ADMINISTRATIVE APPLICATION - CERTIFICATE OF NEED PROGRAM

Application Number: # 18-12A Date of Receipt: _____
To be assigned by Agency

APPLICANT PROFILE

Project Title: Establishment of additional chronic renal dialysis location and services in Ewa Beach

Project Address: 91-919 Fort Weaver Road, Suite Nos. 110, 111 and 116, Ewa Beach, HI 96706

Applicant Facility/Organization: USRC Ewa Beach, LLC

Name of CEO or equivalent: Steven M. Pirri

Title: President

Address: 5851 Legacy Circle, Suite 900, Plano, Texas 75024

Phone Number: 214-736-2704 Fax Number: 214-736-2701

Contact Person for this Application: Thomas Weinberg

Title: Chairman

Address: 5851 Legacy Circle, Suite 900, Plano, Texas 75024

Phone Number: 214-736-2730 Fax Number: 214-736-2731

CERTIFICATION BY APPLICANT

I hereby attest that I reviewed the application and have knowledge of the content and the information contained herein. I declare that the project described and each statement amount and supporting documentation included is true and correct to the best of my knowledge and belief.

Signature

September 25, 2018

6.	Other: Fair market value of lease payments (10 year lease)	<u>\$3,724,608</u>

TOTAL SOURCE OF FUNDS: \$7,742,947

7. **CHANGE OF SERVICE:** If you are proposing a change in service, then please briefly list what services will be added/modified. Be sure to include the establishment of a new service or the addition of a new location of an existing service. Please reference the Certificate of Need Rules Section 11-186-5 for the categories of services. If you are unable to determine which category best describes your project, please consult with agency staff.

Establishment of additional 24 station chronic renal dialysis location and services (HAR § 11-186-5(4)(A)).

RECEIVED

8. **IMPLEMENTATION SCHEDULE:** Please present a projected time schedule for the completion of this project from start to finish. Include all of the following items that are applicable to your project:

18 NOV 16 10:27

- a) Date of site control for the proposed project: June 22, 2018
- b) Dates by which other government approvals/permits will be applied for and received:
 - Building permits applied – December 2018
 - Building permits received – January 2019
 - Upon approval of this CON application, an initial CMS-855A Enrollment Application for Institutional Providers will be submitted to apply for Medicare Certification
- c) Dates by which financing is assured for the project: September 2018
 - Financing has already been secured. Anticipated joint-venture partners will contribute their pro-rata share of the necessary working capital to fund the clinic's operations. USRC Ewa Beach, LLC has secured a loan from U.S. Renal Care, Inc. for the balance of the necessary capital related to the project. The joint-venture partners will be financially responsible for their pro-rata guarantee of the loan amount to U.S. Renal Care, Inc.
- d) Date construction will commence: January/February 2019
- e) Length of construction period: 4 months
- f) Date of completion of the project: May 2019
- g) Date of commencement of operation: June 2019

Please remember that the Agency does monitor the implementation of Certificates approved. Non-implementation of a project as described in your application may result in a fine and/or withdrawal of the certificate of need.

9. **EXECUTIVE SUMMARY:** Please present a brief summary of your project. In addition, provide a description of how your project meets each of the certificate of need criteria listed below. If a new location is proposed, please attach an easy to read map that shows your project site.

- a) Relationship to the State of Hawai'i Health Services and Facilities Plan.
b) Need and Accessibility
c) Quality of Service/Care
d) Cost and Finances (include revenue/cost projections for the first and third year of operation)
e) Relationship to the existing health care system
f) Availability of Resources.

Executive Summary

USRC Ewa Beach, LLC ("USRC-EB") seeks approval to establish an additional location for its dialysis services, located in the West Oahu community of Ewa Beach in the Ewa Beach Shopping Center at 91-919 Fort Weaver Road, Ewa Beach, HI 96706 (the "Additional Location"). The Additional Location will offer a full range of dialysis services and modalities, including 24 hemodialysis stations and a home dialysis program. USRC-EB is a wholly owned subsidiary of Dialysis Newco, Inc. ("DSI") and DSI is a wholly owned subsidiary of U.S. Renal Care, Inc. ("USRC"). USRC, through DSI will be the owner of USRC-EB and will manage the clinic's day to day operations under a Management Agreement between USRC and USRC-EB. The clinic will be operated in a manner similar to USRC's other outpatient dialysis clinics on Oahu and will utilize USRC's existing clinical policies, procedures and systems. The medical director of the clinic when operational will be David Ono, MD (Nada, Ono, Ka'anehe, Solomon & Hayashi, LLP). The establishment and operation of the Additional Location will enhance USRC's ability to continue to provide high quality and accessible dialysis services to individuals with End Stage Renal Disease ("ESRD") on Oahu, particularly in West Oahu.

