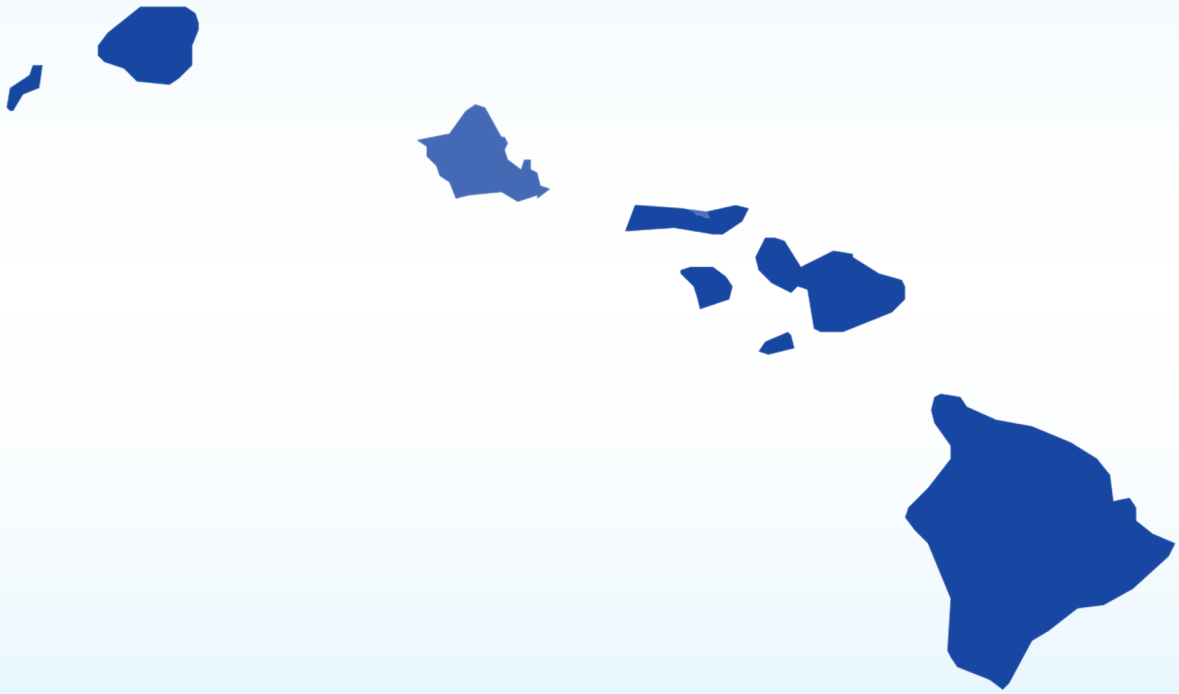
Health Care Utilization Report

Hawaii 2019

(Revised May 20, 2021)



State Health Planning and Development Agency

(SHPDA)

Administrator's Message

December 2020

The State Health Planning & Development Agency (SHPDA) is pleased to present this 2019 edition of the Hawaii Health Care Utilization Report.

The report contains data on health care utilization from public and private health care facilities in Hawaii. It addresses one of SHPDA's functions which is to collect credible and up-to-date data on the usage of health care services - data that is essential for planning new health care infrastructure in the State of Hawaii.

It is our hope that this report can assist decision makers in the health care industry and in government with their plans to continue to provide access to quality health care services for Hawaii's people.

SHPDA would like to thank Hawaii's health care facilities and their staff for providing this vital health care utilization data in support of the Agency's functions.

Comments and suggestions for the improvement of this report are most welcome.

Aloha kakou.

Serafin P. Colmenares Jr., PhD, MPH
Acting Administrator

Glossary

Term	Definition
Acute Bed	is the bed type designated to service inpatients whose average length of stay is usually less than thirty (30) days and require access to the full range of services provided by an acute care inpatient facility.
Acute Psychiatric Bed	is the bed type designated to provide 24 hour inpatient acute care services for mentally disordered patients whose length of stay is usually less than thirty (30) days.
Acute/Long Term Swing Bed	is the bed type designated to provide either acute care or skilled nursing facility (SNF) care to patients.
Admissions	refer to the number of inpatients admitted by the respective facility and bed type. It includes multiple admissions by an individual admitted more than once during the reporting period.
Average Daily Census (ADC)	is the average number of inpatients on a single day during the repoting period. The ADC is calculated by dividing the number of inpatient days by 365.
Average Length of Stay (ALOS)	is the average number of days a patient stays in the facility. The ALOS is computed by dividing the total patient days by the number of admissions. The ALOS may indicate whether a facility is able to appropriately discharge patients from the facility or to another type of bed based on the patient's condition. It may also indicate the proportion of very seriously ill patients the facility cares for. Usually, the larger the number of very sick patients, the longer the ALOS. The data includes patient days that result from being unable to discharge patients due to a lack of available services in the community or beds needed at other facilities. If these "waitlisted days" were excluded from the ALOS data, it would provide better accurate data on how many days are needed to care for patients and result in a lower ALOS.
County	means one of four major counties: (1) Hawaii County is composed of the island of Hawaii; (2) Honolulu County is composed of the island of Oahu and the City of Honolulu (Census County Division, or CCD) on Oahu and is the most populous city in the state; (3) Kauai County is composed of the island of Kauai; and (4) Maui County comprises the islands of Maui, Molokai, and Lanai.

