

## Hawaii Cesspool Pilot Grant Program

### How to Determine your Household Area Median Income

- Step 1 Create a list of the number of adults and children (all household members) that occupy the home.
- Step 2 Collect 1040 Federal Tax Returns for the most recent year for all household members generating income.
- Step 3 Determine each household member's income by using the ADJUSTED GROSS INCOME on the 1040 Federal Tax Return.
- Step 4 Add together the adjusted gross income for all household members to determine the Total Household Income.
- Step 5 Review chart below and determine whether Total Household Income is equal or less than the income of a family of the same size earning 140% AMI.
