since April 29, 2016.

Green Aloha Ltd.

NUMBER AND LOCATION OF LICENSED FACILITIES

Each licensee is allowed to operate up to three production centers for cultivation, manufacturing, and packaging of cannabis and manufactured cannabis products.¹ Each licensee is allowed to establish up to two retail dispensing locations. DOH may authorize two additional retail dispensing location per licensee to serve qualified patients in a rural or underserved geographical area.^{2, 3} Retail dispensing locations may not be co-located with production centers, and each production center may not hold more than seven thousand five hundred plants (7,500).^{4, 5} Licensees are capped at fifteen thousand (15,000) cannabis plants in total across all of their production centers. For security reasons, locations of production centers are not publicly disclosed.

The first production centers were given a notice to proceed for cultivation on February 1, 2017. The first dispensary was given a notice to proceed to retail on August 8, 2017. As of December 23, 2025, there are a total of 34 operational licensed medical cannabis facilities statewide; 10 production centers and 24 retail locations (Table 1).

LICENSING FEES COLLECTED

MCDLS collected an initial licensing fee of \$75,000 from each of the eight licensees in May 2016.

An annual \$50,000 renewal fee was collected from each licensee in 2017, 2018, 2019, 2020, and 2022.

In 2023 a new licensing fee schedule was introduced consisting of four factors. The factors, listed below, were used to determine the License renewal fee for each licensee.

1. Base fee for production center(s)
2. Base fee for retail center(s)
3. Discount percentage based on market conditions in each county
4. Discount percentage based on market share

The total collected for the License renewal fee for 2025 totaled **\$915,250**.

Table 2. Licensing Fees Collected⁶	
Year	Amount
2016	\$600,000
2017	\$400,000
2018	\$400,000
2019	\$400,000
2020	\$400,000
2021	\$400,000
2022	\$400,000
2023	\$885,250
2024	\$961,250
2025	\$915,250
Total to-date	\$5,761,750

TAXES COLLECTED

Excise Taxes

A 4% general excise tax is assessed on cannabis and manufactured cannabis products purchased at the licensed dispensaries by qualifying registered patients. The City and County of Honolulu, County of Kauai, and County of Hawaii have current additional 0.5% surcharges which brings the excise tax rate to 4.5% for these counties.⁷ The County of Maui has not adopted a county surcharge.

Table 3. Excise Taxes Collected⁸	
Year	Amount
2016	No licensee sales
2017	\$99,871
2018	\$572,170
2019	\$1,201,168
2020	\$2,023,138
2021	\$2,568,947
2022	\$2,428,035
2023	\$2,588,588
2024	\$2,937,877
2025	\$2,828,019
Total to-date	\$17,247,813

Income Taxes

The eight dispensary licensees are structured as either a limited liability company or an S corporation and therefore do not pay state or federal income taxes.

Review of 2025 Violations

For the period from January 1, 2025, through December 1, 2025, DOH identified a total of 18 licensing violations. The most common violations involved section 11-850-61 (tracking requirements), Hawaii Administrative Rules (HAR).

Notables

On November 7, 2025 Governor Green approved amendments to Hawai‘i Administrative Rules (HAR), Chapter 11-850 (Interim Rules). Medical cannabis dispensaries were given authority to conduct the sale of dry herb vaporizers, grinders, mats, trays, rolling papers, filters and cones. Other amendments include: changes to conditions for dispensary waiting rooms (Act 108 SLH 2023); removing thirty day waiting period for department review and approval of a dispensary to dispensary purchasing plan (Act 172 SLH 2024); and allow maintenance personnel on department-approved list to be reasonably monitored while performing work at a dispensary facility (Act 108 SLH 2023).

From the months of August to December 2025, the OMCCR diverted all efforts to prioritize requirements set forth in Act 269 SLH 2025. The department was required to establish and maintain a registry of all manufactured hemp product retailers and distributors doing business in the State by January 1, 2026. Significant efforts were made to create an online application using only existing resources within the program. Concurrently, the program amended Chapter 11-37 (Interim Rules) Hawaii Administrative Rules ahead of the January 1, 2026 deadline.

Conclusions and Recommendations

The rapid expansion of Hawaii's medical cannabis industry has substantially increased the demand for regulatory oversight by the Office of Medical Cannabis Control and Regulation (OMCCR). Ongoing and frequent industry changes creates downstream impacts to the program. In 2025, changes to federal law enacted by the U.S government directly affects the cannabis and hemp sectors, requiring OMCCR to respond swiftly and strategically. The office must continuously adapt to ensure that medical cannabis remains accessible to Hawaii's patients while maintaining a strong focus on patient safety and public health.

OMCCR's assumption of responsibility for regulating manufactured hemp products, hemp processors, and hemp retailers and distributors has further strained the office's operational capacity. Concurrently, the proliferation of unregulated cannabis and cannabinoid hemp retailers have intensified the need for additional resources, specialized training, and enhanced regulatory oversight.

Recommendations

1. Increase Staffing Capacity

- **Action:** Expand the number of program positions beyond the status. At minimum, include two (2) compliance officers, one (1) data scientist, one (1) program planner, and one (1) accountant.
- **Rationale:** The current staffing levels are inadequate to manage the growing number of facilities, increasing complexity of processes, and additional hemp regulatory duties. A high level of independent judgment in overseeing both the administrative and technical aspects of the program is required. The additional positions will increase compliance within the program and encourage process improvement.

2. Enhance Training Programs

- **Action:** Provide targeted training for surveyors in good manufacturing practices (GMP), laboratory testing, and emerging cannabis extraction methods.
- **Rationale:** Up-to-date training will ensure that surveyors are equipped to evaluate new manufacturing techniques and product safety, thereby protecting patients and consumers.

3. Expand Inspection Scope

- **Action:** Include cannabinoid hemp retailers in the regular inspection schedule.
- **Rationale:** The enactment of Act 269 SLH 2025 requires the program to enforce the law and to protect public health. The rapid growth of cannabinoid hemp and illicit cannabis retailers pose potential risks to public health and safety. Formal inspections will ensure compliance with safety and environmental standards.

4. Develop a Long-Term Resource Plan

- **Action:** Collaborate with state authorities to establish a sustainable resource allocation plan, including funding for additional staff, training programs, and inspection tools.

- **Rationale:** A structured plan will support the long-term effectiveness of OMCCR's regulatory activities and ensure the agency can meet increasing demands.

5. Public Education and Collaboration

- **Action:** Expand educational outreach to licensees, cannabinoid hemp retailers, and the public about regulatory expectations and product safety standards.
- **Rationale:** Clear communication will promote voluntary compliance and reduce the likelihood of regulatory violations.

Final Note

To ensure the health and safety of Hawaii's citizens and the sustainability of the medical cannabis industry, OMCCR must address these challenges proactively. Securing the necessary resources and implementing these recommendations will enable the office to fulfill its mission of providing access to safe, effective, and responsibly manufactured medical cannabis.