Glossary

Term Definition
Critical Care Unit (CCU)
is a specialized care bed designed to provide intensive, focused care for patients who are seriously or critically ill within an acute bed facility setting.
Inpatient Days
are the total number of days a patient stays in a facility. The totals currently include “waitlisted days”, i.e. patient days as a result of not being able to discharge a patient due to lack of community services or other types of beds appropriate for the care of the patient.
Intermediate Care Facility (ICF)
is a facility which provides appropriate care to persons referred by a physician needing: (1) 24-hour a day assistance with the normal activities of daily living; (2) need care provided by licensed nursing personnel and paramedical personnel on a regular, long term basis, and; (3) don’t need skilled nursing or paramedical care 24-hour a day.
Licensed Beds
refer to the approved bed capacity as determined by the Office of Health Care Assurance (OHCA) for the State of Hawaii.
Occupancy Rate (Occup %)
is the percentage of licensed bed capacity occupied on average. Occupancy rates are calculated by dividing the ADC by the number of licensed beds and multiplying by 100. Health care facilities require some excess capacity to efficiently manage admissions, discharges and transfers of patients. If, however, the occupancy rate is low for long periods of time, the facility may not be able to generate sufficient revenue to justify staffing and other expenses for this additional capacity. In acute care, particularly where patients are admitted on a non-scheduled basis, e.g. OB, CCU, etc., optimal occupancy must accommodate unforeseen increases in admissions. Consequently, occupancy rates may occasionally exceed 100% because of an unexpected surge in number of admissions. This might also occur if there is a decrease in routine patient discharges. Chronic high occupancy rates will decrease the number of beds available to the community. Lack of qualified staffing and temporary closure of patient areas because of facility renovations, labor shortages and strikes may also prevent making more beds available.
Psychiatric Beds
are inpatient beds designated for the diagnosis and long-term treatment of chronic mental illness or mental disorder.

Glossary

Term Definition
Rehabilitation Beds
are inpatient beds designated to restore the ill or disabled person to achieve the fullest physical, mental, social, vocational, and economic usefulness possible.
SHPDA Approved Bed Capacity
is the Certification of Need approved and authorized bed capacity by SHPDA.
Skilled Nursing Facility (SNF)
is a facility that accepts patients for rehabilitative services or medical care that is less intense than that received in a hospital. The cost per bed day in a SNF is typically less than a like cost in an acute care hospital.
SNF/ICF for individuals with intellectual disabilities
is a facility providing skilled nursing care or intermediate care services for persons who have intellectual disabilities.
Special Treatment Facility (STF)
means a facility which provides a therapeutic residential program for care, diagnoses, treatment or rehabilitation services for socially or emotionally distressed persons, mentally ill persons, persons suffering from substance abuse, and developmentally disabled persons.

Acronyms

Acute/LT Swing	Acute/Long Term Swing Bed

SNF	Skilled Nursing Facility
SNF/ICF	Skilled Nursing and Intermediate Care Facility
STF	Special Treatment Facility
TB	Tuberculosis
Tesla	Standard unit of imaging strength for MRI

Bed Utilization Formulas

Term

Formulas

Example. Suppose a facility reported that for their 150 licensed beds there were 6,000 admissions and 40,000 total inpatient days for the year then:

1. Average Length of Stay (ALOS)

= Total Inpatient Days/Admissions
= 40,000 Days/6,000 Admissions
= 6.67 or 7 Days

2. Average Daily Census (ADC)

= Total Inpatient Days/365 Days
= 40,000 Days/365 Days
= 109.59 or 110 Beds

3. Occupancy Rate (Occup %)

= (Average Daily Census/Licensed Beds) X 100
= (109.59/150) X 100
= 0.7306 X 100
= 73.06%