a) Relationship to State of Hawai'i Health Services and Facilities Plan

Specific goals of the Health Services and Facilities Plan ("HSFP") reflect current issues facing Hawaii's health care environment, and include:

- Focus on increasing cost-effective access to necessary health care services. Access is distinguished from convenience.
- Promote the financial viability of the health care delivery system.
- Encourage optimization of services and expensive technology by ensuring that supply meets the need and costs are reasonable.
- Promote regionalization of services where appropriate.¹

¹ HSFP at page 15 (<http://hawaii.gov/shpda/resources-publications/health-services-and-facilities-plan-2009>).

RECEIVED
NOV 16 10 27 AM '09
ST. HEALTH PLANNING
AGENCY

This development of the Additional Location furthers these goals. Dialysis services are vitally necessary to the patients who require them and, in keeping with the goals of the HSFP, USRC (hereinafter refers to USRC and USRC-EB collectively) will strive to maintain a high standard of quality care while also being focused on cost-effective measures.

The services provided by the clinic will include health education, nutrition education and care education for patients and their families. By maintaining and improving access to quality services at a reasonable cost and providing health education to assist patients and their families in better understanding and managing their chronic disease, the application will support the general principles of the Statewide Health Coordinating Council ("SHCC") and the priorities of the West Oahu Subarea Council ("SAC").²

The application will advance the West Oahu Subarea Health Planning Council priorities to have adequate access and/or improve education and increase preventive medicine. Patient counts and prevalence rates for ESRD are highest among those individuals age sixty-five (65) and older.³ The costs associated with dialysis are minimal compared with the costs of emergency medical care and/or hospitalizations due to complications from ESRD that can result from noncompliance with prescribed dialysis treatment regimens.

Additionally, complications from ESRD frequently make it difficult for seniors to continue to live in their homes and necessitate costly nursing home care. By ensuring continued access to a dialysis center, the proposed project will assist seniors with ESRD to comply with their dialysis treatment schedules and help maintain their quality of life. Such compliance will also help individuals avoid nursing home care and reduce the financial and social costs of ESRD for them, their families and the community.

USRC acknowledges and represents:

- Dialysis is a supportive service that maintains the quality of life for its patients.
- Nutrition is an important part of a dialysis patient's everyday lifestyle and our nutrition guidelines and support to patients are all based on industry standards and scientifically-based knowledge.
- We aim to be active in community engagement via partnerships with a wide array of organizations such as the National Kidney Foundation, Hawaii Health Systems Corporation, Transpacific Renal Network, the GFR Alliance, HMSA, Kaiser Permanente, the University of Hawaii, Kapi'olani Community College and the National Renal Administrators Association.
- A vital part of our patient and family services will be health education counseling and classes about dialysis care and participation in community preventive health campaigns about kidney disease and diabetes.

RECEIVED

Hawaii Revised Statute §323D-12 mandates that HSFP must include standards for utilization of health care facilities. Capacity (utilization) thresholds for certain standard categories of health care services are established to guide the initial determination of need for a service area. Prior to the establishment of a new chronic renal dialysis unit/service, HSFP provides that the minimum utilization of each existing provider in the service area should be 600 treatments per facility and the utilization of the new chronic renal dialysis unit/service should be projected to meet the minimum utilization rate by the third year of operation.⁴ In addition, sub-optimum utilization may be proposed if the benefits clearly outweigh the costs to the community of duplicating or under-using services, facilities, or technologies.⁵

The Primary Service Area for the Additional Location will encompass the Oahu communities of Ewa Beach, Kapolei, and Waipahu. Currently there are only four dialysis facilities servicing the Primary Service Area with respect to Ewa Beach, Kapolei, and Waipahu: USRC's Kapolei facilities (555 Farrington Highway, Kapolei, 96707 and 889 Kamokila Boulevard, Kapolei, 96707) and Liberty Dialysis' Leeward (91-2137 Fort Weaver Road, Ewa Beach, 96706) and Waipahu (94-450 Mokuola Street #109, Waipahu, 96797) facilities. All, but one, of these facilities are providing treatments in excess of the utilization threshold established by HSFP. USRC's 555 Farrington Highway facility annualized treatments are currently 23,193, or 725 treatments per station. USRC's 889 Kamokila Boulevard facility annualized treatments are currently 10,450, or 435 treatments per station. Based on information provided by Liberty Dialysis in support of its CON Application No. 12-28A, Liberty Dialysis' Leeward facility is providing approximately 926 treatments per station and Liberty Dialysis' Waipahu facility is providing approximately 971 treatments per station.

