

**State Health Planning  
and Development  
Agency (SHPDA)**

**Health Care  
Utilization Report  
Hawaii 2015**

## Administrator's Message

September, 2016

Aloha:

The State Health Planning and Development Agency (SHPDA) is pleased to present its 2015 State of Hawaii Health Care Utilization Report.

The data included in this annual report may be useful for prospective SHPDA certificate of need applicants, health care market analysts, economists, and students who are researching Hawaii's health care trends, costs, and utilization rates.

The Agency appreciates the efforts of all the health care providers who submitted their annual utilization data. It is only through their cooperation that the agency is able to provide this document.

SHPDA welcomes your comments and suggestions for improvements of the report.

With best regards,

Romala Sue Radcliffe, B.A., M.A.  
Administrator

## Glossary

**Term**  
**Definition**

### Acute Bed

is the bed type designated to service inpatients whose average length of stay is usually less than thirty (30) days and require access to the full range of services provided by an acute care inpatient facility.

### Acute Psychiatric Bed

is the bed type designated to provide 24 hour inpatient acute care services for mentally disordered patients whose length of stay is usually less than thirty (30) days.

### Acute/SNF Swing Bed

is the bed type designated to service either acute level or skilled nursing level patients.

### Admissions

refer to the number of inpatients admitted by the respective facility and bed type. It includes multiple admissions by an individual admitted more than once during the reporting period.

### Average Daily Census (ADC)

is the average number of inpatients on a single day during the reporting period. The ADC is calculated by dividing the number of inpatient days by 365.

### Average Length of Stay (ALOS)

is the average number of days a patient stays in the facility. The ALOS is computed by dividing the total patient days by the number of admissions.

The ALOS may indicate whether a facility is able to appropriately discharge patients from the facility or to another type of bed based on the patient's condition. It may also indicate the proportion of very seriously ill patients the facility cares for. Usually, the larger the number of very sick patients, the longer the ALOS.

The data includes patient days that result from being unable to discharge patients due to a lack of available services in the community or beds needed at other facilities. If these "waitlisted days" were excluded from the ALOS data, it would provide better accurate data on how many days are needed to care for patients and result in a lower ALOS.

### County

means one of four major counties: (1) Hawaii County is composed of the island of Hawaii; (2) Honolulu County is composed of the island of Oahu and the City of Honolulu (Census County Division, or CCD) on Oahu and is the most populous city in the state; (3) Kauai County is composed of the island of Kauai; and (4) Maui County comprises the islands of Maui, Molokai, and Lanai.

## Glossary

Term  
Definition

### Critical Care Unit (CCU)

is a specialized care bed designed to provide intensive, focused care for patients who are seriously or critically ill within an acute bed facility setting.

### Inpatient Days

are the total number of days a patient stays in a facility. The totals currently include “waitlisted days”, i.e. patient days as a result of not being able to discharge a patient due to lack of community services or other types of beds appropriate for the care of the patient.

### Intermediate Care Facility (ICF)

is a facility which provides appropriate care to persons referred by a physician needing: (1) 24-hour a day assistance with the normal activities of daily living; (2) need care provided by licensed nursing personnel and paramedical personnel on a regular, long term basis, and; (3) don't need skilled nursing or paramedical care 24-hour a day.

### Licensed Beds

refer to the approved bed capacity as determined by the Office of Health Care Assurance (OHCA) for the State of Hawaii.

### Occupancy Rate (Occup %)

is the percentage of licensed bed capacity occupied on average. Occupancy rates are calculated by dividing the ADC by the number of licensed beds and multiplying by 100.

Health care facilities require some excess capacity to efficiently manage admissions, discharges and transfers of patients. If, however, the occupancy rate is low for long periods of time, the facility may not be able to generate sufficient revenue to justify staffing and other expenses for this additional capacity.

In acute care, particularly where patients are admitted on a non-scheduled basis, e.g. OB, CCU, etc., optimal occupancy must accommodate unforeseen increases in admissions. Consequently, occupancy rates may occasionally exceed 100% because of an unexpected surge in number of admissions. This might also occur if there is a decrease in routine patient discharges. Chronic high occupancy rates will decrease the number of beds available to the community.

Lack of qualified staffing and temporary closure of patient areas because of facility renovations, labor shortages and strikes may also prevent making more beds available.

### Psychiatric Beds

are inpatient beds designated for the diagnosis and long-term treatment of chronic mental illness or mental disorder.

## Glossary

Term  
Definition

### Rehabilitation Beds

are inpatient beds designated to restore the ill or disabled person to achieve the fullest physical, mental, social, vocational, and economic usefulness possible.

### SHPDA Approved Bed Capacity

is the Certification of Need approved and authorized bed capacity by SHPDA.

### Skilled Nursing Facility (SNF)

is a facility that accepts patients for rehabilitative services or medical care that is less intense than that received in a hospital. The cost per bed day in a SNF is typically less than a like cost in an acute care hospital.

### SNF/ICF – Mental Retardation (S/I – MR)

is a facility providing skilled nursing care or intermediate care services for persons who are mentally retarded.

### Special Treatment Facility (STF)

means a facility which provides a therapeutic residential program for care, diagnoses, treatment or rehabilitation services for socially or emotionally distressed persons, mentally ill persons, persons suffering from substance abuse, and developmentally disabled persons.
