SAMPLE RECEIPT INFORMATION

Sample Receipt Information

ARF: 81492

Project: 60481245 CIV0053 Red Hill Fuel Storage. HI

Sample Receipt Information:

Four water samples were received November 15, 2016, at 2.0°C, 0.5°C, 0.5°C, 1.0°C, and 1.0°C. The sample group was assigned Analytical Request Form (ARF) number 81492. The sample numbers and requested analyses were compared to the chains of custody and email communications. Plastic containers for sample ERH116 were not received: as a result, the alkalinity, anion, ferrous iron, silica and metals analyses were canceled. Additionally the methane analysis was canceled for sample ERH116, as requested. MS/MSD was added to sample ERH115. The anion and metals analyte lists were revised, as requested on November 18, 2016. No other exception was encountered.

Sample Table

CLIENT ID	APPL ID	Matrix	Date Sampled	Date Received
ERH114	AZ45865	WATER	11/14/16	11/15/16
ERH115	AZ45866	WATER	11/14/16	11/15/16

ERH120	AZ45868	WATER	11/14/16	11/15/16

The samples and blanks were screened for J-value responses between the detection limit (DL) and limit of quantitation (LOQ).

APPL's Laboratory control limits generated in house statistically do not meet the control limits listed in DoD QSM 5.0 for all analytes. Laboratory control spike recoveries for this project meet all control limits listed in the DoD QSM 5.0 except where noted. A copy of our in house generated control limits is available upon request. In addition, a copy of our LOQ control limits, established using 7 data points, are also available upon request.

Only the portion of the injection log relative to these samples is included. A full sequence log is available upon request.

Measurement uncertainty can be reported upon request.

Morning Margie,

For the revised COC that you sent on 11/15 (attached), I wanted to verify that you do want to cancel the RSK for ERH116. We DID receive RSK VOA vials intact for ERH116.

The plastic containers, which we did NOT receive only apply to SM3500-Fe and EPA 300. Those are the 2 analyses we will cancel, unless you really do want to cancel the RSK.

Please clarify for me. I'd appreciate it!

thank you,

Libby

Hi Libby,
Thank you. Yes, sorry about that. Knew there were errors on those COCs but we only had 30 minutes to custody seal, pack, and get to FedEx. I'll send revised COCs later today.

*For Sample ERH116 APPL only received 6 Voas and 6 Amber liters. We received no plastic conntainers for the analyses that require them. – cancel analyses that require plastic containers.

*The Coc is missing a collection time time for Sample ERH114, the container lists the collection time as 1100. – thank you for the time. We missed noting that.

*We received extra VOAs and Amber liters for Sample ERH115, Possible MS/MSD? - Yes, please do MS/MSD.

Thank you,

Sample Receipt Information:

Five water samples were received November 16, 2016, at 0.0°C, 0.5°C, 1.0°C, 1.0°C, and 1.0°C. The sample group was assigned Analytical Request Form (ARF) number 81500. The sample numbers and requested analyses were compared to the chains of custody and email communications. The anion and metals analyte lists were revised, as requested on November 18, 2016. The client requested re-analysis of sample ERH122 for TPH-D&O and added TPH-D&O with silica gel preparation to the same sample on December 1, 2016. No other exception was encountered.

The samples and blanks were screened for J-value responses between the detection limit (DL) and limit of quantitation (LOQ).

APPL's Laboratory control limits generated in house statistically do not meet the control limits listed in DoD QSM 5.0 for all analytes. Laboratory control spike recoveries for this project meet all control limits listed in the DoD QSM 5.0 except where noted. A copy of our in house generated control limits is available upon request. In addition, a copy of our LOQ control limits, established using 7 data points, are also available upon request.

Only the portion of the injection log relative to these samples is included. A full sequence log is available upon request.

Measurement uncertainty can be reported upon request.

Add sgc to AZ45909 (AZF81500) per Margie 12/1/2016 JL

Thank you so much, Libby! Got out of a call with the client. Yes, please perform the silica gel cleanup as well. So to confirm for the case narrative:

1) Re-analyze ERH122 for TPH-d/o and report both original and reanalysis results.
2) Perform silica gel clean up on ERH122 extract for TPH-d/o and analyze extract. Report results as TPH-d/o with SGC.

Hi Margie,
Yes, we can silica gel clean that sample.
Let me know if you'd like it added please.

thank you,

Hi Libby,
Sorry, another question on ERH122. The client wants to know if it's possible to still perform the TPH-d/o with silica gel cleanup with the remaining extract. If yes, then the client wants that performed. Please let me know.

Hi Libby,
The client reviewed the prelim results and requested that we reanalyze (for confirmation) sample ERH122 (AZ45909) for TPH-d/o. Please report both results in the final report if possible.
If you would like to discuss, please let me know.

APPL's Laboratory control limits generated in house statistically do not meet the control limits listed in DoD QSM 5.0 for all analytes. Laboratory control spike recoveries for this project meet all control limits listed in the DoD QSM 5.0 except where noted. A copy of our in house generated control limits is available upon request. In addition, a copy of our LOQ control limits, established using 7 data points, are also available upon request.

Only the portion of the injection log relative to these samples is included. A full sequence log is available upon request.

Measurement uncertainty can be reported upon request.