The Additional Location will provide an additional dialysis option to patients residing in the Primary Service Area. This will result in a reduction in the high utilization of the existing facilities in the Primary Service Area. In addition, the additional stations in the Primary Service Area will allow Ewa Beach, Kapolei, and Waipahu residents to obtain dialysis closer to their homes without having to travel to Kapolei and Waipahu, the next closest areas with facilities. As dialysis patients receive treatment three times per week, having a close, updated and convenient dialysis facility is beneficial to the lives of these patients.

In approving CON Application No. 15-07A, SHPDA noted that "Utilization at every facility except DSI's [now USRC's] Koolau Dialysis Center exceeds the HSFP threshold."⁶ SHPDA further referenced testimony that "The HSFP states that utilization thresholds may be modified to allow for suboptimum utilization if a proposal's benefits clearly outweigh [sic] the costs to the community of duplicating or under-using services, facilities or technologies. The HSFP further states that benefits may include improved

⁴ See HSFP at page 29.

⁵ See HSFP at pages 31-32.

RECEIVED

access for the service area combined with significant improvements in quality of care. Thresholds may also be modified to incorporate current and best clinical practices. Best practice requires minimizing the distance that a dialysis patient must travel for treatment in order to reduce the incentive to miss treatment sessions.”⁷

SHPDA has further acknowledged that, irrespective of the actual number and locations of Oahu dialysis facilities outside of the Primary Service Area which are operating below the 600 treatments per station per year threshold, sub-optimum utilization outside of the Primary Service Area is particularly appropriate with respect to dialysis facilities and services since the benefits of improved access, patient compliance with treatment regimen, quality of care, best clinical practice, hospital discharge to outpatient modalities and cost-reduction are so significant.⁸ Simply put, no responsible physician would willingly refer a Ewa Beach, Kapolei or Waipahu patient for treatment three times per week outside of the Primary Service Area.

Although USRC projects that the utilization of the Additional Location will not meet HSFP’s minimum utilization of 600 treatments per station by the third year of operation, as discussed above suboptimum utilization is acceptable, where, as here, the proposal’s benefits clearly outweigh the costs to the community. Moreover, as discussed below, the population growth in the Primary Service Area and the prevalence of diabetes in that population are expected to lead to a significant increase in the need for dialysis services. USRC projects a year 1 ending census at the Additional Location of 38 (translating into 238 treatments per station) and a year 3 ending census of 86 (translating into 450 treatments per station). As such, HSFP utilization threshold levels, as modified by suboptimum indices, are met by this project.

b) Need and Accessibility

As discussed above, the Additional Location will sufficiently satisfy the suboptimum utilization criteria, and therefore the utilization standards as required by HSFP. In addition, as evidenced by the utilization of the other facilities in the Primary Service Area, there is need for the Additional Location. Further, upon commencement of operations, patient access to dialysis services in the Primary Service Area will be improved. The clinic will provide crucial services for ESRD patients who would die without dialysis or successful kidney transplant.

Although the Additional Location primarily is intended to serve the dialysis needs of residents residing in the Primary Service Area, USRC will make its services available to all individuals with ESRD Oahu-wide, including low-income persons, racial and ethnic minorities, women, persons with disabilities, and the elderly.

⁷ LETTER at sections 4 and 5, page 1.

⁸ See letter dated March 19, 2013 from SHPDA to Liberty at sections 10, 12-13 and 18-19, pages 2-4 - <http://hawaii.gov/shpda/certificate-of-need/applications-and-decisions/decisions/shd1228a>.

RECEIVED

The West Oahu Primary Service Area is expected to experience population growth. The resident population of the City and County of Honolulu is projected to increase at an annual rate of 0.4 percent from 2010 to 2040.⁹

16 SEP 28 P1:16

Diabetes is one of the most serious, common, and costly diseases in Hawaii. It is a significant leading cause of death in Hawaii¹⁰ and the prevalence of adult diabetes has been increasing.¹¹ The Hawaii Department of Health¹² found that one of the highest rates of diabetes has been occurring in the "Waipahu/Kapolei/Ewa [Beach]" area.¹²

c) Quality of Service/Care

USRC is a leading dialysis provider in the United States. USRC is the third (3rd) largest for profit dialysis provider and owns and operates over three-hundred (300) dialysis facilities in thirty-three (33) states and the U.S. Territory of Guam. USRC also provides dialysis services to over twenty-four thousand (24,000) individuals with End Stage Renal Disease. USRC's standards of patient care are established through medical protocol guidelines developed and monitored by USRC's Medical Advisory Board. These protocols are established using the best practices across our network of affiliated nephrologists. USRC is committed to quality care, benefitting patients' quality of life and longevity which results in higher survival rates and reduced hospital stays.

Stan Lindenfeld, MD, USRC acting Chief Medical Officer, is actively involved in the training and protocol development of USRC's dialysis facilities. The involvement of Dr. Lindenfeld and other nephrology members of the USRC Medical Advisory Board has been a significant factor in: (1) attracting new medical directors and (2) maintaining strong relationships with existing physicians. USRC's physician leadership also allows it to achieve physician consensus among the facilities, which enhances the ability to achieve a high level of standardization among our facilities. USRC measures clinical outcomes using industry standards developed by the National Kidney Foundation and the ESRD Network.

USRC provides training for all members of its clinical care team and nurses and patient care technicians must be licensed or certified, as applicable. USRC maintains a robust education department which offers continual educational and training opportunities for employees. USRC maintains patient/staff ratios consistent with those in the dialysis industry in general.

RECEIVED

78 SEP 28 P1:18

USRC provides quality dialysis services to its patients and is in full compliance with all applicable federal and state regulations at all of its dialysis centers in Hawaii. All USRC Hawaii dialysis facilities are CMS certified, and observe the standards set by both the CDC and CMS in their operations. USRC's quality improvement program was developed in accordance with CMS and the National Kidney Foundation's Disease Outcomes Quality Initiative guidelines.

All USRC nurses are licensed in Hawaii and all patient care technicians are nationally certified as required by CMS.

RECEIVED

78 NOV 16 AM 20

d) Cost and Finances

The total cost of developing the Additional Location will be approximately \$7,742,947. Of this amount, \$570,990 is pegged for movable equipment, \$798,813 for financing costs, \$173,661 for fixed equipment, \$2,424,875 for leasehold improvements to the site, \$50,000 for impact fees, and \$ 3,724,608 for 10 year lease payments. The estimated revenue and cost projections for the first and third full years of operation are:

	Year 1	Year 3
Facility Expenses:		
Labor	313,500	1,350,000
Medical supplies	42,636	184,185
Medications	120,384	520,129
Medical Director fees	75,000	100,000
Rent	372,461	372,461
Bad debt	34,353	131,414
Management Fee	97,334	372,341
Other	290,458	331,918
Total Facility Expenses	1,346,125	3,362,448
Facility EBITDA	(201,025)	1,018,032
Depreciation & amortization	643,905	658,905
Interest expense	122,937	193,975
Net Income before Min. Int.	(967,867)	165,151

e) Relationship to the Existing Health Care System

As nearly all of the existing dialysis facilities in the Primary Service Area are operating in excess of the thresholds established by HSFP, the establishment of the Additional Location will positively impact the health care system on Oahu by providing additional dialysis capacity and options for individuals with ESRD. USRC will collaborate with other providers, community groups and government organizations in the Primary Service Area to ensure quality care for our mutual patients and support for our shared health goals.

USRC, through DSI, has been a part of Ewa Beach/West Oahu since 2012 and looks forward to continuing to provide services that address the community's current and future needs.

RECEIVED

f) Availability of Resources

USRC will initially fund the Additional Location with cash on hand. The net working capital is required to cover the initial expenses during the beginning month of operations. USRC will then lend necessary amounts to USRC-EB for its costs and expenses. USRC-EB will agree to repay the principal together with interest and loan charges on the aggregate unpaid principal balance of the loan and assume the remaining obligations under USRC-EB's lease for the clinic.

As USRC already operates dialysis facilities on Oahu, USRC anticipates filling a portion of the staffing positions for the Additional Location from its existing labor force, and the remainder through recruiting efforts in Hawaii through job fairs, advertising and open houses. If necessary, USRC has access to national recruiting firms who will help identify and/or supply nurses, patient care technicians and other personnel for the facility.

10. **Eligibility to file for Administrative Review.** This project is eligible to file for Administrative review because: (Check all applicable)

- It involves bed changes, which will have a capital expense of \$1,000,000 or less, and which will have an increased annual operating expense of less than \$500,000.
- It involves service changes which will have a capital expense of \$1,000,000 or less, and which will have an increased annual operating expense of less than \$500,000.
- It is an acquisition of a health care facility or service, which will result in lower annual operating expenses for that facility, or service.
- It is a change of ownership, where the change is from one entity to another substantially related entity.
- It is an additional location of an existing service or facility.
- The applicant believes it will not have a significant impact on the health care system.
